itself MANUAL FOCUS RING Don't want your camera to decide where to focus Turn this ring Want to make fine manual focus adjustments while using autofocus Again turn this ring ZOOM RING When your DSLR is fitted with a zoom lens use this ring to adjust for desired focal length and determine how close or far away a subject in your shot appears IMAGE STABILIZATION SWITCH Located on your lens or the body of your camera this switch kicks image stabilization on and off This function allows you to get sharper images of static objects without a tripod or in lower light than might be possible without it HOTSHOE While it sounds like a dated dance move it's actually where you attach a flash or other accessory to your camera A lot of times DSLRs come with covers to shield the hotshoe when it's not in use MODE DIAL Use this dial to pick a shooting mode Cede control of exposure settings to the camera in fully automatic mode be a control freak in fully manual or try one of the many preset program modes ISO BUTTON This button controls the light sensitivity of your camera's image sensor If you're shooting in ultrabright light use a low ISO 50 200 and increase ISO in lower light FYI the higher the ISO in use the more noise visual distortion often in the form of grainy or blotchy appearance your image may have AUTOFOCUS BUTTON Press this button to tell your DSLR to pick which elements in your shot should appear the sharpest VIEWFINDER Peek through the viewfinder to make choices about how to compose and frame your shot Through it you'll see a corrected read right side up version of the image that reflects off your camera's reflex mirror SHUTTER Essentially a mechanical curtain the shutter serves as a movable barrier between a camera's image sensor and its lens Open the shutter and your camera's reflex mirror pivots up allowing an image to hit the image sensor PENTAPRISM Not unlike the brain's visual cortex the part of your brain that converts images your eyes see as upside down this pentagon shape prism flips an image out of reverse before sending it the viewfinder's way IMAGE SENSOR A device covered with pixels light sensitive cells an image sensor measures the intensity and color of an image that has passed through the shutter Last the image sensor converts these measurements into digital form ultimately capturing your shot REFLEX MIRROR When an image enters a lens it's upside down The reflex mirror reflects that image through a focusing screen in the direction of the pentaprism LENS Detachable lenses change your camera's capabilities by narrowing or widening a circular opening the size of which is called the aperture to control the amount of light that enters Light passes through the lens on its way to the reflex mirror

Luke's Portrait of Gentiles Prior to Their Coming to Faith Christoph W. Stenschke, 1999 Christoph W Stenschke examines Luke's portrait of the Gentiles state prior to their coming to Christian faith Following the history of research he commences with Luke's direct references to the Gentiles prior to faith and then draws conclusions concerning their state from the Gentile encounter with Jesus and Christian salvation This includes Luke's notes on the condition of Gentiles and on their appropriation of salvation Finally conclusions from Luke's portrayal of Gentile Christians are drawn With his approach Christoph W Stenschke challenges some previous contributions to Lukan anthropology He argues that the main study in the field J W Taeger *Der Mensch und sein Heil* does not sufficiently consider all the evidence By concentrating on the Gentiles in Luke Act including Samaritans and God fearers the author's thesis covers all the relevant material Contrary to Taeger who suggests that Gentiles do not need salvation as much as correction he discovers that Luke portrays Gentiles prior to faith in a condition requiring God's saving intervention Thorough correction has to accompany and follow this salvation Though allowing for distinct Lukan emphases this portrait is not essentially at odds with that of other NT authors These results further show that the Areopagus speech needs to and can be satisfactorily interpreted in its context and in conjunction with similar statements The author further argues that Luke's narrative sections and the characterization they present should no longer be neglected in favour of the speeches Luke's portrayal of Gentiles prior to faith also bears on his understanding of sin and provides additional justification for the Gentile mission Christoph W Stenschke challenges proposals of Luke's alleged anti Judaism and provides some hitherto little noticed correctives
