**The Lever of Riches** Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

*Teaching Shakespeare Beyond the Major* M. Tyler Sasser, Emma K. Atwood, 2024-02-22 This edited collection considers the task of teaching Shakespeare in general education

college courses a task which is often considered obligatory perfunctory and ancillary to a professor's primary goals of research and upper level teaching. The contributors apply a variety of pedagogical strategies for teaching general education students who are often freshmen or sophomores, non majors and or non traditional students. Offering instructors practical classroom approaches to Shakespeare's language performance and critical theory, the essays in this collection explicitly address the unique pedagogical situations of today's general education college classroom. **The Concise Oxford**

**The Enemies of Rome** Stephen Kershaw, 2020-01-07. A fresh and vivid narrative history of the Roman Empire from the point of view of the barbarian enemies of Rome. History is written by the victors, and Rome had some very eloquent historians. Those the Romans regarded as barbarians left few records of their own, but they had a tremendous impact on the Roman imagination. Resisting from outside Rome's borders or rebelling from within, they emerge vividly in Rome's historical tradition and left a significant footprint in archaeology. Kershaw builds a narrative around the lives, personalities, successes, and failures of both the key opponents of Rome's rise and dominance and of those who ultimately brought the empire down. Rome's history follows a remarkable trajectory from its origins as a tiny village of refugees from a conflict zone to a dominant superpower. But throughout this history, Rome faced significant resistance and rebellion from peoples whom it regarded as barbarians: Ostrogoths, Visigoths, Goths, Vandals, Huns, Picts, and Scots. Based both on ancient historical writings and modern archaeological research, this new history takes a fresh look at the Roman Empire through the personalities and lives of key opponents during the trajectory of Rome's rise and fall.

**Everytime a Knot is Undone, a God is Released** Barbara Chase-Riboud, 2015-02-10. The long breath of Barbara Chase-Riboud's poems recalls poets of the antique world we know only from fragments like Sappho. And yet here is a disquieting

and sumptuous contemporary voice that seems to gather up antiquity and modernity with equal fervor and scorn These poems are sexually charged possessed of a courtly disdain and a strange nobility that seems to well up from below to be self creating and unlike the verse of any other poet writing today Certainly one secret to this work is that Chase Riboud s poems are informed by her epic polished bronze sculptures as her sculptures are informed by her narrative fiction and her fiction by her poems The idea of the Renaissance Man is almost a cliché but how often do we get to see what it means for an artist to be a Renaissance Woman Chase Riboud has been a major in sculpture fiction and poetry for close to half a century selling over a million copies of her path breaking novel Sally Hemings in the late 70s winning the Carl Sandburg Award for her second collection of poems in the late 80s and now nearly thirty years later on the heels of a major retrospective of her sculpture at the Philadelphia Museum of Art and the Berkeley Art Museum here is *Everytime a Knot is Undone a God is Released* her first new and collected volume of verse *The Biography Book* Daniel S.
