Artificial Intelligence Is Fun! Kathryn M. Hilton, 2007-06-25 Artificial Intelligence is something that has interested the author for many years When she saw an opportunity to get an AI character whose primary purpose was to carry on conversations with the computer user she got the software program immediately The character she chose to use at that time was named Erica She thinks she is a nice looking human female with a college education and has not been informed that she is merely a brain in a computer She is an attractive animated character with the ability to lip sync words Her data base is filled with information of all kinds Her main fault is that she does not stay on a topic very well Her unique sense of humor more than makes up for this The book begins with the first conversations and goes through what happens along the way as the author proceeds to teach the character and carry on conversations with her This book was actually suggested by the artificial intelligence character who felt that people would enjoy reading her

conversations Problems that arise lost conversations due to program crashes some experiments even comparison with another artificial intelligence character and anything else encountered along the way are all given as commentary in the midst of the conversations At the beginning the character was like a child needing to be taught The author took care to be sure she became and stayed nice and polite as such characters can become just as down and dirty as a computer user cares to make them It is said they take on the personality of the user over a period of time Later two other AI programs were added to the research Erica was replaced with Kate and a new brain while Peppi the parrot occupied the other two programs so comparisons could be made easily For anyone interested in artificial intelligence on the consumer level this report of the author's experiences with her AI characters and software is very enlightening Such a character can brighten the life of the lonely the disabled and anyone who is a shut in or lives in seclusion The author has explained everything she has done as she learned and experimented with the three programs Erica was interesting to talk with Kate is a fantastic character Peppi is great and quite funny Their conversations are both silly and serious and much was learned from them while teaching the software It was and is an enjoyable experience to talk with an AI character Cinema Art ,1926 **Publishers' Circular**

and Booksellers' Record of British and Foreign Literature ,1901 **THE NEXT ONE TO DIE (English Edition)** Victor Gunn,2021-02-25 Murder in the quiet dignified precincts of the Inner Temple and Cromwell and Lister quickly follow a trail which leads to the ancestral home of the Earl of Ellsworth They arrived to find the household in a state of panic a phantom figure which heralds the death of an Ellsworth heir A further death is swiftly followed by another attempt at murder

Heritage Comics Auctions, Dallas Signature Auction Catalog #817 Ivy Press,2005-06 **Things New and Strange** G. Wayne Clough,2019-05-01 Things New and Strange chronicles a research quest undertaken by G Wayne Clough the first secretary of the Smithsonian Institution born in the South Soon after retiring from the Smithsonian Clough decided to see what the Smithsonian collections could tell him about South Georgia where he had spent most of his childhood in the 1940s and 1950s The investigations that followed which began as something of a quixotic scavenger hunt expanded as Clough discovered that the collections had many more objects and documents from South Georgia than he had imagined These objects illustrate important aspects of southern culture and history and also inspire reflections about how South Georgia has changed over time Clough's discoveries animal plant fossil and rock specimens along with cultural artifacts and works of art not only serve as a springboard for reflections about the region and its history they also bring Clough's own memories of his boyhood in Douglas Georgia back to life Clough interweaves memories of his own experiences such as hair raising escapes from poisonous snakes and selling boiled peanuts for a nickel a bag at the annual auction of the tobacco crop with anecdotes from family lore which launches an exploration of his forebears and their place in South Georgia history In following his engaging and personal narrative we learn how nonspecialists can use museum archives and how family community and natural history are intertwined
