Living in Tudor and Early Stuart England Robert Tittler, 2022 A rare examination of the political social and economic contexts in which painters in Tudor and Early Stuart England lived and worked While famous artists such as Holbein Rubens or Van Dyck are all known for their creative periods in England or their employment at the English court they still had to make ends meet as did the less well known practitioners of their craft This book by one of the leading historians of Tudor and Stuart England sheds light on the daily concerns practices and activities of many of these painters Drawing on a biographical database comprising nearly 3000 painters and craftsmen strangers and native English Londoners and provincial townsmen men and sometimes women celebrity artists and mere painters this book offers an account of what it meant to paint for a living in early modern England It considers the origins of these painters as well as their geographical location the varieties of their expertise and the personnel and spatial arrangements of their workshops Engagingly written the book captures a sense of mobility and exchange between England and the continent through the considerable influence of stranger painters undermining traditional notions about the insular character of this phase in the history of English art By showing how painters responded to the greater political religious and economic upheavals of the time the study refracts the history of England itself through the lens of this particular occupation *Walford's Antiquarian* Edward Walford, George W.
