Ableist Rhetoric James L. Cherney, 2019-11-01 Ableism a form of discrimination that elevates able bodies over those perceived as less capable remains one of the most widespread areas of systematic and explicit discrimination in Western culture Yet in contrast to the substantial body of scholarly work on racism sexism classism and heterosexism ableism remains undertheorized and underexposed In this book James L Cherney takes a rhetorical approach to the study of ableism to reveal how it has worked its way into our everyday understanding of disability Ableist Rhetoric argues that ableism is learned and transmitted through the ways we speak about those with disabilities Through a series of textual case studies Cherney identifies three rhetorical norms that help illustrate the widespread influence of ableist ideas in society He explores the notion that deviance is evil by analyzing the possession narratives of Cotton Mather and the modern horror touchstone The Exorcist He then considers whether normal is natural in Aristotle's Generation of Animals and in the cultural debate over cochlear implants Finally he shows how the norm body is able operates in Alexander Graham Bell's writings on eugenics and in the legal cases brought by disabled athletes Casey Martin and Oscar Pistorius These three simple equivalencies play complex roles within the social institutions of religion medicine law and sport Cherney concludes by calling for a rhetorical model of disability which he argues will provide a shift in orientation to challenge ableism's epistemic ideological and visual components Accessible and compelling this groundbreaking book will appeal to scholars of rhetoric and of disability studies as well as to disability rights
