Portrait Photography How And Why:

Portrait Photography: how and why Mary Allen, 1973-01-01 People love to take portraits of them A portrait is a captured likeness of the subject in this case a person especially their face Portrait photography however has deeper connotation than that being understood as a superior quality image capturing the individual's physical likeness their character on a digital or film camera's sensor It is also understood that portrait photography produces pleasing and attractive results to the person being the subject Character revelation is the focus of portrait photography At least one element of the subject must be shown on the photo Elements may include the subject's attitude personality unique mannerisms and any other traits or features that shape the very unique nature of the person The portrait photograph tells the viewer something that suggests of the subject's individuality It is often times that a viewer expresses agreeableness that the photographer really captured the subject's likeness in which may be referred to as their exact physical likeness However what one is consciously saying about them is that the photo reveals something that is very identifiable of the character of the subject Portrait photography therefore is not mere capturing of the image likeness but arresting the true character deeply formed in the subject a task that can be challenging as photographers can have subjects they have never known in their life So how do you capture these character traits Each individual has unique characteristics traits attitudes and features However not all people are the same when it comes to expressing them There are just some who can easily convey their individual character or trait with immediate transparency Others on the other hand have difficulty in doing the same For the portrait photographer it would be easier to deal with the former type But for the latter it will take more work and proficiency to study the true essence of the subject otherwise it can be hard transporting this essence into the portrait Having said that portrait photography isn't only about taking shots but rather it involves studying one's character like observing for signals displaying the subject's mannerisms expressions body language and even reactions It will take a lot of skill and understanding for the photographer to do that but such is required to reveal the true character of the subject Engaging them into conversation is one way of doing it Finding a common ground for a topic can begin the studying of person's likeness It can be any subject so long as the subject is cooperating and opening up Creating a rapport is also another important way to do it It easily makes the subject more comfortable at your presence and therefore makes them more natural looking when you start taking photos of them Art Principles in Portrait Photography Walter Beck, 1907 *The Complete Idiot's Guide to Portrait Photography* Kathleen Tracy, 2002 Teaches the steps involved in creating portraits by discussing tips on poses lighting makeup framing and equipment purchasing and maintenance Essential Elements of Portrait Photography Bill Israelson, 2014-09-22 Creating an idealized image of a subject is a portrait photographer's job However the approach is not quite formulaic From one subject to the next and one day to the next there are different goals and scenarios on Monday you may be tasked with photographing your subjects under cloudy skies on a beach on Tuesday you may need want to downplay your client's wide

hips in the studio on Wednesday you may want to create dramatic lighting for an actor's portfolio on stage Every day there is a unique challenge to meet often under varying conditions So how do you make a magically good portrait during every shoot In this book Bill Israelson shows you how to tackle the problem of creating a great portrait of your every client Beginning with a discussion on equipment essentials breaking the discussion into two topics gear for studio work and portable equipment for location work Next you'll learn simple posing strategies for making women men kids and groups look their best in any presentation You'll learn how to position the body from head to toe to maximize assets and downplay common problem areas Lighting is the backbone of every image In the studio you have complete control over every facet of the lighting from its hardness or softness to its color temperature and direction On location the basic principles of good lighting still apply but the quality and quantity of light is subject to change Israelson shows you how to harness the available light and supplement it when needed to create saleable images every time With straightforward jargon free text and a wide range of image examples this book will help you quickly learn how to improve your portrait results to create client pleasing portraits every time
