Portraits From The Quattrocento:

Portraits from the Quattrocento Eugenio Garin,1972 **Renaissance Self-portraiture** Joanna

Woods-Marsden,1998-01-01 An exploration of the genesis and early development of the genre of self portraiture in Italy in the 15th and 16th centuries The author examines a series of self portraits in Renaissance Italy arguing that they represented the aspirations of their creators to change their social standing *Women in Italian Renaissance Art* Paola

Tinagli,1997-06-15 This is the first book which gives a general overview of women as subject matter in Italian Renaissance painting It presents a view of the interaction between artist and patron and also of the function of these paintings in Italian society of the fifteenth and sixteenth centuries Using letters poems and treatises it examines through the eyes of the contemporary viewer the way women were represented in paintings Images and Identity in Fifteenth-century Florence

Patricia Lee Rubin,2007-01-01 An exploration of ways of looking in Renaissance Florence where works of art were part of a complex process of social exchange Renaissance Florence of endless fascination for the beauty of its art and architecture is no less intriguing for its dynamic political economic and social life In this book Patricia Lee Rubin crosses the boundaries of all these areas to arrive at an original and comprehensive view of the place of images in Florentine society The author asks an array of questions Why were works of art made Who were the artists who made them and who commissioned them How did they look and how were they looked at She demonstrates that the answers to such questions illuminate the contexts in which works of art were created and how they were valued and viewed Rubin seeks out the meeting places of meaning in churches in palaces in piazzas places of exchange where identities were taken on and transformed often with the mediation of images She concentrates on questions of vision and visibility on seeing and being seen With a blend of exceptional illustrations close analyses of sacred and secular paintings by artists including Fra Angelico Fra Filippo Lippi Filippino Lippi and Botticelli and wide ranging bibliographic essays the book shines new light on fifteenth century Florence a special place that made beauty one of its defining features Renaissance Humanism, Volume 1 Albert Rabil, Jr.,2016-11-11 This book is a volume in the Penn Press Anniversary Collection To mark its 125th anniversary in 2015 the University of Pennsylvania Press rereleased more than 1 100 titles from Penn Press s distinguished backlist from 1899 1999 that had fallen out of print Spanning an entire century the Anniversary Collection offers peer reviewed scholarship in a wide range of subject areas

Dressing Renaissance Florence Carole Collier Frick,2005-07-20 As portraits private diaries and estate inventories make clear elite families of the Italian Renaissance were obsessed with fashion investing as much as forty percent of their fortunes on clothing In fact the most elaborate outfits of the period could cost more than a good sized farm out in the Mugello Yet despite its prominence in both daily life and the economy clothing has been largely overlooked in the rich historiography of Renaissance Italy In Dressing Renaissance Florence however Carole Collier Frick provides the first in depth study of the Renaissance fashion industry focusing on Florence a city founded on cloth a city of wool manufacturers finishers

and merchants of silk dyers brocade weavers pearl dealers and goldsmiths From the artisans who designed and assembled the outfits to the families who amassed fabulous wardrobes Frick's wide ranging and innovative interdisciplinary history explores the social and political implications of clothing in Renaissance Italy's most style conscious city Frick begins with a detailed account of the industry itself its organization within the guild structure of the city the specialized work done by male and female workers of differing social status the materials used and their sources and the garments and accessories produced She then shows how the driving force behind the growth of the industry was the elite families of Florence who in order to maintain their social standing and family honor made continuous purchases of clothing whether for everyday use or special occasions for their families and households And she concludes with an analysis of the clothes themselves what pieces made up an outfit how outfits differed for men women and children and what colors fabrics and design elements were popular Further and perhaps more basically she asks how we know what we know about Renaissance fashion and looks to both Florence's sumptuary laws which defined what could be worn on the streets and the depiction of contemporary clothing in Florentine art for the answer For Florence's elite appearance and display were intimately bound up with self identity

Dressing Renaissance Florence enables us to better understand the social and cultural milieu of Renaissance Italy **The Renaissance Portrait** Patricia Lee Rubin, 2011 Published in conjunction with an exhibition held at the Bode Museum Berlin Aug 25 Nov 20 2011 and at the Metropolitan Museum of Art New York Dec 21 2011 Mar 18 2012 **Constantinople and the West** Deno John Geanakoplos, 1989 Deno John Geanakoplos demonstrates the fusion of Byzantine and Latin cultural and ecclesiastical relations in the Renaissance **Bellini, Giorgione, Titian, and the Renaissance of Venetian Painting** David Alan Brown, Sylvia Ferino-Pagden, Jaynie Anderson, Deborah Howard, Kunsthistorisches Museum (Vienna), National Gallery of Art (U.S.), Kunsthistorisches Museum (Wenen), 2006-01-01 Presents a survey of sixty Venetian Renaissance paintings of the calibre of Bellini and Titian's Feast of the Gods in Washington and Giorgione's Laura and Three Philosophers in Vienna **The Florentine Profile Portrait in the Quattrocento** Jean Lipman, 1936* **A Renaissance Likeness** Loren W. Partridge, Randolph Starn, 1980-01-01 The theme of Renaissance individualism the roles of a Renaissance pope and the settings and functions of Renaissance portrait making are explored in the image of the papa terrible Cover p 4 *Art Patronage, Family, and Gender in Renaissance Florence* Maria DePrano, 2018-02-22 This book examines a Renaissance Florentine family's art patronage even for women inspired by literature music love loss and religion [The Expanding Discourse](#) Norma Broude, 2018-02-23 A sequel to the pioneering volume *Feminism and Art History Questioning the Litany* published in 1982 *The Expanding Discourse* contains 29 essays on artists and issues from the Renaissance to the present representing some of the best feminist art historical writing of the past decade Chronologically arranged the essays demonstrate the abundance diversity and main conceptual trends in recent feminist scholarship **The Early Modern Italian Domestic Interior, 1400-1700** Erin J. Campbell, Stephanie R. Miller, Elizabeth Carroll Consavari, 2016-03-23

Emphasizing on the one hand the reconstruction of the material culture of specific residences and on the other the way in which particular domestic objects reflect shape and mediate family values and relationships within the home this volume offers a distinct contribution to research on the early modern Italian domestic interior Though the essays mainly take an art historical approach the book is interdisciplinary in that it considers the social implications of domestic objects for family members of different genders age and rank as well as for visitors to the home By adopting a broad chronological framework that encompasses both Renaissance and Baroque Italy and by expanding the regional scope beyond Florence and Venice to include domestic interiors from less studied centers such as Urbino Ferrara and Bologna this collection offers genuinely new perspectives on the home in early modern Italy

Plutarch's Lives Noreen Humble, 2010-12-31 Plutarch's Parallel Lives were written to compare famous Greeks and Romans This most obvious aspect of their parallelism is frequently ignored in the drive to mine Plutarch for historical fact However the eleven contributors to the present volume who include most of the world's leading commentators on Plutarch together bring out many ways in which Plutarch invoked aspects of parallelism They show how pervasive and how central the whole notion was to his thinking With new analysis of the synkrisis with discussion of parallels within and across the Lives and in the Moralia with an examination of why the basic parallel structure of the Lives lost its importance in the Renaissance this volume presents fresh ideas on a neglected topic crucial to Plutarch's literary creation

Giotto the Painter. Volume 3: Survival Michael Viktor Schwarz, 2023-04-17 Giotto is considered by many to be the founder of modern painting This thesis is discussed and modified in the present volume on an empirical basis What emerges is that Giotto's impact cannot be reduced simply to the introduction of the study of nature Rather his art was involved in the development of pictorial idioms that were attuned to the skills and interests of their audiences The new approaches in his painting contributed in particular to the possibility of examining and communicating psychological narrative and allegorical content of great complexity outside the media of language and text which not only changed the face of European art but certainly contributed to the intellectual opening of Western societies

Giotto the Painter. Volume 1-3 Michael Viktor Schwarz, 2023-04-17 Vol 1 Life Giotto 1334 is the first European artist about whom it is possible to write following the schema of life and work The situation of the sources however is complicated On Giotto's life there are on the one hand biographical accounts from the mid fourteenth century onwards that responded to various ideological requirements patriotism humanism Renaissance ideology cult of the artist on the other there is extensive documentary material from Giotto's lifetime which seems to reflect less the biography of an artist than that of a bourgeois businessman resolutely climbing the social ladder The present volume focuses on this second aspect of the Giotto figure's double life relating it to the form of existence of the pre modern artist Vol 2 Works The paintings examined and contextualised in this volume are those secured for Giotto through early written sources These sources also help to reconstruct the sequence of his works and artistic inventions as is plausible in the context of media culture in the decades around and after 1300 while Giotto was spiritually

and intellectually formed in the sphere of the Florentine Dominicans his artistic path began in Rome in the shadow of the Curia The breakthrough to his own artistic concept came immediately before and during his work in Padua In addition to prominent churchmen ecclesiastical institutions and the King of Naples his clients were predominantly members of Italy's urban and financial elites The adoption and further development of his inventions by other especially Sienese painters pressured him in his later years to try new approaches again Vol 3 Survival Giotto is considered by many to be the founder of modern painting This thesis is discussed and modified in the present volume on an empirical basis What emerges is that Giotto's impact cannot be reduced simply to the introduction of the study of nature Rather his art was involved in the development of pictorial idioms that were attuned to the skills and interests of their audiences The new approaches in his painting contributed in particular to the possibility of examining and communicating psychological narrative and allegorical content of great complexity outside the media of language and text which not only changed the face of European art but certainly contributed to the intellectual opening of Western societies

Subject as Aporia in Early Modern Art Alexander Nagel, 2017-07-05 The studies in this volume focus on works of art that generate bafflement and that make that difficulty of reading part of their rhetorical structure These are works whose subjects are not easily identifiable or can be readily associated with more than one subject at the same time works that take a subject into a new genre or format pagan into Christian for example or vice versa and thus destabilize the subject itself works that concentrate on the marginal rather than the central episode and works that introduce elements of the preparatory phase the indeterminacy that are native to the sketch or drawing for example into the realm of finished works Unable to settle on a single reading the effort of interpretation doubles back on its own procedures This aporia according to Aristotle serves as the initial impulse to philosophical inquiry Although the works studied here are in many ways exceptional the aporias they raise register larger structural problems belonging to the artistic culture as a whole Between 1400 and 1700 we see the emergence of new formats new genres new subjects and new techniques as well as new venues for the display of art It is an implicit thesis of this book that the systemic shifts occurring in the early modern period made the emergence of aporetic works of art and of aporia as a problem for art a structural inevitability
