Portraits In Science:

Oxford Portraits in Science Set Professor Emeritus of Astronomy and History of Science Owen Gingerich, 1999-09
Oxford Portraits in Science is an ongoing series of scientific biographies for young adults. Written by top scholars and writers, each biography examines the personality of its subject as well as the thought process leading to his or her discoveries. These richly illustrated books combine accessible technical information with compelling personal stories to portray the scientists whose work has shaped our understanding of the natural world. Defining Features L. J. Jordanova, 2000-05. Portraiture as a genre is receiving increased attention at the same time as public curiosity about science is reaching unprecedented levels. Published to coincide with a major exhibition at the National Portrait Gallery London and the Sainsbury Centre for Visual Arts, University of East Anglia, Defining Features reflects on the nature of the relationships between art, science, medicine, and technology by focusing on a selection of portraits that spans more than three centuries. P 4 of cover. **Oxford Portraits in Science** Owen Gingerich, Professor Emeritus of Astronomy and History of Science Owen Gingerich, 1999-05-06. **Portraits in Science**, 1994. Twelve of Australia's leading scientists speak about their lives and their work. They convey the variety, excitement, and accomplishment of science; explore its processes and reveal its challenges. Together, their informal stories illuminate a remarkable landscape of science in Australia and shed fascinating light on the formative influences that have shaped these men and women towards a life in science. Portraits of Pioneers in Psychology Donald A. Dewsbury, Ludy T. Benjamin, Jr., Michael Wertheimer, 2014-06-03. This sixth book in the Portraits of Pioneers in Psychology Series preserves the diversity that has characterized earlier volumes as it brings to life psychologists who have made substantial contributions to the field of the history of psychology. These chapters illustrate the pioneering endeavors of such significant figures and are written in a lively, engaging style by authors who themselves have achieved a reputation as excellent scholars in the history of psychology. Several of the chapters are based on the author's personal acquaintance with a pioneer, and new, previously unavailable information about these luminaries is presented in this volume. Each of these volumes provides glimpses into the personal and scholarly lives of 20 giants in the history of psychology. Prominent scholars provide chapters on a pioneer who made important contributions in their own area of expertise. A special section in each volume provides portraits of the editors and authors, containing interesting information about the relationship between the pioneers and the psychologists who describe them. Utilizing an informal, personal, sometimes humorous style of writing, the books will appeal to students and instructors interested in the history of psychology. Each of the six volumes in this series contains different profiles, thereby bringing more than 120 of the pioneers in psychology more vividly to life. **Science & the Portrait** National Portrait Gallery (Great Britain), Susan Morris, 1997. *Portraits of Founders of Electrical Science from Gilbert to Henry*, **Kant's Prolegomena, and Metaphysical Foundations of Natural Science** Ernest Belfort Bax, Immanuel Kant, 2024-01-09.
