Secular Buildings In The Crusader Kingdom Of Jerusalem An Archaeological Gazetteer:

Secular Buildings in the Crusader Kingdom of Jerusalem Denys Pringle, 1997-12-11 A descriptive gazetteer of all the secular buildings known to have existed within the Crusader Kingdom of Jerusalem

The Conquest of the Holy Land by Salāḥ al-Dīn Keagan Brewer, James Kane, 2019-04-25 The *Libellus de expugnatione Terrae Sanctae per Saladinum* or Little Book about the Conquest of the Holy Land by al al D n is the most substantial contemporary Latin account of the conquest of the Kingdom of Jerusalem in 1187. Seemingly written by a churchman who was in Jerusalem itself when the city was besieged and captured, the *Libellus* fuses historical narrative and biblical exegesis in an attempt to recount and interpret the loss of the Holy Land, an event that provoked an outpouring of grief throughout western Christendom and sparked the Third Crusade. This book provides an English translation of the *Libellus* accompanied by a new comprehensive critical edition of the Latin text and a detailed study in the introduction.

The Crusades and Visual Culture Laura J. Whatley, 2017-07-05 The crusades, whether realized or merely planned, had a profound impact on medieval and early modern societies. Numerous scholars in the fields of history and literature have explored the influence of crusading ideas, values, aspirations, and anxieties in both the Latin States and Europe. However, there have been few studies dedicated to investigating how the crusading movement influenced and was reflected in medieval visual cultures. Written by scholars from around the world working in the domains of art history and history, the essays in this volume examine the ways in which ideas of crusading were realized in a broad variety of media, including manuscripts, cartography, sculpture, mural paintings, and metalwork. Arguing implicitly for recognition of the conceptual frameworks of crusades that transcend traditional disciplinary boundaries, the volume explores the pervasive influence and diverse expression of the crusading movement from the twelfth through the fifteenth centuries.

Medieval Warfare 1000-1300 John France, 2017-05-15 The study of medieval warfare has developed enormously in recent years. The figure of the armoured mounted knight, who was believed to have materialized in Carolingian times, long dominated all discussion of the subject. It is now understood that the knight emerged over a long period of time and that he was never alone on the field of conflict. Infantry at all times played a substantial role in conflict, and the notion that they were in some way invented only in the fourteenth century is no longer sustainable. Moreover, modern writers have examined campaigns which for long seemed pointless because they did not lead to spectacular events like battles. As a result, we now understand the pattern of medieval war, which often did not depend on battle but on exerting pressure on the opponent by economic warfare. This pattern was intensified by the existence of castles, and careful study has revealed much about their development and the evolving means of attacking them. Crusading warfare pitted westerners against a novel style of war and affords an opportunity to assess the military effectiveness of European methods. New areas of study are now developing. The logistics of medieval armies was always badly neglected, while until very recently there was a silence on the victims of war. Assembled in this volume are 31 papers which represent milestones in the development of the new ideas about medieval warfare set in

context by an introductory essay **Western Warfare In The Age Of The Crusades, 1000-1300** John France,2020-09-16 In 1095 the First Crusade was launched establishing a great military endeavour which was a central preoccupation of Europeans until the end of the thirteenth century In Western warfare in the age of the Crusades 1000 1300 John France offers a wide ranging and challenging survey of war and warfare and its place in the development of European Society culture and economy in the period of the Crusades Placing the crusades in a wider context this book brings together the wealth of recent scholarly research on such issues as knighthood siege warfare chivalry and fortifications into an accessible form Western warfare in the age of the Crusades 1000 1300 examines the nature of war in the period 1000 1300 and argues that it was primarily shaped by the people who conducted war the landowners John France illuminates the role of property concerns in producing the characteristic instruments of war the castle and the knight This authoritative study details the way in which war was fought and the reasons for it as well as reflecting on the society which produced the crusades **The Southern Transjordan Edomite Plateau and the Dead Sea Rift Valley** Burton MacDonald,2015-03-12 Burton MacDonald presents an in depth study of the archaeology and history of human presence over the past five six thousand years in the southern segment of the Transjordan Edomite Plateau and the Dead Sea Rift Valley to the west The evidence from archaeology for the area spans the entire period though the time for which literary evidence is available is only the past 4000 years from the Middle Bronze Age 2000 1550 BC Once literary evidence is available however it complements the archaeological record and as can be amply demonstrated the written records can be clarified only through the archaeological data These two sources are thus used to describe environments resources industries settlement patterns and the lifestyles of the inhabitants of this pivotal region The result is a story of the people who lived in the area from the Bronze Age through the Islamic period What is evident is that there were differences in certain archaeological periods in settlement patterns as well as lifestyles between those who lived on the southern segment of the Plateau and those who lived in the Dead Sea Rift Valley or in the lowlands immediately to the west Moreover it is obvious that when there were periods of trade and industry for example the spice trade and copper mining and processing the population of the area was higher Stable governance brought about growth in population and prosperity But other factors also played their part in these ebbs and flows of population climatic fluctuations affecting the availability of water and arable land the development and adoption of new technologies in farming practices raw material extraction and industrial methods processes and transportation and political change resulting in periods of relative stability and instability in government **The Templars** Jochen Burgtorf,Shlomo Lotan,Enric Mallorquí-Ruscalleda,2021-04-14 As the oldest of the military religious orders and the one with an unexpected and dramatic downfall the knighthood of the Templars continues to fascinate academics and students as well as the public at large A collection of fifteen chapters accompanied by a historical introduction The Templars The Rise Fall and Legacy of a Military Religious Order recounts and analyzes this community s rise and establishment in both the crusader states of the eastern

Mediterranean and the countries of western Europe during the twelfth and thirteenth centuries reflects on the proceedings launched against it and its subsequent fall 1307 1314 and explores its medieval and post medieval legacy including an assessment of current research pertaining to the Templars and suggestions for future explorations Showcasing a wide range of methodological approaches and primary source materials this volume unites historical art historical theological archaeological and historiographical perspectives and it features the work and voices of scholars from various academic generations who reside in eight different countries Israel France Italy Spain the United Kingdom Germany Poland and the United States of America

Eastern Medieval Architecture Robert G. Ousterhout, 2019-08-26 Aside from Hagia Sophia the monuments of the Byzantine East are poorly understood today This is in sharp contrast to the well known architectural marvels of Western Europe s Middle Ages In this landmark survey distinguished art historian Robert Ousterhout introduces readers to the rich and diverse architectural traditions of the medieval Eastern Mediterranean The focus of the book is the Byzantine or East Roman Empire 324 1453 CE with its capital in Constantinople although the framework expands chronologically to include the foundations of Christian architecture in Late Antiquity and the legacy of Byzantine culture after the fall of Constantinople in 1453 Geographically broad as well this study includes architectural developments in areas of Italy the Caucasus the Near East the Balkans and Russia as well as related developments in early Islamic architecture Alternating chapters that address chronological or regionally based developments with thematic studies that focus on the larger cultural concerns the book presents the architectural developments in a way that makes them accessible interesting and intellectually stimulating In doing so it also explains why medieval architecture in the East followed such a different trajectory from that of the West Lavishly illustrated with hundreds of color photographs maps and line drawings Eastern Medieval Architecture will establish Byzantine traditions to be as significant and admirable as those more familiar examples in Western Europe and serve as an invaluable resource for anyone interested in architectural history Byzantium and the Middle Ages

Archaeology and Architecture of the Military Orders Mathias Piana, Christer Carlsson, 2016-04-08 As elite communities in medieval societies the Military Orders were driven by the ambition to develop built environments that fulfilled monastic needs as well as military requirements and in addition residential and representational purposes Growing affluence and an international orientation provided a wide range of development potential That this potential was in fact exploited may be exemplified by the advanced fortifications erected by Templars and Hospitallers in the Levant Although the history of the Military Orders has been the subject of research for a long time their material legacy has attracted less attention In recent years however a vast range of topics concerning the Orders building activities has become the object of investigation primarily with the help of archaeology They comprise the choice of sites and building materials provision and storage of food and water aspects of the daily life the design and layout of commanderies churches and fortifications their spatial arrangement and the role these buildings played in their environmental context This volume contains ten articles

discussing the archaeology and architecture of buildings erected by the three major Military Orders in different geographical regions They cover most countries of Western Europe and include a number of important fortifications in the Levant These studies break new ground in the investigation of the built fabric of the Military Orders Written by noted international scholars this publication is an important contribution to modern research on these institutions which in their association of monasticism and knighthood were so typical for the Middle Ages *The Military Orders Volume VII* Nicholas Morton,2019-08-05 The Military Orders essay collections arising from the quadrennial conferences held at Clerkenwell in London have come to represent an international point of reference for scholars This present volume brings together twenty nine papers given at the seventh iteration of this event The studies offered here cover regions as disparate as Prussia Iberia and the Eastern Mediterranean and chronologically span topics from the Twelfth to the Twentieth century They draw attention to little used textual and non textual sources advance challenging new methodologies and help to place these military religious institutions in a broader context
