Aitken,1993 **Sedimentary Cover of the Craton in Canada** D.F. Stott,J.D. Aitken,1993 The early chapters of the volume present data and interpretations of the geophysics of the craton and summarise with sequential maps the tectonic evolution of the craton The main body of the text and accompanying plates and figures present the stratigraphy structural history and economic geology of specific sedimentary basins and regions The volume concludes with a summary chapter in which the currently popular theories of cratonic tectonics are discussed and the unresolved questions are identified *Sedimentary Cover of the Craton* ,1987 [The Sedimentary Basins of the United States and Canada](#) Andrew Miall,2008-12-03 In recent years there have been rapid strides in our understanding of plate tectonic processes many developments in methods of basin analysis and the accumulation of much new surface and subsurface geological and geophysical data Projects such as COCORP in the United States and Lithoprobe in Canada have provided essential insights into the deep crustal structure of the continent Synthesis of all the available information about North America s geological regions has not been attempted systematically since the Decade of North American Geology project undertaken by the Geological Society of America and the Geological Survey of Canada nearly twenty years ago The book commences with a summary of the Phanerozoic geological history of the United States and Canada illustrated with a suite of new paleogeographic maps and tying in each of the subsequent regional chapters by the inclusion of numerous cross references This followed by a set of fifteen regional syntheses of the principal tectonic regions of the United States and Canada focusing on the stratigraphic and tectonic history of the major sedimentary basins Most of these chapters have been contributed by specialists drawing on their own research and providing interpretive summaries of a type not previously attempted Up to date synthesis of the sedimentary tectonic history of the major areas of the United States and Canada Up to date references Many new color maps **Basement and Basins of Eastern North America** Ben A. Geological Survey of Canada, Open File 4679 , **Geology of North America—An Overview** Albert W. Bally, Allison R. Palmer, 1989 Summaries of the major features of the geology of North America and the adjacent oceanic regions are presented in 20 chapters Topics covered include concise reviews of current thinking about Precambrian basement Phanerozoic orogens cratonic basins passive margin geology of the Atlantic and Gulf Coast regions marine and terrestrial geology of the Caribbean region and economic geology Fission-Track Thermochronology and its Application to Geology Marco G. Malusà, Paul G. Fitzgerald, 2018-07-14 This book is focused on the basics of applying thermochronology to geological and tectonic problems with the emphasis on fission track thermochronology It is conceived for relatively new practitioners to thermochronology as well as scientists experienced in the various methods The book is structured in two parts Part I is devoted to the fundamentals of the fission track method to its integration with other geochronologic methods and to the basic principles of statistics for fission track dating and sedimentology applied to detrital thermochronology Part I also includes the historical development of the technique and thoughts on future directions Part II is devoted to the geological interpretation of the thermochronologic record The thermal frame of reference and the different approaches for the interpretation of fission track data within a geological framework of both basement and detrital studies are discussed in detail Separate chapters demonstrate the application of fission track thermochronology from various perspectives e g tectonics petrology stratigraphy hydrocarbon exploration geomorphology with other chapters on the application to basement rocks in orogens passive continental margins and cratonic interiors as well as various applications of detrital thermochronology Geological Survey of Canada, Current Research (Online) no. 2002-A5 , **Geological Survey of Canada, Open File 2780** , Geological Survey of Canada, Open File 6174 , Geological Survey of Canada, Current Research (Online) no. 2000-E1 L. N. Nadjawong, D. W. Morrow, M.
