The Custodians of Biodiversity Manuel Ruiz, Ronnie Vernooy, 2012-03-15 Globally local and indigenous approaches to conserving biodiversity crop improvement and managing precious natural resources are under threat Many communities have to deal with biopiracy for example As well existing laws are usually unsuitable for protecting indigenous and traditional knowledge and for recognizing collective rights such as in cases of participatory plant breeding where farmers researchers and others join forces to improve existing crop varieties or develop new ones based on shared knowledge and resources This book addresses these issues It outlines the national and international policy processes that are currently underway to protect local genetic resources and related traditional knowledge and the challenges these initiatives have faced In particular these themes are addressed within the context of the Convention of Biological Diversity and the International Treaty on Plant Genetic Resources for Food and Agriculture The authors broaden the policy and legal debates beyond the sphere of policy experts to include the knowledge holders themselves These are the custodians of biodiversity farmers herders and fishers in local

communities Their experience in sharing access and benefits to genetic resources is shown to be crucial for the development of effective national and international agreements The book presents and analyzes this experience including case studies from China Cuba Honduras Jordan Nepal Peru and Syria Copublished with the International Development Research Centre IDRC **Challenges and Opportunities for Organic Agriculture and the Seed Industry** Arturo Martinez,2004

Organic Farming, Prototype for Sustainable Agricultures Stéphane Bellon, Servane Penvern,2014-04-23

Stakeholders show a growing interest for organic food and farming OF F which becomes a societal component Rather than questioning whether OF F outperforms conventional agriculture or not the main question addressed in this book is how and in what conditions OF F may be considered as a prototype towards sustainable agricultures The book gathers 25 papers introduced in a first chapter The first section investigates OF F production processes and its capacity to benefit from the systems functioning to achieve higher self sufficiency The second one proposes an overview of organic performances providing commodities and public goods The third one focuses on organics development pathways within agri food systems and territories As well as a strong theoretical component this book provides an overview of the new challenges for research and development It questions the benefits as well as knowledge gaps with a particular emphasis on bottlenecks and lock in effects at various levels **Community Seed Banks** Ronnie Vernooy, Pitambar Shrestha, Bhuwon Sthapit,2015-05-15

Community seed banks first appeared towards the end of the 1980s established with the support of international and national non governmental organizations This book is the first to provide a global review of their development and includes a wide range of case studies Countries that pioneered various types of community seed banks include Bangladesh Brazil Ethiopia India Nepal Nicaragua the Philippines and Zimbabwe In the North a particular type of community seed bank emerged known as a seed savers network Such networks were first established in Australia Canada the UK and the USA before spreading to other countries Over time the number and diversity of seed banks has grown In Nepal for example there are now more than 100 self described community seed banks whose functions range from pure conservation to commercial seed production In Brazil community seed banks operate in various regions of the country Surprisingly despite 25 years of history and the rapid growth in number organizational diversity and geographical coverage of community seed banks recognition of their roles and contributions has remained scanty The book reviews their history evolution experiences successes and failures and reasons why challenges and prospects It fills a significant gap in the literature on agricultural biodiversity and conservation and their contribution to food sovereignty and security
