Seeking Growth Financial Volatility:

Economic Growth with Equity José Luis Machinea, 2006-11-28 This book analyses the development challenge faced by Latin America at a time at which the concerns for the large inequality in the region are at a peak This volume focuses on growth with equity and is written by an outstanding group of Latin American and international researchers and policy makers

Reforming Latin America's Economies Ricardo Ffrench-Davis, 2005-09-30 Provides a comprehensive analysis of why reforms in Latin America have failed in achieving growth and equity The book focuses on three strategic areas of reforms of the Washington Consensus Macroeconomics Trade and Finance

Advancing Regional Monetary Cooperation L. Mühlich, 2014-08-29 This book examines regional monetary cooperation as a strategy to enhance macroeconomic stability in developing countries and emerging markets Interdisciplinary case studies on Southern Africa Southeast Asia and South America provide a cross regional perspective on the viability of such strategy

Setbacks and Advances in the Modern Latin American Economy Pablo A. Baisotti, 2021-12-30 This volume explores several notable themes related to the economy in Latin America and offers insightful historical perspectives to understand national regional and global issues in the continent since the beginning of the 20th century to the present day The collected essays focus on economic crises the relationship of growth models to society and politics the fluctuations of local economies and regional protests Other aspects of consideration in this area include the evolution of integrated regional trading blocs the informal economy and the destruction of the productive potential that has had a serious social cultural and environmental impact The volume refuses to impose a traditional and uncritical linear historical narrative onto the reader and instead proposes an alternative interpretation of the past and its relation to the present

Regional Financial Cooperation Jose Antonio Ocampo, 2007-08-29 A Brookings Institution Press and Economic Commission for Latin America and the Caribbean ECLAC publication Using the experience of postwar Western Europe as a benchmark Jos Antonio Ocampo and his colleagues assess how regional financial institutions can help developing countries often at a disadvantage within the global financial framework finance their investment needs counteract the volatility of private capital flows and make their voices heard The 1997 Asian financial crisis generated extensive debate on the international financial architecture Through this discussion it became clear that services by financial institutions including adequate mechanisms for preventing and managing financial crises and instruments for safeguarding global macroeconomic and financial stability are undersupplied Furthermore private international capital markets provide finance to developing countries in a way that effectively reduces the ability of those nations to undertake countercyclical macroeconomic policies International capital markets ration out many developing countries particularly the poorest from private global capital markets While these deficiencies in the financial architecture are clear the post 1997 debate has done little to evaluate the role that regional institutions could play in improving global financial arrangements Regional Financial Cooperation aims to fill that important gap Contributors include Ernest Aryeetey

Macroeconomics and Development Mario Damill, Martín Rapetti, Guillermo Rozenwurcel, 2016-03-15 Latin American neo structuralism is a cutting edge regionally focused economic theory with broad implications for macroeconomics and development economics Roberto Frenkel has spent five decades developing the theory's core arguments and expanding their application throughout the discipline revolutionizing our understanding of high inflation and hyperinflation disinflation programs and the behavior of foreign exchange markets as well as financial and currency crises in emerging economies The essays in this collection assess Latin American neo structuralism's theoretical contributions and viability as the world's economies evolve The authors discuss Frenkel's work in relation to pricing decisions inflation and stabilization policy development and income distribution in Latin America and macroeconomic policy for economic growth An entire section focuses on finance and crisis and the volume concludes with a neo structuralist analysis of general aspects of economic development For those seeking a comprehensive introduction to contemporary Latin American economic thought this collection not only explicates the intricate work of one of its greatest practitioners but also demonstrates its impact on the growth of economics *The Palgrave Handbook of Development Economics* Machiko Nissanke, José Antonio

Ocampo, 2019-08-12 This Handbook responds to the needs and aspirations of current and future generations of development economists by providing critical reference material alongside or in relation to mainstream propositions Despite the potential of globalisation in accelerating growth and development in low and middle income countries through the spread of technology knowledge and information its current practice in many parts of the world has led to processes that are socially economically and politically and ecologically unsustainable It is critical for development economists to engage with the pivotal question of how to change the nature and course of globalisation to make it work for inclusive and sustainable development Applying a critical and pluralistic approach the chapters in this Handbook examine economics of development paths under globalisation focusing on sustainable development in social environmental institutional and political economy dimensions It aims at advancing the frontier of development economics in these key aspects and generating more refined policy perspectives It is critically reflective in examining effects of globalisation on development paths to date and in terms of methodological and analytical approaches as well as forward thinking in policy perspectives with a view to laying a foundation for sustainable development **The Gains and Pains of Financial Integration and Trade Liberalization**
