The Seirin Pictorial Atlas of Acupuncture

Yu-Lin Lian, 2000 The SEIRIN pictorial atlas of acupuncture is a new kind of manual. It illustrates the whole range of acupuncture points and main channels, the extraordinary vessels Ren Mai and Du Mai and the extraordinary points in a systematic and clear way. Each of the 409 important points is clarified through a series of three different illustrations: a graphic indicates location on the body, an overview of channels illustrates the point in the context of its pathway, a photograph shows the acupuncture needle in position. By combining Chinese sources with the authors' experience in therapy, this book features a sensible balance between the most important indications and practical needs. The names, properties and applications of the individual acupuncture points were then revised on this basis. The team of Chinese and German authors creates a bridge between Asian and western views of acupuncture. This acupuncture atlas not only provides beginners with an overview of the most important acupuncture points but experienced practitioners can also learn about seldom used acupuncture points and thus extend their knowledge. Shiatsu practitioners share knowledge and insights gained over thirty years of clinical practice and teaching to create a book they themselves would have wanted to provide practical guidance and philosophical perspective on this healing art. The book's central themes are awareness, intuition, and intention in the practice of Shiatsu, and how this body-mind perspective can influence the wider health debate. A modern rendering of the ancient wisdom underpinning Shiatsu and Oriental medicine, this book goes beyond the technical details of Shiatsu as a specific therapy to the universal principles underlying it. Presenting Shiatsu from different perspectives ranging from its philosophical underpinnings to the realities of daily practice, this text represents the fruit of the knowledge we apply and continually re-evaluate in our ongoing clinical work. The question-and-answer format is based upon classical tradition, the most famous text within traditional Oriental medicine. Huang Di Nei Jing uses this method to illustrate complex ideas in an easy-to-read manner. The text is organically formed through questions formulated by our student and fellow practitioner Filippa Freed. These questions, stemming from her training and practice, facilitate a broad discussion that roams freely between technical principles, case studies, and informal anecdotes.

Clinically useful combinations are presented throughout, along with case studies showing the application of theory to practice.
