Religion at Work in Globalised Traditions Anders Kaliff, 2014-03-26 Why do traditions disappear How is the disappearance of tradition also a vehicle for social change and re inventions of practices and new traditions Using case studies from one Sukuma area along the southern shores of Lake Victoria in Tanzania global processes of how religions work in practice are analysed by focusing on rainmaking witchcraft and Christianity Traditionally

Sukuma society was culturally and cosmologically structured around the chief the ancestors and rainmaking Everything was dependent upon the rain Rainmaking as a ritual practice has disappeared and ancestral propitiations are declining while at the same time Christianity is spreading and witchcraft and witch killings are increasing Although Christianity as a religion may provide answers and hopes for life after death the religion provides few solutions in the here and now when it comes to poverty and suffering problems and challenges that have to be solved Witchcraft on the other hand does or is believed to do so and the increase in witchcraft is analysed in relation to the impacts of more than a century of globalisation from the missionaries and colonizers onwards With the declining ancestral tradition witchcraft and Christianity as religious practices supplement each other in the ways they are believed to work in providing answers solutions or divine interferences in different realms this world and the Otherworld Offering an approach going beyond structural functionalism on different premises the book s focus on religion at work will facilitate new understandings of how to study religion as it is perceived and believed in practice

Roots in the African Dust Michael Mortimore,1998-09-17 The image of Africa in the modern world has come to be shaped by perceptions of the drylands and their problems of poverty drought degradation and famine Michael Mortimore offers an alternative and revisionist thesis dismissing on theoretical and empirical grounds the conventional view of runaway desertification driven by population growth and inappropriate land use In its place he suggests a more optimistic model of sustainable land use based on researched case studies from East and West Africa where indigenous technological adaptation has put population growth and market opportunities to advantage He also proposes a more appropriate set of policy priorities to support dryland peoples in their efforts to sustain land and livelihoods The result is a remarkably clear synthesis of much of the best work that has emerged over past years

Forest Succession D. C. West,H. H. Shugart,D. F. Botkin,2012-12-06 Succession nothing in plant community or ecosystem ecology has been so elaborated by terminology so much reviewed and yet so much the center of controversy In a general sense every ecologist uses the concept in teaching and research but no two ecologists seem to have a unified concept of the details of succession The word was used by Thoreau to describe from a naturalist s point of view the general changes observed during the transition of an old field to a forest As data accumulated a lengthy taxonomy of succession developed around early twentieth century ecologists such as Cooper Clements and Gleason Now nearer the end of the century and after much discussion concerning the nature of

vegetation communities where do ecologists stand with respect to knowledge of ecological succession The intent of this book is not to rehash classic philosophies of succession that have emerged through the past several decades of study but to provide a forum for ecologists to present their current research and present day interpretation of data To this end we brought together a group of scientists currently studying terrestrial plant succession who represent research experience in a broad spectrum of different ecosystem types The results of that meeting led to this book which presents to the reader a unique summary of contemporary research on forest succession
