A Look at Comets Ray Spangenburg, Kit Moser, Diane Moser, 2003 A comprehensive look at comets from man's earliest observations of hairy stars to recent sightings of Comet Shoemaker Levy 9 and Halle Bopp to future space missions to study comets in the outer solar system

COMETS! David J. Eicher, 2013-09-23 Practical guide to the history and science of comets including techniques and tips on how to observe and image them

Visually Observing Comets David A. J. Seargent, 2017-03-15 In these days of computers and CCD cameras visual comet observers can still contribute scientifically useful data with the help of this handy reference for use in the field Comets are one of the principal areas for productive pro amateur collaboration in astronomy but finding comets requires a different approach than the observing of more predictable targets Principally directed toward amateur astronomers who prefer visual observing or who are interested in discovering a new comet or visually monitoring the behavior of known comets it includes all the advice needed to thrive as a comet observer After presenting a brief overview of the nature of comets and how we came to the modern understanding of comets this book details the various types of observations that can usefully be carried out at the eyepiece of a telescope Subjects range from how to search for new comets to visually estimating the brightness of comets and the length and orientation of tails in addition to what to look for in comet heads and tails Details are also given of 20 periodic comets predicted to return between the years 2017 and 2027 that are expected to become suitable targets for visual observing in addition to information on a famous comet potentially visible each year and subject to great outbursts of brightness

Comets Betsy Rathburn, 2019-08-01 What has a nucleus coma and two tails Why a comet of course The wonder and mystery of comets has excited humans for centuries and they continue to provide valuable information about the solar system and the creation of the galaxy This title will introduce striving readers to comets with thought provoking information fascinating facts and engaging images

Comets Kristen Rajczak Nelson, 2012-08-01 Readers are introduced to how comets move and form Famous comets such as Halley's comet are highlighted throughout the text Fun fact boxes accompany science content detailed in age appropriate language Enhanced by full color photographs of these incredible light shows and helpful scientific diagrams this book brings these comets to Earth for readers to enjoy

The Cosmos Jay M. Pasachoff, Alex Filippenko, 2014 An exciting introduction to astronomy using recent discoveries and stunning photography to inspire non science majors about the Universe and science

The Ghost in the Telescope Stephen Eales, 2025-08-07 The Ghost in the Telescope is an insider's account of the Herschel Space Observatory which was launched to answer two of the biggest questions in astronomy How were the stars and galaxies born Written in an engaging manner for a general audience this book tells the stories of the telescope itself the discoveries it made and the engineers and astronomers who built and used it This book based on the author's own experience and interviews with the key astronomers and engineers tells the story of the mission from its original concept on a piece of paper in Venice to the moment after the end of the mission when the engineers had to decide

whether to crash the spacecraft into the Moon Containing some of the most spectacular pictures ever taken of the universe this book describes all the major discoveries made with the telescope It also gives an account accessible to anyone without previous scientific knowledge of the latest research into the births of stars and galaxies This book may interest anyone who is curious about astronomy space missions and how astronomy is done in practice It is designed to be easy to read and does not require any previous scientific background

Comets and Meteors Stiefel,2014-08-01 In *Comets and Meteors* Shooting through Space readers will learn how the celestial wonders known as comets and meteors travel through space and their effects on Earth Filled with fun facts young learners will love exploring the scientific information and drawing conclusions about life now and in the future The Inside Outer Space series takes readers on an intergalactic journey that unravels the mysteries of the universe Each 24 page book informs readers in grades K 3 on the Sun Earth planets and stars while also igniting imaginations about the unknown Stunning photographs and diagrams engage readers while text based questions aid in reading comprehension

Physics Of Comets (2nd Edition) K S Krishna Swamy,1997-05-03 The study of Comet Halley in 1986 was a tremendous success for cometary science In March of that year six spacecrafts passed through Comet Halley as close as 600 km from the nucleus and made the in situ measurements of various kinds These space missions to Comet Halley and that of the ICE spacecraft to Comet Giacobini Zinner combined with studies both ground based and above the atmosphere have increased our knowledge of cometary science in a dramatic way This new edition of *Physics of Comets* incorporates these new and exciting findings The emphasis of the book is on the physical processes operating in a cometary environment It discusses up to date observations methods and results based on the study of various comets The subject is developed in a systematic manner covering various aspects of cometary phenomena This book may serve as a text book for students and as reference material for researchers

Catalog of Unconfirmed Comets - Volume 2 Gary W. Kronk, Maik Meyer,2024-05-30 This two volume catalog is the first in depth investigation of comets that were reported since the 17th century but not confirmed and subsequently lost Volume 2 covers objects observed between 1900 and the present a period that was dominated by photographic observations and the detection of much fainter objects This book provides a distinctive blend of the historical and cultural aspects of comet hunting and discovery along with the utilization of contemporary tools in orbital mechanics and data analysis This comprehensive compilation offers a thorough catalog of unconfirmed comets Each case encompasses a detailed presentation of observations a discussion on the observer when feasible an examination of the historical context and a conclusive analysis of the object s nature The book predominantly showcases original material and photographs sourced from observatories libraries and historical societies worldwide exposing a significant number of illustrations that have never been previously published While some of these unconfirmed comets were determined to be misidentifications of minor planets artifacts caused by emulsion or optical effects or inaccurate observations of comets that were already under observation the Authors did manage to identify numerous objects that were likely genuine comets These

observations hold potential value for the future as they could be observations of periodic comets yet to be formally identified. In a handful of instances the Authors were also able to find new observations which led to the calculation of orbits for the first time enabling a formal announcement or identifying suspected comets that were already known to be periodic comets.

Catalog of Unconfirmed Comets - Volume 1 Gary W. Kronk, Maik Meyer, 2023-05-09. This catalog is the first in depth investigation of comets that were reported since the 17th century but not confirmed and subsequently lost. Volume I of this two volume work covers objects observed between 1600 and 1899, a period that was dominated by visual observations and was experiencing a rapid evolution in science. The book uniquely combines the history and culture of comet hunting and discovery with modern tools of orbital mechanics to present a wholesome catalog of unconfirmed and suspected comets. Each case includes a presentation of the observations, a discussion about the observer, when possible, consideration of the historic context, and a conclusion as to the nature of the object. In most cases, the book presents material from original sources including some never before published that were acquired from observatories, libraries, and historical societies around the world. Although some of these unconfirmed comets turned out to be misidentifications of planets or star clusters, fabrications, or poor observations of comets that were already being observed, the Authors did identify many objects that were likely real comets. In some cases, the Authors were even able to derive orbits for the first time. These observations may be valuable in the future as they could prove to be observations of periodic comets still to be discovered.

Visions of the Cosmos Carolyn Collins Petersen, John C. Brandt, 2003-11-20. This spectacularly illustrated book is a comprehensive exploration of astronomy through the eyes of the world's observatories and spacecraft missions. Featuring the latest and most stunning images, it provides a magnificent picture of the beauty of the cosmos. The accompanying text is an accessible guide to the science behind the wonders and includes clear explanations of all the major themes in astronomy. An essential guide to understanding and appreciating the Universe, *Visions of the Cosmos* builds on the success of the authors' previous book *Hubble Vision*, which became an international best seller and won world wide acclaim. Carolyn Collins Petersen is a science journalist and creator of educational materials for astronomy. She is the former Editor of Books Products at Sky Publishing Corporation and served as Editor of *SkyWatch* and Associate Editor of *Sky Telescope* magazines. Petersen is the lead author of the book *Hubble Vision*, first published in 1995 by Cambridge University Press and co-written with Dr. John C. Brandt. She is also co-editor with J. Kelly Beatty and Andrew Chaikin of *The New Solar System*, fourth edition, co-published by Sky Publishing Corporation and Cambridge University Press. John C. Brandt has held positions as a research scientist, teacher, and administrator and is currently an adjunct professor of physics and astronomy at the University of New Mexico. He served for 20 years as Chief of a major NASA scientific laboratory and was the Principal Investigator for the Goddard High Resolution Spectrograph on the Hubble Space Telescope. John received the NASA Medal for Exceptional Scientific Achievement in 1978 and 1992 and has had a minor planet formally named after him, 3503 Brandt, for his fundamental contributions to understanding of the solar system.
