Chambers, 2013-03-14 This book is about the teaching and study of the humanities in our universities It addresses humanities educators whose job it is to teach undergraduate students researchers into the processes of teaching and learning involved and higher education policy makers The book aims to stimulate discussion among them of the proper purposes processes and outcomes of this form of education And in the process it aims to help define and develop the new field of Arts and Humanities Higher Education AHHE In the humanities as in other academic domains of higher education a public discourse of teaching and of students learning is presently underdeveloped This may seem surprising given the long history of the university as an institution and the huge resources devoted to higher education in many countries but there are of course reasons for it First until very recently there has been no profession of teacher education focused on the academy Simply academics have needed neither training nor qualification as teachers of their subject so that no one has been required to make teacher education their business or teaching learning in 2 higher education their special field of interest As regards schooling the The label Arts and Humanities Higher Education reflects the fact that the humanities subjects Classics Cultural Studies History Art History European Studies Languages Literature Philosophy Religious Studies etc are usually taught in the Faculty of Arts in UK universities The book does not include discussion of the fine or performing arts except incidentally      *The Writings of James Russell Lowell ...: Literary essays* James Russell Lowell, 1890      **Literary Essays** James Russell Lowell, 1890      **The Writings of James Russell Lowell: Literary essays** Lowell, 1890      *Journal of the American Society for Psychical Research* American Society for Psychical Research, 1918 List of members in v 1 6 12      **A.M.F. Essays in Phenomenology Maurice Natanson, 2013-12-19 Fifteen years ago Dorion Cairns concluded an article on phenomenology with a cautious appraisal of its influence in America. Thus far he wrote it continues to be an exotic. The situation today has changed. Translations of the writings of Husserl, Heidegger, Marcel Sartre, and Merleau-Ponty have appeared, and commentaries on these and related thinkers are not uncommon. Moreover, discussion of phenomenological problems is increasingly becoming part of the American, if not the British, philosophical scene. Phenomenology is in danger of domestication. Signs of its accommodation include a willingness to pay tribute to Husserl's *Logical Investigations* by those who find relatively little to interest them in his later work; a location of what are taken to be common themes and underlying convergences of emphasis in Continental phenomenology and Anglo-American philosophy of the more nearly Wittgensteinian and Austinian varieties; and a growing impatience shared by some phenomenologists with expositions, explications, and interpretations of Husserl's work at the expense of original applications of phenomenology. Most bluntly put, the attitude is: Don't talk about it, do it. It would seem that we have arrived at a point where introductions to phenomenology are of doubtful value, if not superfluous. The present collection of essays is based on different assumptions and points to an alternative conception of the role of both methodology and originality in phenomenological work.

**The Fundamental Concepts of Metaphysics** Martin Heidegger, 1995 This book, the text of Martin Heidegger's lecture course of 1929-30, is crucial for an understanding of Heidegger's transition from the major work of his early years, *Being and Time*, to his later preoccupations with language, truth, and history. First published in German in 1983 as volume 29-30 of Heidegger's collected works, *The Fundamental Concepts of Metaphysics* presents an extended treatment of the history of metaphysics and an elaboration of a philosophy of life and nature. Heidegger's concepts of organism, animal, behavior, and environment are uniquely developed and defined with intensity. Of major interest is Heidegger's brilliant phenomenological description of the mood of boredom, which he describes as a fundamental attunement of modern times.

*Look* Andrew L. Yarrow, 2021-11 Andrew L. Yarrow tells the story of *Look* magazine, one of the greatest mass circulation publications in American history and the very different United States in which it existed. The all-but-forgotten magazine had an extraordinary influence on mid-twentieth-century America, not only by telling powerful, thoughtful stories and printing outstanding photographs, but also by helping to create a national conversation around a common set of ideas and ideals. Yarrow describes how the magazine covered the United States and the world, telling stories of people and trends, injustices and triumphs, and included essays by prominent Americans such as Martin Luther King Jr. and Margaret Mead. It did not shy away from exposing the country's problems, but it always believed that those problems could be solved. *Look*, which was published from 1937 to 1971 and had about 35 million readers at its peak, was an astute observer with a distinctive take on one of the greatest eras in U.S. history, from winning World War II and building immense, increasingly inclusive prosperity to celebrating grand achievements and advancing the rights of Black and female citizens. Because the

magazine shaped Americans beliefs while guiding the country through a period of profound social and cultural change this is also a story about how a long gone form of journalism helped make America better and assured readers it could be better still
