Looking For The Frontier A Search For Value:

Heuristic Search Stefan Edelkamp, Stefan Schroedl, 2011-05-31 Search has been vital to artificial intelligence from the very beginning as a core technique in problem solving The authors present a thorough overview of heuristic search with a balance of discussion between theoretical analysis and efficient implementation and application to real world problems Current developments in search such as pattern databases and search with efficient use of external memory and parallel processing units on main boards and graphics cards are detailed Heuristic search as a problem solving tool is demonstrated in applications for puzzle solving game playing constraint satisfaction and machine learning While no previous familiarity with heuristic search is necessary the reader should have a basic knowledge of algorithms data structures and calculus Real world case studies and chapter ending exercises help to create a full and realized picture of how search fits into the world of artificial intelligence and the one around us Provides real world success stories and case studies for heuristic search algorithms Includes many AI developments not yet covered in textbooks such as pattern databases symbolic search and parallel processing units

Searching for Arizona's Buried Treasures Ron Quinn, 2013-10-01 Searching for hidden treasures in the Tubac and Tumacocori mountains few have ever heard of we discovered places that have never been visited by others to this day The four of us finally unearthed a medium size buried treasure south of Tucson Arizona which consisted of 82 pounds of Spanish gold bullion

More Games of No Chance Richard Nowakowski, 2002-11-25 This 2003 book provides an analysis of combinatorial games games not involving chance or hidden information It contains a fascinating collection of articles by some well known names in the field such as Elwyn Berlekamp and John Conway plus other researchers in mathematics and computer science together with some top game players The articles run the gamut from theoretical approaches infinite games generalizations of game values 2 player cellular automata Alpha Beta pruning under partial orders to other games Amazons Chomp Dot and Boxes Go Chess Hex Many of these advances reflect the interplay of the computer science and the mathematics The book ends with a bibliography by A Fraenkel and a list of combinatorial game theory problems by R K Guy Like its predecessor Games of No Chance this should be on the shelf of all serious combinatorial games enthusiasts

Artificial Intelligence Nils J. Nilsson, 1998-04-17 Intelligent agents are employed as the central characters in this new introductory text Beginning with elementary reactive agents Nilsson gradually increases their cognitive horsepower to illustrate the most important and lasting ideas in AI Neural networks genetic programming computer vision heuristic search knowledge representation and reasoning Bayes networks planning and language understanding are each revealed through the growing capabilities of these agents The book provides a refreshing and motivating new synthesis of the field by one of AI's master expositors and leading researchers Artificial Intelligence A New Synthesis takes the reader on a complete tour of this intriguing new world of AI An evolutionary approach provides a unifying theme Thorough coverage of important AI ideas old and new Frequent use of examples and illustrative diagrams Extensive coverage of machine learning methods

Algorithms and Networking for Computer Games Jouni Smed, Harri Hakonen, 2017-06-06 The essential guide to solving algorithmic and networking problems in commercial computer games revised and extended Algorithms and Networking for Computer Games Second Edition is written from the perspective of the computer scientist Combining algorithmic knowledge and game related problems it explores the most common problems encountered in game programming The first part of the book presents practical algorithms for solving classical topics such as random numbers procedural generation tournaments group formations and game trees The authors also focus on how to find a path in create the terrain of and make decisions in the game world The second part introduces networking related problems in computer games focusing on four key questions how to hide the inherent communication delay how to best exploit limited network resources how to cope with cheating and how to measure the on line game data Thoroughly revised updated and expanded to reflect the many constituent changes occurring in the commercial gaming industry since the original this Second Edition like the first is a timely comprehensive resource offering deeper algorithmic insight and more extensive coverage of game specific networking problems than ordinarily encountered in game development books Algorithms and Networking for Computer Games Second Edition Provides algorithmic solutions in pseudo code format which emphasises the idea behind the solution and can easily be written into a programming language of choice Features a section on the Synthetic player covering decision making influence maps finite state machines flocking fuzzy sets and probabilistic reasoning and noise generation Contains in depth treatment of network communication including dead reckoning local perception filters cheating prevention and on line metrics Now includes 73 ready to use algorithms and 247 illustrative exercises Algorithms and Networking for Computer Games Second Edition is a must have resource for advanced undergraduate and graduate students taking computer game related courses postgraduate researchers in game related topics and developers interested in deepening their knowledge of the theoretical underpinnings of computer games and in learning new approaches to game design and programming

Algorithms and Computation Sudebkumar Prasant Pal, Kunihiro Sadakane, 2014-01-18 This book constitutes the revised selected papers of the 8th International Workshop on Algorithms and Computation WALCOM 2014 held in Chennai India in February 2014 The 29 full papers presented together with 3 invited talks were carefully reviewed and selected from 62 submissions The papers are organized in topical sections on computational geometry algorithms and approximations distributed computing and networks graph algorithms complexity and bounds and graph embeddings and drawings

Recognizing Public Value Mark H. Moore, 2013-02-15 Moore's classic Creating Public Value offered advice to managers about how to create public value but left unresolved the question how one could recognize when public value had been created Here he closes the gap by helping public managers name observe and count the value they produce and sustain or increase public value into the future

Advances in Computer Science and Ubiquitous Computing James J. Park, Doo-Soon Park, Young-Sik Jeong, Yi Pan, 2019-12-03 This book presents the combined

proceedings of the 10th International Conference on Computer Science and its Applications CSA 2018 and the 13th KIPS International Conference on Ubiquitous Information Technologies and Applications CUTE 2018 both held in Kuala Lumpur Malaysia Dec 17 19 2018 The aim of these two meetings was to promote discussion and interaction among academics researchers and professionals in the field of ubiquitous computing technologies These proceedings reflect the state of the art in the development of computational methods involving theory algorithms numerical simulation error and uncertainty analysis and novel applications of new processing techniques in engineering science and other disciplines related to ubiquitous computing

Algorithms and Theory of Computation Handbook - 2 Volume Set Mikhail J. Atallah, Marina Blanton, 2022-05-29 Algorithms and Theory of Computation Handbook Second Edition in a two volume set provides an up to date compendium of fundamental computer science topics and techniques It also illustrates how the topics and techniques come together to deliver efficient solutions to important practical problems New to the Second Edition Along with updating and revising many of the existing chapters this second edition contains more than 20 new chapters This edition now covers external memory parameterized self stabilizing and pricing algorithms as well as the theories of algorithmic coding privacy and anonymity databases computational games and communication networks It also discusses computational topology computational number theory natural language processing and grid computing and explores applications in intensity modulated radiation therapy voting DNA research systems biology and financial derivatives This best selling handbook continues to help computer professionals and engineers find significant information on various algorithmic topics The expert contributors clearly define the terminology present basic results and techniques and offer a number of current references to the in depth literature They also provide a glimpse of the major research issues concerning the relevant topics

ECAI 2014 T. Schaub, G. Friedrich, B. O'Sullivan, 2014-08 The role of artificial intelligence AI applications in fields as diverse as medicine economics linguistics logical analysis and industry continues to grow in scope and importance AI has become integral to the effective functioning of much of the technical infrastructure we all now take for granted as part of our daily lives This book presents the papers from the 21st biennial European Conference on Artificial Intelligence ECAI 2014 held in Prague Czech Republic in August 2014 The ECAI conference remains Europe's principal opportunity for researchers and practitioners of Artificial Intelligence to gather and to discuss the latest trends and challenges in all subfields of AI as well as to demonstrate innovative applications and uses of advanced AI technology Included here are the 158 long papers and 94 short papers selected for presentation at the conference Many of the papers cover the fields of knowledge representation reasoning and logic as well as agent based and multi agent systems machine learning and data mining The proceedings of PAIS 2014 and the PAIS System Demonstrations are also included in this volume which will be of interest to all those wishing to keep abreast of the latest developments in the field of AI

Encyclopedia of Computer Science and Technology Allen Kent, James G. Williams, 1992-10-29 This comprehensive reference work provides immediate fingertip access to state of the art

technology in nearly 700 self contained articles written by over 900 international authorities Each article in the Encyclopedia features current developments and trends in computers software vendors and applications extensive bibliographies of leading figures in the field such as Samuel Alexander John von Neumann and Norbert Wiener and in depth analysis of future directions

Decision Modeling in Policy Management Giampiero Beroggi, 2013-12-01 The last decade has experienced major societal challenges at the intersection of technological systems and policy making Prevalent examples are the liberalization of energy and telecommunications markets the public aversion towards nuclear power plants the development of high speed trains the debates about global warming and sustainability the development of intelligent vehicle systems and the controversies concerning the location of waste depositories airports and energy systems These challenges coupled with the call from industry for a systems engineering oriented approach to policy analysis motivated Delft University of Technology to launch the first European School of Systems Engineering Policy Analysis and Management SEPA The purpose was to educate engineering oriented policy analysts in bridging the gap between engineering systems and policy decision making processes both for the public and private sector Up to now more than 500 first year students and 30 Ph D students have enrolled in the program In 1993 I set up a class called Quantitative Methods for Problem Solving which had to address the most relevant issues in decision making for policy management such as linear and non linear optimization multiattribute utility theory multicriteria decision making concepts from game theory outranking relations and probabilistic influence diagrams

The Semantic Web - ISWC 2010 Peter F. Patel-Schneider, Yue Pan, Pascal Hitzler, Peter Mika, Lei Zhang, Jeff Z. Pan, Birte Glimm, Ian Horrocks, 2011-01-04 This book constitutes the refereed proceedings of the 7th International Semantic Web Conference ISWC 2008 held in Karlsruhe Germany during October 26 30 2008 The volume contains 43 revised full research papers selected from a total of 261 submissions of which an additional 3 papers were referred to the semantic Web in use track 11 papers out of 26 submissions to the semantic Web in use track and 7 papers and 12 posters accepted out of 39 submissions to the doctoral consortium The topics covered in the research track are ontology engineering data management software and service engineering non standard reasoning with ontologies semantic retrieval OWL ontology alignment description logics user interfaces Web data and knowledge semantic Web services semantic social networks and rules and relatedness The semantic Web in use track covers knowledge management business applications applications from home to space and services and infrastructure
