Children's Emotions in Europe, 1500 - 1900 Jeroen J. H. Dekker, 2024-04-04 This book gives you the historical sensation of coming face to face with the bodily expression and regulation of children s emotions over time The study does this by encouraging you to look through the eyes of well known artists like Albrecht Dürer Domenico Ghirlandaio Jan Steen Antony van Dyck Rembrandt and Titian in early modern Europe and Jean Baptiste Sim on Chardin Thomas Lawrence Jean Honor Fragonard Philipp Otto Runge Willem Bartel van der Kooi Paul Gauguin Auguste Renoir and Jozef Isra ls in the late 18th and

19th centuries These sources are supplemented by works from less famous artists as well as popular emblem books child advice manuals observations from the emerging child sciences and personal documents Jeroen Dekker observes children's emotions mainly in the child's world and in the domestic emotional space and connects them with history's ongoing underlying discourse on education and the emotions This discourse was developed by theologians philosophers and moralists like Augustine Aquinas Erasmus Descartes Jacob Cats John Locke and Jean Jacques Rousseau by Romantic educationalists like Friedrich Fröbel and Ellen Key and by scientists like Charles Darwin and William James who emphasized the biological instead of the moral fundament of children's emotions The story of children's emotions is told in the context of cultural movements like the Renaissance Humanism the Reformation the Enlightenment Romanticism and the starting Age of Child Science Children's Emotions in Europe 1500-1900 crucially highlights the continuous co-existence of regulation oriented and child oriented educational views on children's emotions **Nature Education with Young Children** Daniel R.

Meier, Stephanie Sisk-Hilton, 2013-05-29 Nature Education with Young Children is a thoughtful sophisticated teacher resource that blends theory and practice on nature education children's inquiry based learning and reflective teaching The book's guiding conceptual framework is founded upon the integration of four key ideas for effective and transformative nature education The power and value of equity and access to nature education Effective teaching encompasses child development domains and integrates ECE curriculum Children learn best through inquiry based and child centered teaching Powerful teaching is founded upon teacher inquiry and reflection Implementing nature study is one critical way that educators can integrate more science learning across the ECE curriculum and do so in an active discovery based manner Nature Education with Young Children strives for an American version of what the Reggio Emilia educators do so well creating a seamless integration of science concepts into the daily intellectual investigations that occur in classrooms everywhere *The Complete Patty Series (All 14 Children's Classics in One Volume)* Carolyn Wells, 2017-10-16 Patty

Educating Young Children through Natural Water Judit Horvath, 2015-10-08 Coastlines, rivers, and natural waters have a huge amount to offer young children, providing a unique environment for their learning and development. The environment, and its almost daunting size, touches something deep within the children, and surprisingly, the large space brings them closer together. This book provides a comprehensive guide to Natural Water School provision by exploring its special pedagogy, the organisation and management of the Water School session, and discussing the learning environment and its implications for children's wellbeing and development. It clearly explains the key principles of this recently developed contemporary approach and sets out a framework for setting up and leading a Natural Water School programme. The book shows how the aims and outcomes of early years education, including the Early Years Foundation Stage, can all be achieved within the Natural Water School environment and is supported by examples and case studies throughout. Full of practical suggestions and activities, it includes activity ideas covering topics such as wildlife, sensory activities, crafts, social development, physical play, and construction in different seasons. Unique teaching tools to observe and develop the children. Ideas for working with children of different ages and learning styles. Detailed guidance on health and safety, including risk assessments. Offering a sound historical background, a solid pedagogical framework, and a step-by-step guide to Natural Water School practice, this handy text will help students and practitioners to fully understand this new and increasingly popular approach to early years education and how it can benefit the children they care for.

Object Lessons Sarah Anne Carter, 2018-07-12 *Object Lessons* How Nineteenth Century Americans Learned to Make Sense of the Material World examines the ways material things, objects, and pictures were used to reason about issues of morality, race, citizenship, and capitalism, as well as reality and representation in

the nineteenth century United States For modern scholars an object lesson is simply a timeworn metaphor used to describe any sort of reasoning from concrete to abstract But in the 1860s object lessons were classroom exercises popular across the country Object lessons helped children to learn about the world through their senses touching and seeing rather than memorizing and repeating leading to new modes of classifying and comprehending material evidence drawn from the close study of objects pictures and even people In this book Sarah Carter argues that object lessons taught Americans how to find and comprehend the information in things from a type metal fragment to a whalebone sample Featuring over fifty images and a full color insert this book offers the object lesson as a new tool for contemporary scholars to interpret the meanings of nineteenth century material cultural and intellectual life **Handbook of Research and Policy in Art Education** Elliot W.
