Twenty-Five+ Buildings Every Architect Should Understand Simon Unwin,2023-11-03 The underlying theme of Twenty Five Buildings Every Architect Should Understand is the relationship of architecture to the human being how it frames our lives and orchestrates our experience how it can help us make sense of the world and contribute to our sense of identity and place Exploring these dimensions through a wide range of case studies that illustrate the rich diversity of twentieth and twenty first century architecture this book is essential reading for every architect With the addition of numerous shorter analyses this new edition covers an even greater range of architectural ideas providing students and architects with further inspiration for exploration in their own design work Architects live by ideas But where do they come from And how do they shape buildings There is no one right way to do

Kahn - Licht und Raum* BÜTTIKER, Louis I. Kahn, 1993-07 A bilingual German and English examination of light and space in the architectural works of Louis I Kahn focusing on 50 projects that demonstrate the extensive variety of techniques which he investigated and employed for the control and modulation of natural light The author progresses chronologically through the projects beginning with one of Kahn's student projects from 1924 and ending with the Dhaka Bangladesh capitol project in 1974 Profusely illustrated bandw with plans sketches and photographs and includes a typology of the various light control and modulation elements employed by Kahn 9 25x8 75 Annotation copyright by Book News Inc Portland OR *The Space Within* Robert McCarter, 2016-11-15 Alvar Aalto once argued that what mattered in architecture wasn't what a building looks like on the day it opens but what it is like to live inside it thirty years later In this book architect and critic Robert McCarter persuasively argues that interior spatial experience is the necessary starting point for design and the quality of that experience is the only appropriate means of evaluating a work after it has been built McCarter reveals that we can't really know a piece of architecture without inhabiting its spaces and we need to counter our contemporary obsession with exterior views and forms with a renewed appreciation for interiors He explores how interior space has been integral to the development of modern architecture from the late 1800s to today and he examines how architects have engaged interior space and its experiences in their design processes fundamentally transforming traditional approaches to composition Eloquently placing us within a host of interior spaces he opens up new ways of thinking about architecture and what its goals
