

# Sexual Orientation

## The Biological Component:

### ⌘ Evolutionary considerations:

Premise 1: Sexual desire and romantic love are functionally independent

Premise 2: Romantic love is not intrinsically oriented to same-gender or other-gender partners.

Premise 3: The links between love and desire are bidirectional.

### ⌘ Heritability estimates account for only about 50% of same-sex orientation. (Twin studies)

☒ Seem through twin studies.

☒ Other hormonal effects on human sexuality are difficult to assess because studies are dependent on “experiment of nature” to determine effects.

**The Sexual Instinct** Charles Féré, 1900      *The Evolution of the diseases of women* W. Balls-Headley, 1894      The Evolution of the Diseases of Women Walter Balls Headley, 1894      The Sexual Life of Our Time in Its Relations to Modern Civilization Iwan Bloch, 1909      With Families in Mind Willam John Hatten , 2017-09-13 With Families in Mind is a two part in depth explanation to the Introduction content of The Verses Absolute Relative in Book 1 It was intended to be its Epilogue As it grew too long the author has made it a supplementary separate book Along with conveying expanding the social concern the Author has for the increasingly eroding decaying family structure in the 21st century In the Author s spiritual acquired understanding of life a mankind created growing disaster for mankind s spiritual evolution A concern that prompted the Introduction content in Book 1 and the content of this supplementary book to expand clarify that concern      *Kevin Macdonald's Metaphysical Failure: a Philosophical, Historical, and Moral Critique of Evolutionary Psychology, Sociobiology, and Identity Politics* Jonas E. Alexis, 2022-04-25 In Kevin MacDonald s Metaphysical Failure Jonas E Alexis offers a thoroughly

researched nuanced and lucid analysis of Kevin MacDonald's thought in particular MacDonald's belief in biological and philosophical Darwinism. It is an important book that fills a critical gap in the literature on the history of revolutionary movements and Darwinism both in the West and in Asia. It is also a study that adds many significant strands to the densely interwoven history of ideas such as Malthusianism and Eugenics. Alexis's book engages debates in the history of ideas going back to Madison Grant and beyond and the history of Darwinism. It challenges many of the life-long prevailing assumptions about identity politics and produces a powerful critique of how scientific theories have been misused to uphold misguided and faulty categorizations. Powerfully reasoned and backed with a startling array of documented studies, Kevin MacDonald's *Metaphysical Failure* presents an in-depth look at key beliefs behind many mistaken and consequently destructive actions taken by numerous writers and thinkers, particularly Darwin's ardent enthusiasts and devoted disciples. The book presents eye-opening insights into the historical development of Darwin's ideological project and how that project ended up crippling Darwin's intellectual children from Richard Dawkins, Francis Crick, James Watson, Daniel Dennett, Ernst Mayr, and E. O. Wilson to Kevin MacDonald, Richard Spencer, David Duke, and Jared Taylor.

Sigmund Freud Alistair Ross, 2022-04-29 Sigmund Freud's name is known throughout the world. He opened up the world of the unconscious so people can understand themselves so much better than before. His unique ideas are discussed in academic circles. His psychoanalytic techniques influenced mental health counselling, psychotherapy, and psychiatry. His words form part of everyday language. Lying on a couch and having dreams interpreted by an analyst is an iconic picture of modern life and popular culture. *Sigmund Freud: A Reference Guide to Her Life and Work* captures his eventful life, his works, and his legacy. The volume features a chronology, an introduction, a comprehensive bibliography, and the dictionary section lists entries on Freud, his family, friends, and foes, colleagues, and the evolution of psychoanalysis.

William James, Moral Philosophy, and the Ethical Life Jacob L. Goodson, 2017-12-20 Virtue theory, natural law, deontology, utilitarianism, existentialism: these are the basic moral theories taught in Ethics, History of Philosophy, and Introduction to Philosophy courses throughout the United States. When the American philosopher William James (1842-1910) finds his way into these conversations, there is uncertainty about where his thinking fits. While utilitarianism has become the default position for teaching James's pragmatism and radical empiricism, this default position fails to address and explain James's multiple criticisms of John Stuart Mill's formulaic approach to questions concerning the moral life. Through close readings of James's writings, the chapters in *William James: Moral Philosophy and the Ethical Life* catalogue the ways in which James wants to avoid the following: a) the hierarchies of Christian natural law theory; b) the moral calculus of Mill's utilitarianism; c) the absolutism and principle-ism of Immanuel Kant's deontology; and d) the staticity of the virtues found in Aristotle's moral theory. Elaborating upon and clarifying James's differences from these dominant moral theories is a crucial feature of this collection. This collection is not, however, intended to be wholly negative; that is, only describing to readers what James's moral theory is not. It seeks to articulate the positive

features of James's ethics and moral reasoning what does it mean to an ethical life and how should we theorize about morality

*The Return of Science* Philip Pomper, David Gary Shaw, 2002 In this collection of essays historians discuss the applications of evolutionary theory to cultural social economic and political phenomena William H McNeill presents a magisterial statement about the convergence of the sciences toward an evolutionary worldview Several contributors offer support for this thesis Anthropologist Donald Brown and archaeologist Albert Naccache bring together the realms of biology and culture in examinations of evolved human features and modes of evolution Demographer Noel Bonneuil and neuroscientist Alonso Pena apply mathematics to historical evolutionary processes such as the decision making of human agents and cultural diffusion

**Early Humans and Their World** Bo Gräslund, 2005 The deconstruction of current thought on early hominid evolution continues as the author applies critical scrutiny to the biological theory of kin selection and its relevance for the evolution of human morality and the behaviours of inbreeding avoidance and infanticide He also examines other key issues such as the origin of cognition spoken language morality and typical human sexuality as well as diet and population density Jacket

**Libidinal Economies of Crisis Times** Ben Gook, 2024-10-30 What is a libidinal economy How are we psychically hooked into the circuits of the capitalist economy The contributors to this book question the relevance of a concept that began reappearing in critiques and analyses of capitalist societies since the financial crisis of 2007 The chapters stretch from its philosophical pre history including Marx Spinoza Cavendish and Ibn Sina to the term's introduction with Freud and on via Lyotard to how online platforms put our psyches to work Libidinal Economies of Crisis Times is a collection of essays by leading scholars about the connections among economies pleasures and desires

**The Castration of Oedipus** Joseph C. Smith, Carla J. Ferstman, 1996-03 The intellectual movements of psychoanalysis postmodernism and feminism have redefined the ways in which we think about human experience And yet an integration of these movements has been elusive if not impossible In this landmark book J C Smith and Carla J Ferstman combine these disparate traditions to create a provocative unified and tightly woven perspective that transcends the misogyny implicit in much of Freudian psychoanalytic theory The dialectics of domination and submission are central to Smith and Ferstman's argument Men and women they insist must avoid the temptation to fetishize equality and recognize the roles of domination and submission in the human psyche or in Nietzsche's terms the Will to Power They argue that the unification of psychoanalysis postmodernism and feminism leads us to a shocking conclusion that women and men cannot move beyond the suffering which so haunts the human condition unless heterosexual men surrender the power that is causing their misery and affirm life by joyfully accepting domination by women And women conversely must reaffirm their power by rejecting Oedipal genderization and embracing a liberating matriarchal consciousness and a matriphallic sexuality A work of tremendous insight and extraordinary intellectual energy The Castration of Oedipus will provoke strong reactions in all readers regardless of ideology

Uncommon Dissent William Dembski, 2014-05-13 Recent years have seen the rise to prominence of ever more

sophisticated philosophical and scientific critiques of the ideas marketed under the name of Darwinism In *Uncommon Dissent* mathematician and philosopher William A Dembski brings together essays by leading intellectuals who find one or more aspects of Darwinism unpersuasive As Dembski explains Darwinism has gathered around itself an aura of invincibility that is inhospitable to rational discussion to say the least Darwinism its proponents assure us has been overwhelmingly vindicated Any resistance to it is futile and indicates bad faith or worse Indeed those who question the Darwinian synthesis are supposed in the famous formulation of Richard Dawkins to be ignorant stupid insane or wicked The hostility of dogmatic Darwinians like Dawkins has not however prevented the advent of a growing cadre of scholarly critics of metaphysical Darwinism The measured thought provoking essays in *Uncommon Dissent* make it increasingly obvious that these critics are not the brainwashed fundamentalist buffoons that Darwinism s defenders suggest they are but rather serious skeptical open minded inquirers whose challenges pose serious questions about the viability of Darwinist ideology The intellectual power of their contributions to *Uncommon Dissent* is bracing
