Love Canal My Story:

Love Canal Richard S. Newman, 2016-04-12 In the summer of 1978 residents of Love Canal a suburban development in Niagara Falls NY began protesting against the leaking toxic waste dump in their midst a sixteen acre site containing 100 000 barrels of chemical waste that anchored their neighborhood Initially seeking evacuation area activists soon found that they were engaged in a far larger battle over the meaning of America s industrial past and its environmental future The Love Canal protest movement inaugurated the era of grassroots environmentalism spawning new anti toxics laws and new models of ecological protest Historian Richard S Newman examines the Love Canal crisis through the area s broader landscape detailing the way this ever contentious region has been used altered and understood from the colonial era to the present day Newman journeys into colonial land use battles between Native Americans and European settlers 19th century utopian city planning the rise of the American chemical industry in the 20th century the transformation of environmental activism in the 1970s and the memory of environmental disasters in our own time In an era of hydrofracking and renewed concern about nuclear waste disposal Love Canal remains relevant It is only by starting at the very beginning of the site s environmental history that we can understand the road to a hazardous waste crisis in the 1970s and to the global environmental justice movement it sparked The SAGE Encyclopedia of Business Ethics and Society Robert W. Paradise Falls Keith O'Brien, 2022-04-12 The staggering story of an unlikely band of mothers in the 1970s who discovered Hooker Chemical s deadly secret of Love Canal exposing one of America s most devastating toxic waste disasters and sparking the modern environmental movement as we know it today Propulsive A mighty work of historical journalism A glorious quotidian thriller about people forced to find and use their inner strength The Boston Globe Lois Gibbs Luella Kenny and other mothers loved their neighborhood on the east side of Niagara Falls It had an elementary school a playground and rows of affordable homes But in the spring of 1977 pungent odors began to seep into these little houses and it didn t take long for worried mothers to

identify the curious scent It was the sickly sweet smell of chemicals In this propulsive work of narrative storytelling NYT journalist Keith O'Brien uncovers how Gibbs and Kenny exposed the poisonous secrets buried in their neighborhood The school and playground had been built atop an old canal Love Canal it was called that Hooker Chemical the city's largest employer had quietly filled with twenty thousand tons of toxic waste in the 1940s and 1950s This waste was now leaching to the surface causing a public health crisis the likes of which America had never seen before and sparking new and specific fears Luella Kenny believed the chemicals were making her son sick O'Brien braids together previously unknown stories of Hooker Chemical's deeds the local newspaperman scientist and congressional staffer who tried to help the city and state officials who didn't and the heroic women who stood up to corporate and governmental indifference to save their families and their children They would take their fight all the way to the top winning support from the EPA the White House and even President Jimmy Carter By the time it was over they would capture America's imagination Sweeping and electrifying Paradise Falls brings to life a defining story from our past laying bare the dauntless efforts of a few women who years before Erin Brockovich took up the mantle fought to rescue their community and their lives from the effects of corporate pollution and laid foundation for the modern environmental movement as we know it today [Inventing Niagara](#) Ginger Strand, 2008-05-06 Strand reveals the hidden history of America's most iconic natural wonder Niagara Falls illuminating what it says about our history our relationship with the environment and ourselves **A Climate of Crisis** Patrick Allitt, 2014-03-20 A provocative history of the environmental movement in America showing how this rise to political and social prominence produced a culture of alarmism that has often distorted the facts Few issues today excite more passion or alarm than the specter of climate change In *A Climate of Crisis* historian Patrick Allitt shows that our present climate of crisis is far from exceptional Indeed the environmental debates of the last half century are defined by exaggeration and fearmongering from all sides often at the expense of the facts In a real sense Allitt shows us collective anxiety about widespread environmental danger began with the atomic bomb As postwar suburbanization transformed the American landscape more research and better tools for measurement began to reveal the consequences of economic success A climate of anxiety became a climate of alarm often at odds with reality The sixties generation transformed environmentalism from a set of special interests into a mass movement By the first Earth Day in 1970 journalists and politicians alike were urging major initiatives to remedy environmental harm In fact the work of the new Environmental Protection Agency and a series of clean air and water acts from a responsive Congress inaugurated a largely successful cleanup Political polarization around environmental questions after 1980 had consequences that we still feel today Since then the general polarization of American politics has mirrored that of environmental politics as pro environmentalists and their critics attribute to one another the worst possible motives Environmentalists see their critics as greedy special interest groups that show no conscience as they plunder the earth while skeptics see their adversaries as enemies of economic growth whose plans stifle initiative under an

avalanche of bureaucratic regulation There may be a germ of truth in both views but more than a germ of falsehood too America's worst environmental problems have proven to be manageable the regulations and cleanups of the last sixty years have often worked and science and technology have continued to improve industrial efficiency Our present situation is serious argues Allitt but it is far from hopeless Sweeping and provocative A Climate of Crisis challenges our basic assumptions about the environment no matter where we fall along the spectrum reminding us that the answers to our most pressing questions are sometimes found in understanding the past Culture Wars Roger Chapman, 2015-03-17 The term culture wars refers to the political and sociological polarisation that has characterised American society the past several decades This new edition provides an enlightening and comprehensive A to Z ready reference now with supporting primary documents on major topics of contemporary importance for students teachers and the general reader It aims to promote understanding and clarification on pertinent topics that too often are not adequately explained or discussed in a balanced context With approximately 640 entries plus more than 120 primary documents supporting both sides of key issues this is a unique and defining work indispensable to informed discussions of the most timely and critical issues facing America today

at cultural contradictions as objects hover between waste and desirability examining Milwaukee's efforts to sell its sludge as fertilizer the plastics industry's attempt to wrap plastic bottles and bags in the mantle of freedom of choice and the idea of obsolescence in the animated film *The Brave Little Toaster* Histories of the Dustheap offers a range of perspectives on a variety of incarnations of garbage inviting the reader to consider garbage in a way that goes beyond the common buy green discourse that empowers individuals while limiting environmental activism to consumerist practices **Routledge**

Earth Follies Joni Seager, 2019-03-21 First published in 1993 The question of agency is essential to our understanding of environmental problems who is responsible and why Threats such as ozone depletion global warming and overconsumption are all precipitated by the powerful institutions which shape modern life institutions which are overwhelmingly controlled by men and dominated by masculine presumptions Joni Seager argues that the gender bias inherent in western culture is inextricably linked to our environmental crisis She analyses the traditional institutes of power governments the military and transnational corporations and also takes a critical look at the equally patriarchal environmental establishment comparing the work of the official environmental movement grounded in masculine thought with the smaller scale direct actions taken by women driven to protect their homes and communities *Earth Follies* represents an incisive and utterly convincing feminist critique of our environmental crises and offers radical and productive priorities for the environmental agenda

Uncertain Hazards Sylvia Noble Tesh, 2018-05-31 Ordinary citizens frequently organize around environmental issues on which little scientific evidence exists to back activists claims Should we then dismiss such claims as spurious Or should we side with citizens against the polluters *Uncertain Hazards* takes neither path In exploring the all too common problem of scientific uncertainty about links between pollution and public health Sylvia Noble Tesh shows that much of the problem can be traced to the newness of the environmental movement The inability of scientists to find data corroborating citizens claims stems partly from the pre environmentalist assumptions still influencing the environmental health sciences Tesh says On the other hand the conviction of activists that industrial pollutants threaten their health results from the environmental movement s success in promoting new ideas about nature Tesh points to ways that environmentalist ideas have begun to affect science thus making more likely the discovery of links between exposure to industrial pollutants and a community s health problems Those ways include the expansion of diseases construed as environmental in cause the study of society s most vulnerable citizens in determining safe levels of pollution and a new focus on the effects of exposure

to chemical mixtures Using community activists own words and experiences Tesh argues against the familiar charge that activists are naive about science It is inaccurate she says to characterize debates over the hazardous nature of pollution as debates between laypeople and experts Instead they are debates between two groups of experts It is also inaccurate however to see the conflict over environmental pollution only in scientific terms The conflict has culturally important moral dimensions and community activists draw heavily although often unconsciously on the lessons taught by environmentalism
