reigning features of the modern workplace Although many writers have called attention to the debilitating effects of this dehumanization of the working environment solutions have been less in evidence In *The Anatomy of Ethical Leadership* Lyse Langlois frames the problem in terms of ethics pointing to the fact that managers are often uncertain how to integrate ethical considerations into their process of decision making She explores the instrumental often highly legalistic patterns of thought that pervade modern organizations and proposes instead a new emphasis on dialogue and on modes of reasoning that make room for the complexity of ordinary reality To that end she outlines a trajectory for ethical responsible and authentic decision making the TERA model that managers

Global Citizenship Education ,2008-01-01 The essays in this edited collection argue that global citizenship education realistically must be set against the imperfections of our contemporary political realities As a form of education it must actively engage in a critically informed way with a set of complex inherited historical issues that emerge out of a colonial past and the savage globalization which often perpetuates unequal power relations or cause new inequalities The essays in the book explore these issues and the emergent world ideologies of globalism as well as present territorial conflicts ethnic tribal and nationalist rivalries problems of increasing international migration and asylum growing regional imbalances and increasing world inequalities Contributors to this collection each on their own way argues that global citizenship education needs to project new values to reality test and debate the language concepts and theories of global citizenship and the proto world institutions that seek to give expression to nascent aspirations for international forms of social justice and citizen participation in world government Many of the contributors argue that global citizenship education offers the prospect of extending the liberal ideologies of human rights and multiculturalism and of developing a better understanding of forms of post colonialism One thing is sure as the essays presented in this book demonstrate so clearly there can be no one dominant notion of global citizenship education as notions of global citizenship and education are all contested and open to further argument and revision Global citizenship education does not name the moment of global citizenship or even its emergence so much as the hope of a form of order where the rights of the individual and of cultural groups irrespective of race gender ethnicity or creed are observed preserved and protected by all governments in order to become the basis of citizen participation in new global spaces that we might be tempted to call global civil society
