Major Powers And Peacekeeping Perspectives Priorities And The Challenges Of Military:

Major Powers and Peacekeeping Rachel E. Utley, 2017-03-02 The problems of peacekeeping in Somalia Rwanda and former Yugoslavia marked a turning point for major powers in international military peacekeeping Major support for a more pro active UN role in peacekeeping has not been forthcoming and where major power involvement is deemed vital non UN peace operations have increasingly become the norm This valuable volume explores the continuing significance of peacekeeping in international affairs particularly in terms of its military dimensions and examines the priorities and perspectives of the major powers in relation to their military participation in international peacekeeping and wider peace operations in the twenty first century It is ideal for scholars and students interested in contemporary international politics international relations international organizations security and strategic studies conflict resolution and foreign policy analysis

Major Powers and Peacekeeping R. E. Utley, 2006 This valuable volume explores the continuing significance of peacekeeping in international affairs particularly in terms of its military dimensions and examines the priorities and perspectives of the major powers in relation to their military participation

Neoclassical Realism and Defence Reform in Post-Cold War Europe T. Dyson, 2016-02-29 Dyson explains the convergence and divergence between British French and German defence reforms in the post Cold War era He engages with cultural and realist theories and develops a neoclassical realist approach to change and stasis in defence policy bringing new material to bear on the factors which have affected defence reforms

Military Leadership and Counterinsurgency Victoria Nolan, 2011-12-18 Offering a unique and original perspective on Britain's Small Wars leadership culture this title is an essential reading for serving soldiers and scholars of military studies It is based on original archival research It offers fascinating survey of counterinsurgency operations with relevance for today's military and security Between 1948 and 1960 the British army conducted three important counterinsurgency operations in Malaya Kenya and Cyprus During that time military leaders inspired the evolution of a distinct organisational culture known as small wars culture which affected learning discipline and attitudes towards leadership and fellow soldiers Using a synthesis of organisational theory and archival research this book explores how military leaders embedded and transmitted this particular military organisational culture within the British army and provides an analysis of leaders characteristics their support networks and past experiences This book will be of interest to counterinsurgency specialists the British Army and military historians and sociologists as well as to serving military forces

The Economics of UN Peacekeeping Nadège Sheehan, 2011-07-25 Peacekeeping is a security concept that is very representative of the current interventionism multilateralism human rights and humanitarian ideas UN peacekeeping plays an important role in international security and includes various activities that go beyond the original roles assigned to UN armed forces e.g humanitarian aid election supervision disarmament mine clearance civilian protection and peacebuilding The problem is to define the economic efficiency of these operations and to develop some recommendations in the context of

an economic globalization process Although UN peacekeeping has shortcomings it must be considered essential for organizing and defending the world politico economic order UN peacekeeping is a political activity but its production strongly depends on nations economic considerations Governments make political decisions that also take into account the economic gains they expect to obtain from their contribution to any specific mission With low means and inadequate strategies to meet the challenges UN peacekeeping must pay particular attention to resolving the problems of free riding and of prisoner s dilemma in contributions that delay deployments and create significant financial problems Understanding how peacekeeping can be most cost effectively carried out while considering the importance of legitimacy in interventions is essential This book believes that regional organizations can ease the UN s financial responsibility by managing conflicts in their regions But to be most effective they must involve the UN in their interventions This book also emphasizes UN peacekeeping trust funds as the key to better financial effectiveness It strongly recommends that NATO be empowered by the UN with the role of global peace police and proposes the establishment of a UN high ranking team of international specialists in peacekeeping issues This research should be of interest to students and researchers looking at international and political economics as well as international relations defence security and peace studies

Africa and the World

The UN Stabilization Mission in Mali (MINUSMA) Arthur Boutellis, 2024-10-27 The book tells and analyzes the story of the United Nations multidimensional stabilization operation in Mali MINUSMA which closed at the end of the 2023 after almost a decade of existence MINUSMA which is the UN operation

that has by far attracted the most media attention has been the laboratory of contemporary peacekeeping combining several interesting elements. It came on the tail of a French African military intervention rehatting African contingents operated in parallel to various counterterrorism forces Barkhane and JF G5 Sahel. It has been the deadliest peace operation due to asymmetric threats but has also managed to adapt to a new environment and has witnessed a return of European troop contributors to peacekeeping in Africa but also a significant contribution from China. Most importantly MINUSMA ultimately became caught in the geopolitical crossfire with a host government led by a military junta and supported by Russia and the Wagner Group defying the Security Council in the context of a return of East West rivalries exacerbated by the 2022 Ukraine invasion.

9/11 Ten Years After Rachel E. Utley, 2016-03-16 Ten years on what have been the principal impacts of the terrorist attacks of 11 September 2001 on the external policies and international outlooks of the world's major powers, the range and scope of the international security agenda and on the capacity for states and international organisations to work together to combat the dangers of international terrorism. This book investigates a range of international responses to the events of 9/11 to evaluate their consistency over time, to analyse their long term significance and impact and to consider both their implications for the international security agenda and the prospects for international cooperation in addressing the challenges posed. In particular the book considers the perspectives of some of the world's major powers and international organisations on the question of international terrorism and on its perpetrators, comparing their interpretations and responses and examining how these have changed over the course of a decade of conflict. This book is primarily directed at an academic market and especially towards undergraduate and taught postgraduate students on courses in international politics, international relations, security studies, terrorism studies and contemporary international history.

Africa in Global International Relations Paul-Henri Bischoff, Kwesi Aning, Amitav Acharya, 2015-10-05 Recent scholarship in International Relations (IR) has started to study the meaning and implications of a non-Western world. With this comes the need for a new paradigm of IR theory that is more global, open, inclusive and able to capture the voices and experiences of both Western and non-Western worlds. This book investigates why Africa has been marginalised in IR discipline and theory and how this issue can be addressed in the context of the emerging Global IR paradigm. To have relevance for Africa, a new IR theory needs to be more inclusive, intellectually negotiated and holistically steeped in the African context. In this innovative volume, each author takes a critical look at existing IR paradigms and offers a unique perspective based on the African experience. Following on from Amitav Acharya and Barry Buzan's work *Non-Western International Relations Theory*, it develops and advances non-Western IR theory and the idea of Global IR. This volume will be of key interest to scholars and students of African politics, international relations, IR theory and comparative politics.

Russia's Military Revival Bettina Renz, 2018-04-27 Russian annexation of Crimea and the subsequent air campaign over Syria took the world by surprise. The capabilities and efficiency of Moscow's armed forces during both operations signalled to the world that Russia was back in business as a significant

military actor on the international stage In this cutting edge study Bettina Renz provides an in depth and comprehensive analysis of Russia s military revival under Putin s leadership Whilst the West must adjust to the reality of a modernised and increasingly powerful Russian military she argues that the renaissance of Russian military might and its implications for the balance of global power can only be fully understood within a wider historical context Assessing developments in Russian Great Power thinking military capabilities Russian strategic thought and views on the use of force throughout the post Soviet era the book shows that rather than signifying a sudden Russian military resurgence recent developments are consistent with longstanding trends in Russian military strategy and foreign policy Modern War and the Utility of Force Isabelle

Duyvesteyn, Jan Angstrom, 2010-04-05 This book investigates the use and utility of military force in modern war After the Cold War Western armed forces have increasingly been called upon to intervene in internal conflicts in the former Third World These forces have been called upon to carry out missions that they traditionally have not been trained and equipped for in environments that they often have not been prepared for A number of these new types of operations in allegedly new wars stand out such as peace enforcement state building counter insurgency humanitarian aid and not the least counter terrorism The success rate of these missions has however been mixed providing fuel for an increasingly loud debate on the utility of force in modern war This edited volume poses as its central question what is in fact the utility of force Is force useful for anything other than a complete conventional defeat of a regular opponent who is confronted in the open field This book will be of much interest to students of strategic studies war and conflict studies counter insurgency security studies and IR

Mays,2021-04-10 Conflicts require a process to guide the belligerents from the battle field to mutual cooperation But how does one provide the conflict stabilization for this peace process to operate Peacekeeping emerged as one of these tools and has evolved to become an important element to support the peace process between belligerents in major inter state and intra state conflict This book takes a broad definition of multinational peacekeeping in order to provide a basis for comparison and permit researchers to review operations labeled as peacekeeping by international organizations The goal of this work is to assist researchers scholars and others who are interested in peacekeeping and humanitarian operations to sort through the myriad of peacekeeping or peace operations since 1920 and consider some of the trends and issues behind these missions This fourth edition of Historical Dictionary of Multinational Peacekeeping contains a chronology an introduction and an extensive bibliography The dictionary section has more than 700 cross referenced entries peacekeeping operations people organizations countries and events associated with peacekeeping This book is an excellent resource for students researchers and anyone wanting to know more about peacekeeping *Human Security as Statecraft* Nik Hynek,2012-02-20 This book critically investigates the discourses and practices of human security and aims to delve below the stereotypical imageries representing them Drawing on Foucault and Deleuze the author approaches human security from a new perspective with the aim of ascertaining what has been behind and underneath a certain spatio temporal articulation of human security and with what political implications and consequences Each human security assemblage is composed of messy discourses and practices which are loosely related and sometimes even disconnected This book examines the Canadian and Japanese articulations of human security and establishes the kinds of structural terrains have enabled shaped or blocked the unfolding of these versions of human security The pivotal contention of the book is that Canadian and Japanese articulations of human security have been different because they have grown from completely different domestic economies of power governing the relationship between the state apparatus and the non profit and voluntary sector While the Canadian human security assemblage has been shaped by transformations in the country s advanced liberal model of government the Japanese has been shaped by the continuities of Japan s bureaucratic authoritarianism A novel approach is employed for the related process tracing a general series linking structural conditions with actual articulations of the human security projects and their further development including analysis of their unintended consequences This book will be of much interest to students of Critical Security Studies human security global governance foreign policy and IR Security studies **ConUNdrum** Brett D.
