Eurythmy as Visible Singing Rudolf Steiner,2019-10-23 The study of music is the study of the human being The two are inseparable and eurythmy is the art which brings this most clearly to expression In these lectures Rudolf Steiner guides us along a path toward an understanding of the human form as music comes to rest the movements of eurythmy bringing this music back to life Dorothea Mier Fundamentally speaking music is the human being and indeed it is from music that we rightly learn how to free ourselves from matter Rudolf Steiner The focus of these eight lectures is the source of movement and gesture in the human being The movement in musical experience is thus traced back to its origin in the human instrument itself Like the degrees of the musical scale Rudolf Steiner leads his select audience of young artists through eight stages focusing on the living principles of discovery and renewal Eurythmy was born in the turbulent decades of the early twentieth century From an individual question as to whether it was possible to create an art based on meaningful movement

Rudolf Steiner responded with fresh creative possibilities for a renewal of the arts in their totality The new art of eurythmy was an unexpected gift Today music eurythmy along with its counterpart based on speech is practiced as an art taught as a subject in schools enjoyed as a social activity and applied as a therapy This definitive translation of Steiner's original lecture course on eurythmy includes a facsimile transcription and translation of the lecturer's notes together with an introduction and index The volume is supplemented with an extensive companion featuring full commentary and notes compiled by Alan Stott as well as a translation of Josef Matthias Hauer's *Interpreting Melos* *Sequence Analysis and Related Approaches* Gilbert Ritschard, Matthias Studer, 2018-10-17 This open access book provides innovative methods and original applications of sequence analysis SA and related methods for analysing longitudinal data describing life trajectories such as professional careers family paths the succession of health statuses or the time use The applications as well as the methodological contributions proposed in this book pay special attention to the combined use of SA and other methods for longitudinal data such as event history analysis Markov modelling and sequence network The methodological contributions in this book include among others original propositions for measuring the precarity of work trajectories Markov based methods for clustering sequences fuzzy and monothetic clustering of sequences network based SA joint use of SA and hidden Markov models and of SA and survival models The applications cover the comparison of gendered occupational trajectories in Germany the study of the changes in women market participation in Denmark the study of typical day of dual earner couples in Italy of mobility patterns in Togo of internet addiction in Switzerland and of the quality of employment career after a first unemployment spell As such this book provides a wealth of information for social scientists interested in quantitative life course analysis and all those working in sociology demography economics health psychology social policy and statistics **The Musician**, 1917

Interdisciplinary approaches to literacy and development Kaushik Basu, Bryan Maddox, Anna Robinson-Pant, 2013-09-13 The links between literacy and development have been the focus of research conducted by both economists and anthropologists Yet researchers from these different disciplines have tended to work in isolation from each other This book aims to create a space for new interdisciplinary debate in this area through bringing together contributions on literacy and development from the fields of education literacy studies anthropology and economics The book extends our theoretical understanding on the ways in which people's acquisition and uses of literacy influence changes in agency identity social practice and labour market and other outcomes The chapters discuss data from diverse cultural contexts South Africa Bangladesh India Nepal Peru and Mexico and from contrasting research paradigms The contributors examine the significance of culture and socio economic contexts in shaping such processes As such they contribute to our understanding of the role of literacy in processes of poverty reduction and its importance to people's capabilities and wellbeing The themes covered include the dynamics of literacy use in the production of agency the enactment negotiation and embodiment of new social identities including gendered and religious identities the impacts of literate identities and use on institutional relations

and social participation the dynamics of literacy sharing and their externalities within and beyond households formal analysis of the impacts of proximate illiteracy on labour market and health outcomes across men and women and social contexts This book was published as a special issue of the Journal of Development Studies Aspect in English K. Kabakciev, 2013-03-09 Based on an earlier edition published in 1992 in Bulgarian this book offers a specific approach to one of the most controversial problems in linguistics According to it aspect is the result of a subtle and complex interplay between the referents of verbs and nouns in the sentence Special attention is paid to the role nouns and noun phrases play in the explication of aspect in English and similar languages The grammatical marking of aspect is shown to be a compensatory phenomenon imposed by language structure Comparisons made using Slavic mainly Bulgarian data reveal that compositional aspect is a mirror image of verbal aspect When explicated compositionally aspect is also determined by pragmatic factors Ultimately it is part of man's cognitive potential
