flocking to places where low skilled workers regardless of ethnic background are in particular trouble These two themes are at the heart of this book which also covers a range of provocative topics often with surprising findings Among the essayists Nelson Lim enters the controversy over whether and how immigrants affect the employment prospects for African Americans Mark Ellis investigates whether low immigrant wages depress other workers salaries William A V Clark contends that immigrants seem to be experiencing downward mobility and Min Zhou asserts that trends among second generation immigrants are decidedly more optimistic These well integrated and well organized essays sit squarely at the intersection of sociology and economics and along the way they point out both the strengths and the weaknesses of these two disciplines in understanding immigration Providing a theoretically and empirically comprehensive overview of the economic fate of immigrants in major American cities this book will make a major contribution to debates over immigration and the American future
