Ben-Porath, Michael C. Johanek, 2019-04-24 If free market advocates had total control over education policy would the shared public system of education collapse Would school choice revitalize schooling with its innovative force With proliferating charters and voucher schemes would the United States finally make a dramatic break with its past and expand parental choice Those are not only the wrong questions they're the wrong premises

argue philosopher Sigal R Ben Porath and historian Michael C Johanek in *Making Up Our Mind* Market driven school choices aren't new They predate the republic and for generations parents have chosen to educate their children through an evolving mix of publicly supported private charitable and entrepreneurial enterprises The question is not whether to have school choice It is how we will regulate who has which choices in our mixed market for schooling and what we as a nation hope to accomplish with that mix of choices Looking beyond the simplistic divide between those who oppose government intervention and those who support public education the authors make the case for a structured landscape of choice in schooling one that protects the interests of children and of society while also identifying key shared values on which a broadly acceptable policy could rest
