**BACKGROUND** The recent publication of several surveys on violence was the impetus for this book The first was carried out in 1986 by the Health and Safety Commission Health Services Advisory Committee 1987 They conducted a comprehensive survey of the incidence of violence to 5000 workers in five separate health districts The results from the 3000 people who eventually replied made many in the caring professions worried One in 200 workers had suffered a major injury following a violent attack during the previous year and a further one in ten needed first aid following an assault Other surveys also showed high risks of social service staff 6% had suffered an attack in the past 5 years Saunders 1987 and social workers were

at even higher risk 29% had been assaulted in the last 3 years Rowett 1986 In addition 4% of general practitioners had experienced an attack resulting in injury in the past year D Urso and Hobbs 1989 Clinical psychologists were also at risk 53% had been assaulted at least once during their professional career and 18% in the past year Perkins 1991 Media reports of extreme violence seem to be the tip of the iceberg Many staff are attacked and some of these attacks have serious physical or psychological consequences that interfere with the victim's ability to return to their full working capacity This loss of highly trained staff should be recognized by employers and the community
