Making Economics Public Vicki Macknight, Fabien Medvecky, 2023-05-22 Economics macro micro and mysterious is integral to everyday life But despite its importance for personal and collective decision making it is a discipline often viewed as technical arcane and inaccessible and thus overlooked in public discourse This book is a call to arms to bring the discipline of economics more into the public domain It calls on economists to think about how to make their knowledge of the economics public And it calls on those who specialise in communicating expert knowledge to help us learn to communicate about economics The book brings together scholars and practitioners working at the early stages of an emerging field the public communication of and public engagement with economics Through a series of short essays from academics and practitioners the book has two key goals first and foremost it will make a case for why we need to make economics public and for the importance of having a clear vision of what it means to make economics public Secondly it suggests some ways that this can be done featuring contributions from practitioners including economists who are engaging audiences in newspapers museums and beyond This book is essential reading for those in economics with an interest in making economics public and those already in the many fields dedicated to communicating expert knowledge in public spaces who have an interest in where economics can fit More information about the book can be found here <https://www.makingeconomicspublic.org>

**Nature and Economic Society** Tony Aspromourgos, 2023-12-01 This book focuses on the interrelationship between nature and the human economy Building upon his decades of research into classical and Keynesian economics Tony Aspromourgos here turns his attention to the interrelationship between nature and the human economy The result is a tightly argued concise but comprehensive interpretation of that vital issue undertaken in the framework of a Classical Keynesian synthesis The classical dimension is utilization of a surplus approach to production and distribution and the Keynesian dimension incorporation of demand side determination of economic activity levels and growth In this conception the human economy is understood as a circular flow but an incompletely circular system crucially dependent

upon nature both as a source of finite non renewable and exhaustible resources for human production and consumption and as the destination or sink also finite for the waste and pollution from that production and consumption This is an introductory account of the subject providing maximum accessibility by presupposing only basic knowledge of economic analysis and only elementary algebra but including a wide ranging guide to further and more advanced relevant literature Part I provides a comprehensive overview of the Classical Keynesian approach in the usual manner of economic analysis without systematic incorporation of nature Part II then incorporates the various dimensions of the natureeconomy interrelationship This book will be of great interest to readers of economic theory economics and the environment and heterodox economics      **Weekly Letters - Harvard Economic Society** Harvard Economic Society, inc,1925      **Modern Economic Society** Sumner Huber Slichter,1929      The Zero Marginal Cost Society Jeremy Rifkin,2014-04 Describes how the emerging Internet of Things is speeding us to an era of nearly free goods and services precipitating the meteoric rise of a global Collaborative Commons and the eclipse of capitalism
