The substance related to the astronomical concepts forms the subject matter of Astronomy. It broadly studies universe, solar system, planets, galaxies, meteoroids, asteroids, and several other astronomical bodies often thought to be of celestial origin. Out of the occurrence of a fluke manifestation one after the other resulting in the creation of life species and humans. In modern times, Hubble Telescope revolutionised planetary studies and outlived its lifespan. What likely edge will James Webb have over Hubble Space Telescope which immensely enriched the human knowledge on Cosmos for about three decades. Acclaimed scientists have contributed towards evolving a convincing narrative. Often indisputable pieces of evidence and sometimes some intelligent hypothesis support it. A tiny dot became universe followed by the birth of the sun, moon, the earth, other planets, nebula, galaxy, and Milky Ways and living kingdom. Life evolved, flora and fauna developed. Five catastrophic extinctions occurred, eliminating several species. This journey is laid on twelve hours on a clock. In due course, Homo sapiens developed who brought along intricacies like Environmental Degradation, Global Warming, and Climate Change. What length of the queue will be created if we trace the lineage of our generation back to the first human that appeared to roam about on the earth. Narrative wavers from line tracks the life and achievements of ancient civilisations which laid the foundation stone for human societies and got eliminated due to damage to the fine balance of environmental sustainability. This book refers to the ones like Indus valley civilisation, the master traders, the Sumerians, the pioneers in many fields, the mysterious Maya, and incredibly industrious Rapa Nui. All got exterminated. As scientists continue to turn up even more signs of collapsed civilisations, they are finding plenty of evidence that climate shifts are to blame to a considerable extent. Why and how? The narrative attempts to answer. The chronicle is before you which might engender a child-like fascination as you delve deeper and farther in it.

Conjugal Rights Rachel Jean-Baptiste, 2014-08-15. *Conjugal Rights* is a history of the role of marriage and other arrangements between men and women in Libreville, Gabon, during the French colonial era from the mid nineteenth century through 1960. Conventional historiography has depicted women as few in number and of limited influence in African colonial towns, but this book demonstrates that a sexual economy of emotional, social, legal, and physical relationships between men and women indelibly shaped urban life. Bridewealth became a motor of African economic activity as men and women promised, earned, borrowed, transferred, and absconded with money to facilitate interpersonal relationships. Colonial rule increased the fluidity of customary marriage law as chiefs and colonial civil servants presided over multiple courts and city residents strategically chose the legal arena in which to arbitrate a conjugal sexual conflict. Sexual and domestic relationships with European men allowed some African women to achieve a greater degree of economic and social mobility. An eventual decline of marriage rates resulted in new sexual mores as women and men sought to rebalance the roles of pleasure, respectability, and legality in having sex outside of kin-sanctioned marriage. Rachel Jean Baptiste expands the discourse on sexuality in Africa and challenges conventional understandings of urban history beyond the study of the built environment. Marriage and sexual relations determined how people defined themselves as urbanites and shaped the
