Making Of The Representative:

The Making of the Representative for Planet 8 Doris Lessing, 1988 Planet 8 a prosperous world with intelligent vital inhabitants is transformed by an Ice Age a change that causes a critical variation in lifestyle and a drastic reappraisal of the meaning and value of life *The Making of the Representative for Planet 8* Philip Glass, Doris Lessing, 1988 **The Making of the Representative for Planet 8 /Philip Glass ; Doris Lessing** Philip Glass, Doris Lessing, 1988 *The Encyclopedia of Public Choice* Charles Rowley, Friedrich Schneider, 2008-01-25 The Encyclopedia provides a detailed and comprehensive account of the subject known as public choice However the title would not convey sufficiently the breadth of the Encyclopedia's contents which can be summarized better as the fruitful interchange of economics political science and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the Scottish Enlightenment when such great scholars as David Hume Adam Ferguson and Adam Smith contributed to all these fields and more However as intellectual specialization gradually replaced broad based scholarship from the nineteenth century onwards it became increasingly rare to find a scholar making major contributions to more than one Once Alfred Marshall defined economics in neoclassical terms as a narrow positive discipline the link between economics political science and moral philosophy was all but severed and economists redefined their role into that of the humble dentist providing technical economic information as inputs to improve the performance of impartial benevolent and omniscient governments in their attempts to promote the public interest This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War *The Representative Claim* Michael Saward, 2010-05-13 Representation is more than a matter of elections and parties This book offers a radical new perspective on the subject Representation it argues is all around us a dynamic practise across societies rather than simply a fixed feature of government At the heart of the argument is the straightforward but versatile notion of the representative claim People claim to speak or stand for others in multiple shifting and surprising patterns At the same time they offer images of their constituents and audiences as artists paint portraits Who can speak for and about us in this volatile world of representations Which representative claims can have democratic legitimacy The Representative Claim is set to transform our core assumptions about what representation is and can be At a time when political representation is widely believed to be in crisis the book provides a timely and critical corrective to conventional wisdom on the present and potential future of representative democracy **Representative Government** Ingram, 1884 **Practical Guide for Facilitating CBNRM in Botswana** Corjan van der Jagt, Nico Rozemeijer, 2002 Congressional Record United States. Congress, 1995 **Doing Democracy Differently** Henrike Knappe, 2017-01-16 Transnational civil society networks have become increasingly important democratizing actors in global politics Still the exploration of

democracy in such networks remains conceptually and methodologically challenging Practice theory provides a framework to study democracy as routinized performances even in contexts of fluid boundaries temporal relations and a diffuse constituency The author attempts to understand how new forms of democratic practice emerge in the interaction between political actors and their structural environments

Constitutional Referendums Stephen Tierney, 2012-04-05 The constitutional referendum has become a vital feature of modern constitution making and reform This book provides the first full length analysis of the theoretical foundations of constitutional referendums assessing their democratic credentials and the design decisions that affect the value and legitimacy of the referendum process
