Watkins, Reid Hoffman, Ben Casnocha, Chris Yeh, 2015-10-13 The Leadership Transitions and Team Building Collection includes two important books The First 90 Days Updated and Expanded by Michael D Watkins and The Alliance by Reid Hoffman Ben Casnocha and Chris Yeh Transitions are a critical time for leaders In fact most agree that moving into a new role is the biggest challenge a manager will face While transitions offer a chance to start fresh and make needed changes in an organization they also place leaders in a position of acute vulnerability Missteps made during the crucial first three months in a new role can jeopardize or even derail your success In The First 90 Days Watkins offers proven strategies for conquering the challenges of transitions no matter where you are in your career The Alliance coauthored by the founder of LinkedIn introduces a new realistic loyalty pact between employer and employee The employer employee relationship is broken and managers face a seemingly impossible dilemma the old model of guaranteed long term employment no longer works in a business environment defined by continuous change but neither does a system in which every employee acts like a free agent The solution Stop thinking of employees as either family or as free agents Think of them instead as allies This bold but practical guide for managers and executives will give you the tools you need to recruit manage and retain the kind of employees who will make your company thrive in today's world of constant innovation and fast paced change

Unmasking School Leadership Ciaran Sugrue, 2014-10-06 This

book is a longitudinal life history of the lives and work of primary school principals in Ireland. It provides a unique opportunity to peer inside the realities of leading schools in changing times. In a system that until recently did not prepare principals for the onerous roles and responsibilities, a small system with limited mobility, interpersonal relationships emerge as critical, frequently privileged over professional relationships. Consequently, principals struggle to bring about change to build trust in order to cultivate a transformative leadership agenda while several aspects of systemic structures and processes emerge as constraints on leadership capacity building. In the absence of comprehensive leadership portfolio development, classroom teachers catapulted into the principal's office tend to be cautious and careful in ways that tend to perpetuate the status quo while putting a premium on the exercise of soft power and an over-reliance on the good will of colleagues. Several of the leadership lessons that emerge from this in-depth analysis concur with an increasing international consensus that due to complexity and increasingly performative policy demands, learning about leadership for all is an absolute necessity. However, care must be taken to avoid overly scripted programmes. Critical to the cultivation of a professionally responsible leadership disposition rather than capitulation to technologies of control is professional renewal cultivated through adequate attention to the Zone of Proximal Distance.
