Building Schools, Making Doctors Katherine L. Carroll, 2022-05-31 In the late nineteenth century medical educators intent on transforming American physicians into scientifically trained elite professionals recognized the value of medical school design for their reform efforts Between 1893 and 1940 nearly every medical college in the country rebuilt or substantially renovated its facility In Building Schools Making Doctors Katherine Carroll reveals how the schools constructed during this fifty year period did more than passively house a remodeled system of medical training they actively participated in defining and promoting an innovative pedagogy modern science and the new physician Interdisciplinary and wide ranging her study moves architecture from the periphery of medical education to the center uncovering a network of medical educators architects and philanthropists who believed that the educational environment itself shaped how students learned and the type of physicians they became Carroll offers the first comprehensive study of the science and pedagogy formulated by the buildings the influence of the schools donors and architects the impact of the structures on the urban landscape and the local community and the facilities privileging of white men within the medical profession during this formative period for physicians and medical schools From Humors to Medical Science John Duffy, 1993 John Duffy s classic history formerly titled The Healers has been thoroughly revised and

updated for this second edition which includes new chapters on women and minorities in medicine and on the challenges currently facing the health care field This remains the only comprehensive history of American medicine The treatment of the emergence of modern medicine and the flowering of surgery is especially fresh and well done As one of the respected scholars in our profession John Duffy has again demonstrated his wide knowledge of the subject Thomas N Brunner author of *To the Ends of the Earth Women s Search for Education in Medicine*

Corporate Patronage of Art and Architecture in the United States, Late 19th Century to the Present Monica E. Jovanovich, Melissa Renn, 2019-04-18 This interdisciplinary collection of case studies rethinks corporate patronage in the United States and reveals the central role corporations have played in shaping American culture This volume offers new methodologies and models for the subject of corporate patronage and contains an extensive bibliography on corporate patronage art collections and exhibitions sponsorship and philanthropy in the United States The case studies herein go beyond the usual focus on corporate sponsorship and collecting to explore the complex organizational networks and motivations behind corporate commissions Featuring chapters on Margaret Bourke White Julie Mehretu Maxfield Parrish Pablo Picasso Diego Rivera Eugene Savage Millard Sheets and Kehinde Wiley as well as studies on Andrew Carnegie Andrew Mellon John D Rockefeller Sr and Jr and Dorothy Shaver and companies such as Herman Miller and Lord and Taylor this volume looks at a wide array of works ranging from sculpture photography mosaics and murals to advertisements department store displays sportswear medical schools and public libraries

The History of Medical Education in Britain, 2020-01-29 Professional education forms a key element in the transmission of medical learning and skills in occupational solidarity and in creating and recreating the very image of the practitioner Yet the history of British medical education has hitherto been surprisingly neglected Building upon papers contributed to two conferences on the history of medical education in the early 1990s this volume presents new research and original synthesis on key aspects of medical instruction theoretical and practical from early medieval times into the present century Academic and practical aspects are equally examined and balanced attention is given to different sites of instruction be it the university or the hospital The crucial role of education in medical qualifications and professional licensing is also examined as is the part it has played in the regulation of the entry of women to the profession Contributors are Juanita Burnby W F Bynum Laurence M Geary Faye Getz Johanna Geyer Kordes S W F Holloway Stephen Jacyna Peter Murray Jones Helen King Susan C Lawrence Irvine Loudon Margaret Pelling Godelieve Van Heteren and John Harley Warner

An American Health Dilemma W. Michael Byrd, Linda A. Clayton, 2001-12-21 First published in 2002 An American Health Dilemma is the story of medicine in the United States from the perspective of people who were consistently officially mistreated abused or neglected by the Western medical tradition and the US health care system It is also the compelling story of African Americans fighting to participate fully in the health care professions in the face of racism and the increased power of health corporations and HMOs This tour de force of research on the relationship between race medicine and health care in the United States is an extraordinary achievement by

two of the leading lights in the field of public health Ten years out it is finally updated with a new third volume taking the story up to the present and beyond remaining the premiere and only reference on black public health and the history of African American medicine on the market today No one who is concerned with American race relations with access to and quality of health care or with justice and equality for humankind can afford to miss this powerful resource **The Indiana University School of Medicine** William H. Schneider,2021-03-01 The Indiana University School of Medicine A History tells the story of the school and its faculty and students in fascinating detail Founded in the early 20th century the Indiana University School of Medicine went on to become a leading medical facility preparing students for careers in medicine and providing healthcare across Indiana Historian William Schneider draws on a treasure trove of historical images and documents to recount how the school began life as the Medical Department in 1903 and later became the Indiana University School of Medicine which was established as a full four year school after merging with two private schools in 1908 Thanks to state support and local philanthropy it quickly added new hospitals which by the 1920s made it the core of a medical center for the city of Indianapolis and the only medical school in the state From modest beginnings and the challenges of the Great Depression and the Second World War the medical school has grown to meet the demands of every generation becoming the leading resource for not only the education of physicians and for the conducting of medical research but also for the care and treatment of patients at the multi hospital medical center Today the school boasts an annual income of over 1.5 billion with over 2,000 full time faculty teaching 1,350 MD students and over 250 million in external research funding *An American Health Dilemma: Race, medicine, and health care in the United States 1900-2000* W. Michael Byrd,Linda A. Clayton,2000 This volume is a comprehensive collection of critical essays on *The Taming of the Shrew* and includes extensive discussions of the play's various printed versions and its theatrical productions Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play The issues discussed include gender authority female autonomy and unruliness courtship and marriage language and speech and performance and theatricality *Curators and Culture* Joel J. Orosz,2002-06-28 The author researched ten museums founded prior to 1870 using primary sources Those chosen comprised a geographically diverse sample of pre 1870 American museums and covered a range of disciplines among them art history and natural science *The Birth of Development* Amy L. S. Staples,Amy L. Sayward,2006 A comprehensive examination of economic globalization Focused on the creation and evolution of post 1945 internationalist ideology *The Birth of Development* highlights efforts to diffuse the destructive role of the nation state in world affairs by constructing truly international organizations with global agendas the World Bank the Food and Agriculture Organization and the World Health Organization These organizations and the men and women who worked for them pioneered the advancement of the quality of life for all and established an ongoing obligation to promote worldwide economic development As author Amy Staples reveals the results of their efforts were mixed Grounded in archival research conducted in the archives of the World Bank Food and

Agriculture Organization and World Health Organization as well as in other archives in the United States Canada and Great Britain The Birth of Development provides a foundational understanding for many of today s debates on economic globalization especially those that involve the World Bank and World Trade Organization Given the current role of international peacekeepers and multinational aid agencies this story is timely and makes clear that the issues that confronted early postwar planners and reformers remain in many ways unsolved even today The Birth of Development is the only comparative study of these crucial architects of the theory and practice of economic development and it contributes significantly to the ongoing effort to view the postwar period as more than simply an East West Cold War It breaks new ground conceptually and methodologically and will be a welcome addition to the literature in the fields of modern diplomatic history and international relations *Homicidal Insanity, 1800-1985* Janet Colaizzi,2002-06-20 How physicians and later psychiatrists have diagnosed explained and restrained the dangerously insane Annotation copyrighted by Book News Inc Portland OR

History of Universities Mordechai Feingold,2014-03-27 This is one of the volumes in a series of books covering the history of universities It contains a mix of learned chapters and book reviews which covers topics related to higher education The volume provides original research and invaluable reference material **Tulane** Clarence L. Mohr,Joseph E. Gordon,2001-03-01 Tulane is the story of a southern school striving for national recognition in the post World War II era of American research universities Clarence L Mohr and Joseph E Gordon pre sent a candid in depth treatment of the 150 year old New Orleans institution during this transformative period when it grappled with such pervasive issues as federal and private funding academic freedom an enrollment surge set in motion by the GI Bill and sustained by the postwar baby boom the cold war desegregation the antiwar civil rights and student power movements expanding intercollegiate athletics censorship the clash between liberal and utilitarian conceptions of higher learning revision of curricular content and the role of universities as platforms for social criticism all of which together profoundly altered the mission of American higher learning In addition to these external forces the authors examine the many individuals administrators professors and students whose responses in both calm and crises shaped the evolution of Tulane s unique academic physical and demographic design Like its regional peers in the 1950s and 1960s Tulane faced the challenge of transcending its past without repudiating traditions of lasting value From a loose confederation of locally oriented undergraduate and professional schools it developed into a nationally focused research university serving a diverse student body selected through rigorous admissions standards Its journey over the past half century should remind those who support study or teach in American universities that their own institutions during that period have in a very real sense made history as well
