and students of conflict management who needed a deep yet practical view of conflict and methods for dealing with it The Dynamics of Conflict is the second edition of Mayer's classic book While building on the strengths of the first edition this thoroughly revised and updated book keeps pace with the most current trends and research in the field and explores four key concepts interactional dynamics system dynamics culture and conflict and conflict engagement Like the first edition the focus of the new edition is on the ways we can productively think about conflict and conflict intervention rather than on specific techniques and processes Mayer presents ideas about conflict as a set of conceptual tools that build on one another and contribute to a multifaceted view of conflict and conflict intervention but that also stand on their own Filled with illustrative examples the book draws from the author's thirty years of experience with interpersonal family community organizational labor management environmental public policy and international disputes and includes instances of conflicts that have been in the news In addition this vital resource contains information on the most important work that has been done in the past decade on culture systems and conflict engagement and shows how conflict concepts apply to new technologies such as online communication and conflict resolution efforts on the Web In the concluding chapter Mayer explores how conflict intervention efforts fit into more general values about peace democracy and social justice and the personal impact that conflict work as a field has on conflict specialists

The Fugitive Identity of Mediation Debbie De Girolamo, 2013-07-18 Despite much having been written about what mediation is direct observations of commercial mediations are limited This book grants an opportunity to observe mediation in action and also provides external commentary about the actions observed The book approaches Mediation ethnographically as a social process that is informed by structures rules and norms that colour the environment within which it operates Through the ethnographic method a process leading to negotiated order is examined baring its elements identifying its influences and studying the movement to order The result is the reconceptualization of mediation The mediator is invited into the negotiation as third party intervener He creates the process of mediation defining the process by his actions which ultimately merges mediator with process This book provides a window to the lived experience of participants to mediation it explores their understandings of and interactions within a process they have experienced together and demonstrates how mediation is a process inextricably linked to negotiation The Fugitive Identity of Mediation will be of interest to scholars mediators parties who participate in the process and to those active in public policy discourse
