E-COMMERCE AND ITS IMPACT ON GLOBAL BUSINESS Dr. Bhadrappa Haralayya,Dr. Sunil Kumar Vohra,Ms. Smiley Gandhi,Dr. Manoj Bharatram Pandey,2023-08-16 The transaction of products and services via the internet is referred to as e commerce which is an abbreviation of the phrase electronic commerce It includes conducting commercial transactions and the exchange of information goods and services through the internet between various organizations including consumers and enterprises E commerce has seen enormous growth in popularity and has fundamentally altered the method in which companies function as well as how customers purchase E commerce comprises a number of different models such as business to consumer B2C consumer to consumer C2C and consumer to business C2B E commerce that is conducted between companies and individual customers known as business to consumer or B2C for short takes place entirely online Transactions between companies are the primary emphasis of business to business or B2B e commerce which includes the sale of goods from wholesalers to retailers C2C e commerce refers to the practice of

consumers doing business directly with one another via the use of online marketplaces to purchase and sell goods and services. Consumers providing products or services to companies is an example of business to business or B2B e-commerce. This might include freelancing work or user-generated content. Many different things have contributed to the expansion of online shopping over the last few years. To begin, the proliferation of internet access and the steady march of technological progress have made it simpler for individuals to communicate with one another and do business through the internet. In addition, because of the ease of use and accessibility provided by e-commerce, this mode of doing business has become an appealing alternative for both consumers and companies. Consumers have the ability to buy from the convenience of their own homes while having access to a diverse selection of goods and services thanks to the rise of e-commerce, which also enables companies to access a worldwide client base and remain open around the clock. The term global business refers to the operation of commercial enterprises that extend beyond the confines of a single nation's borders. It includes the trading of products, people, services, and resources between other nations or areas of the world. The facilitation of commercial connections on a worldwide scale has been significantly aided by the rise of globalization, as well as developments in transportation, communication, and technology. International commerce, foreign direct investment (also known as FDI), outsourcing, and multinational businesses (also known as MNCs) are all components that are included in global business. The movement of products and services across international boundaries is a fundamental aspect of international commerce. When a domestic corporation expands its activities into another nation, this is an example of foreign direct investment (FDI). The term outsourcing refers to the practice of contracting a business process or service to an external provider who is often based in a foreign nation in order to take advantage of the cost benefits or specialized skills offered by the external supplier. Multinational corporations (MNCs) are businesses that have activities and assets in more than one nation. This gives them the ability to do business on a worldwide scale. Participating in economic activities on a global scale comes with a number of benefits. It gives them access to broader markets, enables them to tap into new consumer groups, and helps them to diversify their income. Sources: Companies may also reap the benefits of cost savings by doing business on a global scale. This might include gaining access to cheaper manufacturing costs or capitalizing on the specialized talents and resources that are readily accessible in other nations. In addition, globalization has made it easier for people to share their information and ideas with one another, which has led to an increase in innovative practices and cross-national cooperation. However, doing business on a global scale also presents a number of problems. Companies are required to negotiate multiple cultural, legal, and regulatory settings, as well as manage the varying preferences of their customers and the circumstances of their target markets. They need to be able to comprehend various economic systems, languages, and commercial practices, as well as adapt to such differences. In addition, the likes of geopolitical considerations, trade restrictions, and currency changes may all have an effect on the operations of multinational businesses.
