Shutting Out the Sun Michael Zielenziger,2007-09-04 The world s second wealthiest country Japan once seemed poised to overtake America as the leading global economic powerhouse But the country failed to recover from the staggering economic collapse of the early 1990s Today it confronts an array of disturbing social trends notably a population of more than one million hikikomori the young men who shut themselves in their rooms withdrawing from society There is also a growing numbers of parasite singles single women who refuse to leave home marry or bear children In this trenchant investigation Michael Zielenziger argues that Japan s tradition steeped society its aversion to change and its distrust of individuality are stifling economic revival political reform and social evolution Shutting Out the Sun is a bold explanation of Japan s stagnation and its implications for the rest of the world

Modern Korea and Its Others Vladimir Tikhonov,2015-11-19 The period spanning the 1880s to 1945 was a crucially important formative time for Korea during which understandings of modernity were largely shaped by the images of Korea s neighbours to the east west and north China Japan and Russia represented at some moments modern threats but also denoted a range of alternative modernity possibilities and ultimately provided a model for Korea s pre colonial and colonial modernity This book explores the way in which modern Korea perceived its geographic neighbours from the 1890s until 1945 It shows that Korea s modern nationalism was at the same time internationalist in its orientation as the vision of Korea s ideal place in the world and brighter national future was often linked to the examples positive and negative threats perceived and real and allies abroad Exploring the importance of the international knowledge and experience for the formation of the Korean nationalist paradigms it offers nuance to the existing picture of the international connections and environment of the Korean national movements It shows that the picture of Japan inside the anti Japanese independence movement of the colonial period was more complicated than simple hatred of the invaders modern achievements of Japan were admired even by anti colonial nationalists as a possible model for Korea The book also demonstrates the extent to which Chinese and Soviet revolutions influenced the thinking of modern Korean intellectuals across the whole ideological spectrum Introducing new sources presented in English for the first time and including themes such as race and ethnicity global revolution and gender this book will be of great interest to students and scholars of Korean East Asian and Russian history as well as historians of the colonial modern era more generally

Ideologies of Race David Rainbow,2019-10-17 Is the concept of race applicable to Russia and the Soviet Union Citing the idea of Russian exceptionalism many would argue that in the nineteenth and twentieth centuries while nationalities mattered race did not Others insist that race mattered no less in Russia than it did for European neighbours and countries overseas These conflicting notions have made it difficult to understand rising racial tensions in Russian and Eurasian societies in recent years A collection of new studies that reevaluate the meaning of race in Russia and the Soviet Union *Ideologies of Race* brings together historians literary scholars and anthropologists of Russia the Soviet Union Western Europe the United States the Caribbean and Latin America The essays shift the principle question from whether race meant the same thing in the region as it did in the classic racialized regimes such as Nazi Germany and the United States to how race worked in Russia and the Soviet Union during various periods in time Approaching race as an ideology this book illuminates the complicated and sometimes contradictory intersection between ideas about race and racializing practices An essential reminder of the tensions and biases that have had a direct and lasting impact on Russia *Ideologies of Race* yields crucial insights into the global history of race and its ongoing effects in the contemporary world Contributors include Adrienne Edgar University of California Santa Barbara Aisha Khan New York University Alaina Lemon University of Michigan Susanna Soojung Lim University of Oregon Marina Mogilner University of Illinois Chicago Brigid O Keefe Brooklyn College David Rainbow University of Houston Gunja SenGupta Brooklyn College Vera Tolz University of Manchester Anika Walke Washington University St Louis Barbara Weinstein New York University and Eric Weitz City University of New York
