## **Making Of The Scottish Countryside:**

*The Making of the Scottish Countryside* M.L. Parry, T.R. Slater, 1980-01-01      **Exploring the Scottish Past** Thomas Martin Devine, 1995 This is a collection of fifteen essays written over the last twenty years by one of Scotland's most eminent historians. The material concentrates on four broad themes in seventeenth, eighteenth and nineteenth century Scottish history: Merchants, Unions and Trade, Scottish Economic Development, The Highlands and the Rural Lowlands.      *The Scottish Countryside* Rosemary Gibson, 2007 Making use of the extensive plans held by the National Archives of Scotland to illustrate the great change on the face of the country, this selection from the 100,000 plans shows the value of these sources for many aspects of Scotland's past and to display snapshots of the landscape through three centuries of change.      *The Changing Scottish Landscape* Ian Whyte, Kathleen Whyte, 2021-10-12 Originally published in 1991 and focussing on the countryside, this book examines patterns of settlement and agriculture in Scotland and considers how these were increasingly altered during the 17th and 18th Centuries by the first Improvers and then by the more widespread impact of the Agricultural Revolution. It considers the effect on the landscape of the changing role of the church, the development of improved communications and the rise of new industries. The book analyses in detail the ways in which the landscape changed in Scotland's transition from a medieval impoverished country and an undeveloped economy to a modern society and one of the most highly urbanised countries in Europe.      *The Making of the Scottish Rural Landscape* David Turnock, 2016-12-05 This book looks at the evolution of rural settlement in Scotland from the Mesolithic period through to the improving movement of the 18th and 19th centuries. The main emphasis is on changes in society and technology, but the book also considers how the development of the physical landscape laid the foundation for such changes. The author strikes a balance between general perspectives including relevant contextual materials such as the political structures and local studies with much emphasis on individual sites. Lack of documentation prior to the 10th century places particular importance on the archaeological evidence, but imaginative interpretation of this evidence has led to a major re-evaluation. Ideas emphasizing continuity of settlement and local adaptation are replacing older invasionist theories emphasizing Celtic warlords and broch-building pirates.      **Countryside Management** Mr Peter Bromley, 2013-11-05 Countryside management is a rapidly growing area of interest. The only management book aimed specifically at countryside managers includes case studies.      *The Late Medieval Landscape of North-east Scotland* Colin Shepherd, 2021-10-31 The landscape of the north east of Scotland ranges from wild mountains to undulating farmlands, from cosy quaint fishing coves to long sandy bays. This landscape witnessed the death of MacBeth, the final stand of the Comyns earls of Buchan against Robert the Bruce and the last victory in Britain of a Catholic army at Glenlivet. But behind these momentous battles lie the quieter histories of ordinary folk farming the land and supping their local malts. Colin Shepherd paints a picture of rural life within the landscapes of the north east between the 13th and 18th centuries by using documentary, cartographic and archaeological evidence. He shows

how the landscape was ordered by topographic and environmental constraints that resulted in great variation across the region and considers the evidence for the way late medieval lifestyles developed and blended sustainably within their environments to create a patchwork of cultural and agricultural diversity However these socio economic developments subsequently led to a breakdown of this structure resulting in what Adam Smith in the 18th century described as oppression The 12th century Renaissance the Protestant Reformation and the Industrial Revolution are used here to define a framework for considering the cultural changes that affected this region of Scotland These include the dispossession of rights to land ownership that continue to haunt policy makers in the Scottish government today While the story also shows how a regional cultural divergence recognized here can undermine big theories of socio political change when viewed across the wider stage of Europe and the Americas

**History of the Native Woodlands of Scotland 1500-1920** T. C. Smout, 2007-09-15 The first modern history of Scottish woodlands this highly illustrated volume explores the changing relationship between trees and people from the time of Scotland's first settlement focusing on the period 1500 to 1920 Drawing on work in natural science geography and history as well as on the authors own research it presents an accessible and readable account that balances social economic and environmental factors Two opening chapters describe the early history of the woodlands The book is then divided into chapters that consider traditional uses and management the impact of outsiders on the pine woods and the oakwoods in the first phase of exploitation and the effect of industrialization Separate chapters are devoted to case studies of management at Strathcarron Glenorchy Rothiemurchus and on Skye

**Changing Values in Medieval Scotland** Elizabeth Gemmill, Nicholas Mayhew, 1995-06 This is a full scale study of prices in medieval Scotland c 1260 1542 which includes detailed discussions of coinage and weights and measures Nearly 6000 prices are listed individually average prices are calculated for each commodity and for groups of commodities such as cereals and livestock Scots prices are compared with English and the significance of the data for the economic history of medieval Scotland is analyzed fully This is the only full study to have been undertaken on Scots medieval prices and there is no comparable work on Scottish medieval economic history in print

**Landscapes of Protest in the Scottish Highlands after 1914** Iain J.M. Robertson, 2016-04-15 In November 1918 the implementation of agrarian change in the Scottish Highlands threatened another wave of unemployment and eviction for the land working population which led to widespread and varied social protest Those who had been away on war service and their families faced returning to exactly the same social and economic conditions in the Scottish Highlands they had hoped they had left behind in the struggle to make a land fit for heroes Widespread and varied social protest rapidly followed It argues that previously there has been a failure to capture fully the geography chronology typology and rate of occurrence of these events The book not only offers new insights and a greater understanding of what was happening in the Highlands in this period but illustrates how a range of forms of protest were used which demand attention not least for the fact that these events unlike most of the earlier Land Wars period were successful There are functioning townships in the

Highlands today that owe their existence to the land invasions of the 1920s The book innovatively concentrates on formulating explanation and interpretation from within and looks to the crofting landscape as base means and motive to disturbance and interpretation It proposes that protest is much more convincingly understood as an expression of environmental ethics from the bottom up coming increasingly into conflict with conservationist views expressed from the top down It focuses on individual case studies in order to engage more convincingly with an important evidential base that of popular memory of land disturbances and to adopt a frame and lens through which to explore the fluid and contingent nature of protest performances Based upon the belief that in the study of landscapes of social protest the old shibboleth of space as solely passive setting and symbolic register is no longer tenable is paid here to nature culture interactions to vernacular ecological b

History of Everyday Life in Scotland, 1800 to 1900 Graeme Morton, 2010-08-31 This volume explores the experience of everyday life in Scotland over two centuries characterised by political religious and intellectual change and ferment It shows how the extraordinary impinged on the ordinary and reveals people s anxieties joys comforts passions hopes and fears It also aims to provide a measure of how the impact of change varied from place to place The authors draw on a wide range of primary and secondary sources including the material survivals of daily life in town and country and on the history of government religion ideas painting literature and architecture As B S Gregory has put it everyday history is an endeavour that seeks to identify and integrate everything all relevant material social political and cultural data that permits the fullest possible reconstruction of ordinary life experiences in all their varied complexity as they are formed and transformed

Scottish Literacy and the Scottish Identity R. A. Houston, 2002-06-20 This book tests the belief that Scotland had the most literate population in the early modern world

**The Oxford Illustrated History of Tudor & Stuart Britain** John Stephen Morrill, 1996 Two centuries of dramatic change are covered by this exciting and richly illustrated work Eighteen leading scholars explore the political social religious and cultural history of the period when monarchs based in south east England imperfectly attempted to extend their authority over the whole of the British Isles These centuries witnessed the Reformation the civil wars and two revolutions in which two monarchs two wives of a king and two archbishops of Canterbury were tried and executed and hundreds of men and women tortured and burned in the name of religion Yet in the same period an explosion of literacy and the printed word transformations in landscapes and townscapes new forms of wealth new structures of power and new forms

of political participation freed minds and broadened horizons These centuries marked the beginning of Britain's imperial power and its emergence as perhaps the most liberal and mature of European states The integrated illustrations and maps form an essential part of the book complementing all aspects of the text It also contains a Chronology Glossary Family Trees of the monarchy Further Reading and an extensive Index

*The Landscape of Britain* Michael Reed, 2002-11-01 The Landscape of Britain has a uniquely rich historical diversity In this book explains the processes at work in the evolution of the landscape pointing out examples of surviving evidence from the past The landscape of late twentieth century Britain is the end product of some ten thousand years of human effort directed not only towards satisfying basic physical needs for food and shelter but also towards expressing profound spiritual and intellectual aspirations whether by means of burial mounds or churches schools or monasteries The author shows how each generation makes its own individual contribution without being able entirely to erase those of its predecessors however remote or distant in time

**Lord and Peasant in Nineteenth Century Britain** Dennis Mills, 2016-06-17 First published in 1980 this book looks at the social structure of 18th and 19th century rural Britain It is particularly concerned with the relationship of landlord and peasant in the rural village and examines the open closed model of English rural social structure in great depth In doing so it explores the ways in which the estate system influenced urban development and how the peasant system facilitated the industrialisation of many villages This book will be of particular interest to students of Victorian and social history industrialisation and urbanisation

**The Historical Geography of Scotland Since 1707** David Turnock, 2005-08-04 This is the first book to take a comprehensive view of the historical geography of Scotland since the Union The period is divided into sections separated by the Napoleonic Wars and the First World War and each section offers a general view followed by detailed studies giving a balanced coverage of regional and urban rural criteria and the economic infrastructure The book contains a number of original researches and Dr Turnock attempts to set the Scottish experience in a framework of general ideas on modernisation

Scotland: Archaeology and Early History J N Graham Ritchie, 2019-08-07 No detailed description available for Scotland

**Gaelic Scotland** Charles W J Withers, 2015-12-14 This book originally published in 1988 examines the Highlands and Islands of Scotland over several centuries and charts their cultural transformation from a separate region into one where the processes of anglicisation have largely succeeded It analyses the many aspects of change including the policies of successive governments the decline of the Gaelic language the depressing of much of the population into peasantry and the clearances

Society and Economy in Modern Britain 1700-1850 Richard Brown, 2002-11-01 For both contemporaries and later historians the Industrial Revolution is viewed as a turning point in modern British history There is no doubt that change occurred but what was the nature of that change and how did it affect rural and urban society Beginning with an examination of the nature of history and Britain in 1700 this volume focuses on the economic and social aspects of the Industrial Revolution Unlike many previous textbooks on the same period it emphasizes British history and deals with developments in

Wales Scotland and Ireland in their own right It is the emphasis on the diversity not the uniformity of experience on continuities as well as change in this crucial period of development which makes this volume distinctive In his companion title Richard Brown completes his examination of the period and looks at the changes that took place in Britain s political system and in its religious affiliations
