Identity Economics George A. Akerlof, Rachel E. Kranton, 2010-01-21 How identity influences the economic choices we make Identity Economics provides an important and compelling new way to understand human behavior revealing how our identities and not just economic incentives influence our decisions In 1995 economist Rachel Kranton wrote future Nobel Prize winner George Akerlof a letter insisting that his most recent paper was wrong Identity she argued was the missing element that would help to explain why people facing the same economic circumstances would make different choices This was the beginning of a fourteen year collaboration and of Identity Economics The authors explain how our conception of who we are and who we want to be may shape our economic lives more than any other factor affecting how hard we work and how we learn spend and save Identity economics is a new way to understand people's decisions at work at school and at home With it we can better appreciate why incentives like stock options work or don't why some schools succeed and others don't why some cities and towns don't invest in their futures and much much more Identity Economics bridges a critical gap in the social sciences It brings identity and norms to economics People's notions of what is proper and what is forbidden and for whom are fundamental to how hard they work and how they learn spend and save Thus people's identity their conception of who they are and of who they choose to be may be the most important factor affecting their economic lives And the limits placed by society on people's identity can also be crucial determinants of their economic well being
