New Directions In Memory And Aging Proceedings Of The George A Talland Memorial Conference:

New Directions in Memory and Aging (PLE: Memory) Leonard Poon, James Fozard, Laird Cermak, David Arenberg, Larry Thompson, 2014-05-09 Originally published in 1980 this book contains the proceedings from a memorial conference held in honour of George A Talland who made a significant contribution to the area of memory and aging The major objective of the volume was to stimulate research towards a more comprehensive understanding of age related differences in memory It was also hoped it would provide direction for the application and utilization of research findings in the evaluation and treatment of memory complaints and memory difficulties experienced by the elderly The book was intended for two broad groups of scientists The first being researchers in the psychology of memory and those who were currently active in the research on aging at the time The second group was those concerned with applying current research findings to the diagnosis and treatment of problems of memory

New Directions in Memory and Aging Leonard W. Poon, 1980

Aging and Cognition E.A. Lovelace, 1990-12-11 Presented in this volume is a discussion of current literature and theoretical issues relating to three aspects of late life age related cognitive change Firstly evidence regarding aging and the basic mental processes of attention motor control memory language problem solving and intelligence are presented Secondly the role of personal traits such as personality and self efficacy in the aging of cognitive function are developed along with self awareness of cognitive processes and age changes in the monitoring of these processes Thirdly consideration is given to the study of interventions to delay or remediate the cognitive declines of aging

Handbook of Clinical Behavior Therapy with the Elderly Client Patricia A. Wisocki, 2013-11-21 Although we speak of the elderly as if there were one body of people with common characteristics older adults are more heterogeneous than any other population People over the age of 65 are also the fastest growing segment of the population in the United States currently numbering 25 million The majority of older adults reside in their communities a small fraction of them are cared for in institutions Most may expect to experience some kind of physical impairment Approximately a quarter of the population may expect to suffer a mental health impairment While traditional therapies have not been especially effective for older adults behavior therapy has shown exceptional promise as a treatment modality This book presents a comprehensive explication of the relatively new field of behavioral gerontology It was written for the clinician interested in the interaction of medical environmental and psychological variables and their effects on treatment of elderly clients and for the researcher who will be looking to extend knowledge about interventions with this population It will be useful for the graduate student in clinical psychology as well as the experienced clinician who will want to include the elderly in his or her therapeutic population

Everyday Cognition in Adulthood and Late Life Leonard W. Poon, David C. Rubin, Barbara A. Wilson, 1992-01-31 The authors present relevant data that open up new directions for those studying cognitive aging

Light, Deborah M. Burke, 1993-07-30 From a cognitive standpoint the authors consider the role of awareness in memory and language

The Elderly Eyewitness in Court Michael P. Toglia, David F. Ross, Joanna Pozzulo, Emily Pica, 2014-02-18 The majority of research on eyewitness memory has traditionally studied children and young adults By contrast this volume is designed to provide an overview of empirical research on the cognitive social and health related factors that impact the accuracy of eyewitness testimony given by the elderly The book takes a lifespan developmental perspective that incorporates research on witnesses of all ages but uses the findings to focus on issues unique to the elderly This includes research on recognition memory with lineup identifications and recall memory that occurs when an elderly witness is asked to describe an event in court The Elderly Eyewitness also examines jurors reactions to the testimony of an elderly witness and the legal and social policy issues that emerge when the elderly witness participate in legal proceedings While reviewing what is known about the elderly witness the book also provides a direction for future research into this new frontier of scientific inquiry Its audience spans researchers in cognitive and developmental psychology and professionals working in the growing area of psychology and law **Annual Review of Gerontology and Geriatrics, Volume 7, 1987** K. Warner Schaie, PhD, 1987-11-15 This volume of the ARGG is devoted to the behavioral sciences with particular attention given to topics in experimental and applied psychology With the rapid rate of research in this field of aging the contributors address a number of important basic and applied topics that are underrepresented in other literature

Aging and Cognition T.M. Hess, 1990-10-09 During the past two decades there has been a dramatic increase in interest in the study of aging related changes in cognitive abilities In

this volume researchers from a variety of theoretical perspectives discuss adult age differences in a wide range of cognitive skills Of special interest is the extent to which aging effects on performance are related to variations in the representation organization and utilization of knowledge broadly defined Recent research and theory in the field of aging has emphasized the need to examine such processes more closely in order to provide a more complete understanding of aging effects on cognitive behavior

Compensating for Psychological Deficits and Declines Roger A. Dixon, Lars B. Backman, Lars Backman, 2013-06-17 The concept of compensation in psychology refers to processes through which a gap or mismatch between current accessible skills and environmental demands is reduced or closed These gaps can be principally the result of losses such as those associated with aging or interpersonal role changes injuries such as those that may occur to the neurological or sensory systems organic or functional diseases such as the dementias or schizophrenia and congenital deficits such as those apparent in autism or some learning disabilities Whether the demand skill gaps can be bridged completely reduced only moderately or are impossible to close depends on a variety of factors In every case however the guiding notions of compensation are that some such deficits may be amendable the continuation of the effects of the gap may be avoidable and some functioning may be recoverable In this sense compensation is related to adaptation it is about overcoming deficits managing the effects of losses and promoting improvement in psychological functioning Compensation is a concept that has a long and rich history in numerous domains of psychological research and practice To date however few of the relevant research domains have benefitted explicitly or optimally from considering alternative perspectives on the concept of compensation Although researchers and practitioners in several areas of psychology have actively pursued programs with compensation as a central concept communication across disciplinary divides has been lacking Comparing and contrasting the uses and implications of the concept across neighboring and even not so adjacent areas of psychology can promote advances in both theoretical and practical pursuits The goal of this book is to carry inchoate integrative efforts to a new level of clarity To this end the editors have recruited major authors from selected principal areas of research and practice in psychological compensation The authors review the current state of compensation scholarship in their domains of specialization State of the art reviews of this rapidly expanding area of scholarship are therefore collected under one cover for the first time In this way a wide variety of readers who might otherwise rarely cross professional paths with one another can quickly learn about alternative preferences agendas and methods as well as novel research results interpretations and practical applications Designed to contain broad deep and current perspectives on compensation this volume continues the processes of explicating the concept of compensation linking and distinguishing compensation from neighboring concepts describing the variety of compensatory mechanisms operating in a wide range of phenomena and illustrating how compensatory mechanisms can be harnessed or trained to manage losses or deficits and to promote gains or at least maintenance of functioning

Maintaining Safe Mobility in an Aging Society David W. Eby, Lisa J. Molnar, Paula S.

Shamim I. Ahmad,2017-10-30 This book is a detailed and comprehensive synthesis of the scientific study of aging Dozens of contributions from leading scholars review various theories of aging and molecular cellular biochemical and microbial aspects of aging among just a few of the topics included Authoritative wide ranging and thorough this book will act as a source for experimental design a comprehensive description of age related diseases and provide information of the latest molecular theories underlying their causes Additionally it will target industries involved in developing anti aging drugs post graduate medical students and university libraries **Cognitive Rehabilitation in Old Age** Robert D. Hill,Lars Backman,Anna Stigsdotter-Neely,2000-04-13 Cognitive deficits are part of the normal aging process and are exacerbated by various diseases that affect adults in old age such as dementia depression and stroke A significant scientific and social effort has been expended to evaluate whether cognitive deficits can be remedied through systematic interventions The editors as well as the chapter authors represent a variety of viewpoints that span theory as well as practice Overall they aim to address concepts in cognitive rehabilitation that are useful in intervention research research which examines problems and issues in normal and pathological aging and focusing on the application of cognitive training strategies in natural settings Thus the book is grounded in contemporary theory in cognitive aging and is applicable to both the practicing clinician as well as the researcher It is organized into four sections The first highlights prominent theoretical principles the second looks at cognitive rehabilitation strategies in normal aging the third examines the interplay between lifestyle patterns and cognitive function through applying a broad definition of lifestyle choices and the fourth focuses on rehabilitation strategies that address issues in pathological or diseased aging **Major Issues in Cognitive Aging** Timothy Salthouse,2010 In recent years the field of cognitive aging has flourished and expanded into many different disciplines It is probably therefore inevitable that some of the research has become very narrow primarily focused on counting and classifying the wrinkles of aged behavior rather than addressing more broad general and important questions Timothy Salthouse s main goal in this book is to try to identify some of the major phenomena in the field of cognitive aging and discuss issues relevant to the investigation and interpretation of them He does not attempt to provide a comprehensive survey of the research literature on aging and cognition because many excellent reviews are available in edited handbooks His principal aim is rather to stimulate readers to think about the big questions in cognitive aging research and how they might best be answered *The Development of Spatial Cognition* Robert Cohen,2013-08-21 First published in 1985 The present book represents a statement of the state of the art in a very important aspect of spatial cognition its development **Annual Review of Gerontology and Geriatrics, Volume 18, 1998** M. Powell Lawton, PhD,1998-11-01 Focuses on behavioral and pharmacologic interventions for depression

treatments of late life insomnia behavior interventions in nursing homes interventions for incontinence and home modification interventions For clinicians and researchers *Cognitive Strategy Research* M. Pressley, J. R. Levin, 2012-12-06

For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books devoted to work in cognitive development is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The flagship for the Springer Series is a serial publication of the advances type carrying the subtitle *Progress in Cognitive Development Research* Each volume in the Progress sequence is strongly thematic in that it is limited to some well defined domain of cognitive developmental research e g logical and mathematical development development of learning All Progress volumes will be edited collections Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors are being published as separate volumes within the series

Psychotherapy with Older Adults Bob G. Knight, 2004-02-20 This Third Edition of the bestselling *Psychotherapy with Older Adults* continues to offer students and professionals a thorough overview of psychotherapy with older adults Using the contextual cohort based maturity specific challenge CCMSC model it draws upon findings from scientific gerontology and life span developmental psychology to describe how psychotherapy needs to be adapted for work with older adults as well as when it is similar to therapeutic work with younger adults Sensitively linking both research and experience author Bob G Knight provides a practical account of the knowledge technique and skills necessary to work with older adults in a therapeutic relationship This volume considers the essentials of gerontology as well as the nature of therapy in depth focusing on special content areas and common themes *Psychotherapy with Older Adults* includes a comprehensive discussion of assessment and options for intervention Numerous case examples illustrate the dynamics of the therapeutic task and issues covered in therapy and stress the human element in working with older adults A concluding chapter considers ethical questions and the future of psychotherapy with older adults The author has updated the Third Edition to reflect new research findings and has written two entirely new chapters covering psychotherapy with persons with dementia and psychotherapy with caregivers of frail older adults Since its initial publication in 1986 the book has been used as a course text and a professional reference around the world including translations into French Dutch Chinese and Japanese It is a vital resource for practicing therapists and counselors who work with older adults and is also ideally suited as a text for advanced students in psychology social work gerontology and nursing Praise for Previous Editions Bob G Knight s largest contribution is his excellent discussion of therapy The book is clearly written with a good use of

summaries and case examples to clarify the major points By linking research findings to practice experience Knight has provided a pragmatic introduction which should be helpful to psychiatrists psychologists social workers and psychiatric nurses working with older adults JOURNAL OF APPLIED GERONTOLOGY I recommend this book to anyone interested in working with the elderly partly because of the content and partly because the author presents the case for doing psychotherapy with the elderly with realism and enthusiasm BEHAVIOR RESEARCH THERAPY **Behavioral Neurology in the Elderly** Jose Leon-Carrion, Margaret Giannini, 2001-06-27 It is important to understand the relationship between the brain cognition and behavior when providing care to the elderly Behavioral Neurology in the Elderly provides a comprehensive overview of this significant relationship one of the most important topics concerning medical and behavioral gerontology today It provides insight into how the ag

The Must-Read : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. New Directions In Memory And Aging Proceedings Of The George A Talland Memorial Conference : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
