Philosophie Der Freude:

Manifesto of Evolutionary Humanism Michael Schmidt-Salomon, 2014-09-10 We are living in a time of asynchrony While technologically we are firmly in the 21st century our world views are still characterized by ancient legends which are thousands of years old This combination of high level technical ability and highly naive child like beliefs could have disastrous consequences in the long run We are behaving like five year olds who have been given responsibility for a jumbo jet One of the most depressing problems of our time lies in religious fundamentalists of all stripes casually making use of the fruits of the Enlightenment freedom of expression constitutionality science technology in order to prevent its principles being applied to the domain of their own belief For example to further their beliefs the 9 11 terrorists used airplanes constructed on the basis of scientific principles principles to which their beliefs could never stand up In return the fundamentalist with other means George W Bush led the world into a devastating crusade against terror and the axis of evil making use of a technology which could never have been developed if scientists had contented themselves with the American President's child like faith that the Bible's creation account is true In the face of the dangers arising from the renaissance of unenlightened thinking in a technologically highly developed era it is a matter of intellectual integrity to speak out clearly especially where religion is concerned Anyone who is capable of splitting the atom and communicating via satellites must possess intellectual and emotional maturity That certain people or groups of persons avoid exposure to criticism by establishing holy i.e. untouchable rules and uphold their fallacies as mandatory for all time may and can no longer be accepted practice in a modern society

Debate and Dialogue Majastina Kahlos, 2016-05-13 This book explores the construction of Christian identity in fourth and fifth centuries through inventing fabricating and sharpening binary oppositions Such oppositions for example Christians pagans truth falsehood the one true god the multitude of demons the right religion superstition served to create and reinforce the Christian self identity The author examines how the Christian argumentation against pagans was intertwined with self perception and self affirmation Discussing the relations and interaction between pagan and Christian cultures this book aims at widening historical understanding of the cultural conflicts and the otherness in world history thus contributing to the ongoing discussion about the historical and conceptual basis of cultural tolerance and intolerance This book offers a valuable contribution to contemporary scholarly debate about Late Antique religious history and the relationship between Christianity and other religions

Epicurus: An Introduction J. M. Rist, 1972-06-29 Professor Rist's account of Epicurus mediates between the extremes of approval and opposition traditionally accorded to him and he emerges as an ideologist a pragmatic philosopher whose most notable achievement was to reject the prevailing social ethos of Hellenism and assert the rights of the individual against those of the community or state
