**Psychiatric and Mental Health Nursing for Canadian Practice** Wendy Austin, Mary Ann Boyd, 2010-01-01 Rev ed of Psychiatric nursing for Canadian practice Wendy Austin Mary Ann Boyd

**Key Debates in Psychiatric/Mental Health Nursing** John R Cutcliffe, Martin Ward, 2006-10-12 This book is unique because no other psychiatric mental health nursing text has ever brought together opposing or contrasting views of the same issue and subsequently invited two separate chapters to be written in order to articulate the different perspectives in the debate Further no book has then followed up such a wide and thorough discussion by inviting a third party to offer commentary The purpose of this book is to present a range of key issues that psychiatric mental health nurses face They are

practice policy research and education related issues The purpose then is to present the most complete balanced arguments possible in order to inform educate and stimulate psychiatric mental health nurses Furthermore the purpose of the book is to make psychiatric mental health nurses more aware of the often uncertain nature of much of psychiatric mental health nursing practice and knowledge Psychiatric mental health nursing is not characterised by black and white easily delineated issues and is perhaps characterised by various shades of grey Indeed it is often stated as axiomatic that psychiatric mental health nurses can be described as a broad church Consequently the purpose of this book is to help psychiatric mental health nurses appreciate this broad church be able to understand the various shades of grey be able to understand that often there are differing views inconclusive arguments and contentious debates and for this to influence their clinical practice As the international range of contributors illustrates these debates to a greater or lesser extent are issues and debates that psychiatric mental health nurses face the world over these are matters of real international importance and significance These issues have been touched upon and to a limited extent debated at psychiatric mental health nursing conferences and to an even lesser extent within some psychiatric mental health nursing journals Thus they are real issues that many nurses are facing talking about and trying to resolve key debates are presented with arguments from opposing viewpoints followed by a third party commentary to give readers the necessary information to form their own view written by a range of international authors from different countries across three continents one of the first psychiatric mental health nursing books to explore the pedagogical value of debate      *Nursing Theory, Postmodernism, Post-structuralism, and Foucault* Olga

Petrovskaya, 2022-09-30 Nursing Theory Postmodernism Post structuralism and Foucault critiques mainstream American nursing theory and its use of post structural theory comparing and contrasting how postmodern and post structural ideas have been used fruitfully in nursing research and theorizing elsewhere In the late 1980s references to post structuralism and Michel Foucault started to appear in nursing journals Since then hundreds of nursing publications have cited postmodernism and key post structural ideas such as power knowledge discourse and de centring the human subject In Nursing Theory Postmodernism Post structuralism and Foucault Olga Petrovskaya argues that the application of these ideas is markedly different in American nursing theory scholarship compared to nursing theoretical scholarship generated outside the canon of unique nursing theory Analysing relevant literature from the late 1980s through 2010s she demonstrates this difference arguing that American nursing theory calcified into a matrix of dogmas built on logical positivism wary of borrowed theory and loyal to a unique nursing science Post structural ideas that fit the matrix such as criticism of medicine are sanctioned whereas ideas sceptical of humanistic agendas including those that challenge American nursing theory are rendered meaningless In contrast other nurse scholars from Britain Australia Canada and what the author calls the American enclave group engaged with postmodern and post structural perspectives to enrich their research and invite readers to rethink nursing practice The book showcases examples of their intelligent creative theorizing Arguing that American nursing theory

enervated nursing theorizing Petrovskaya calls for opening this matrix to theoretical and methodological creativity less rigid categories of scholarship and healthy self examination Making the case that post structural ideas are vital for nurses ability to critically reflect on their discipline and profession this is a necessary read for all those interested in nursing theory philosophy and praxis Chapter 1 of this book is available for free in PDF format as Open Access from the individual product page at [www.routledge.com](http://www.routledge.com) It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

*Narratives of Art Practice and Mental Wellbeing* Olivia Sagan, 2014-10-17 *Narratives of Art Practice and Mental Wellbeing* draws on extensive research carried out with mental health service users who are also practicing artists Using narrative data gained through hours of reflective conversation it explores not whether art can contribute to positive wellbeing and improved mental health as this is now established ground but rather how art works and the role art making can play in people's lives as they encounter crises relapse recovery or beyonding The book maps the delicate ways in which finding a means to tell our story sometimes is the creative project we seek and offers a reminder of how intrinsically linked our life trajectories are with creative opportunities It describes the wide range of artistic activity occurring in health and community settings and the meanings of these practices to people with histories of mental turbulence Drawing on psychoanalytic theory the book explores the stories and various forms of visual arts practices spoken of and considers the art making processes the creative moments and the objects which in some cases have changed people's lives The seven chapters of the book offer a blend of personal testimony theory debate critique and celebration and examine key topics of deliberation within the fields of art therapy arts in health community arts practice participatory arts and widening participation within arts education It will be valuable reading for researchers students artists and practitioners in these fields
