The Philosophy of Buddhism A. Verdu, 1981-09-30 The riddles that world causation pose to the human mind lie at the bottom of all cosmological systems of thought In their origins all philosophical attitudes are conditioned by partiality and perspectivism The philosopher's attempted flight towards the seemingly remote kingdom of truth is often aborted by the binding twines of perspectival language Thus his insights lose themselves in conflicting contradictory manifestos Greek cosmology as it is formally set forth by the pre Socratics is a clear example of this weary pilgrimage of mind's embodied vision from angle to angle from perspective to perspective Not less is to be expected from the systems of Hinduism and mutatis mutandis also of Buddhist thought More confined from the very outset to the study of reality as a study of human existence of its awareness of embodiment of its spatio temporal bondage and of its ultimate ontological status Buddhism gave rise to truly astounding theories of life world causation The process of Buddhist thought as it refers to the nature of the human experience as in the world existence covers a vast range of doctrines from original theories of pluralism and phenomenalism with sectional multifarious and relativistic notions of causality through the unitary conceptions of monistic idealism up to the top of universal integrationism and dialectical totalism

philosophy of the classical i.e. the systematic period and does not seem to have been ready to add the philosophically creative new post systematic tradition of Buddhist epistemology and logic a major subject of his research in subsequent years Frauwallner's way of translating was straight forward to remain as close as possible to the original text For technical terms in the source materials he maintained a single translation even when various meanings were suggested For clarity regarding such variations of meaning he relied on the context and his explanation The same approach was taken by the translator of the present book However he has inserted helpful additional headlines into the text and considerably enlarged the index All other additions by the translator are given within square brackets
