Culture Katherine Butler, Samantha Bassler, 2019 The complex relationship between myths and music is here investigated. Myths and stories offer a window onto medieval and early modern musical culture. Far from merely offering material for musical settings, authoritative tales from classical mythology, ancient history, and the Bible were treated as foundations for musical knowledge. Such myths were cited in support of arguments about the uses, effects, morality, and preferred styles of music in sources as diverse as theoretical treatises, defences or critiques of music, art, sermons, educational literature, and books of moral conduct. Newly written literary stories too were believed capable of moral instruction and influence and were a medium through which ideas about music could be both explored and transmitted. How authors interpreted and weaved together these traditional stories or created their own reveals much about changing attitudes across the period. Looking beyond the well-known figure of Orpheus, this collection explores the myriad stories that shaped not only musical thought but also its styles, techniques, and practices. The essays show that music itself performed and created knowledge in ways parallel to myth and worked in tandem with old and new tales to construct social, political, and philosophical views. This relationship was not static; however, as the Enlightenment dawned, the once authoritative gods became comic characters, and myth became a medium for ridicule. Overall, the book provides a foundation for exploring myth and story throughout medieval and early modern culture and facilitating further study into the Enlightenment and beyond.

**The Medieval Culture of Disputation** Alex J. Novikoff, 2013-10-09 Scholastic disputation, the formalized procedure of debate in the medieval university, is one of the hallmarks of intellectual life in premodern Europe. Modeled on Socratic and Aristotelian methods of argumentation, this rhetorical style was refined in the monasteries of the early Middle Ages and rose to prominence during the twelfth-century Renaissance. Strict rules governed disputation, and it became the preferred method of teaching within the university curriculum and beyond. In *The Medieval Culture of Disputation*, Alex J. Novikoff has written the first sustained and comprehensive study of the practice of scholastic disputation and of its formative influence in multiple spheres of cultural life. Using hundreds of published and unpublished sources as his guide, Novikoff traces the evolution of disputation from its ancient origins to its broader impact on the scholastic culture and public sphere of the High Middle Ages. Many examples of medieval disputation are rooted in religious discourse and monastic pedagogy. Augustine's inner spiritual dialogues and Anselm of Bec's use of rational investigation in speculative theology laid the foundations for the medieval contemplative world. The polemical value of disputation was especially exploited in the context of competing Jewish and Christian interpretations of the Bible. Disputation became the hallmark of Christian intellectual attacks against Jews and Judaism first.

as a literary genre and then in public debates such as the Talmud Trial of 1240 and the Barcelona Disputation of 1263 As disputation filtered into the public sphere it also became a key element in iconography liturgical drama epistolary writing debate poetry musical counterpoint and polemic The Medieval Culture of Disputation places the practice and performance of disputation at the nexus of this broader literary and cultural context

Sufism is sometimes dismissed as a relatively recent new age phenomenon but in this book Mark Sedgwick argues that it has deep roots both in the Muslim world and in the West. In fact although the first significant Western Sufi organization was not established until 1915 the first Western discussion of Sufism was printed in 1480 and Western interest in Sufi thought goes back to the thirteenth century. Sedgwick starts with the earliest origins of Western Sufism in late antique Neoplatonism and early Arab philosophy and traces later origins in repeated intercultural transfers from the Muslim world to the West in the thought of the European Renaissance and Enlightenment and in the intellectual and religious ferment of the nineteenth century. He then follows the development of organized Sufism in the West from 1915 until 1968 the year in which the first Western Sufi order based on purely Islamic models was founded. Western Sufism shows the influence of these origins of thought both familiar and less familiar: Neoplatonic emanationism, perennialism, pantheism, universalism and esotericism. Western Sufism is the product not of the new age but of Islam, the ancient world and centuries of Western religious and intellectual history. Using sources from antiquity to the internet, Sedgwick demonstrates that the phenomenon of Western Sufism draws on centuries of intercultural transfers and is part of a long established relationship between Western thought and Islam.

*Maximus the Confessor* Paul M. Blowers, 2016. This study contextualizes the achievement of a strategically crucial figure in Byzantium's turbulent seventh century: the monk and theologian Maximus the Confessor (580-662). Building on newer biographical research and a growing international body of scholarship as well as on fresh examination of his diverse literary corpus, Paul Blowers develops a profile integrating the two principal initiatives of Maximus's career: first, his reinterpretation of the christocentric economy of creation and salvation as a framework for expounding the spiritual and ascetical life of monastic and non-monastic Christians; and second, his intensifying public involvement in the last phase of the ancient christological debates, the monothelete controversy, wherein Maximus helped lead an East-West coalition against Byzantine imperial attempts doctrinally to limit Jesus Christ to a single divine activity and will, devoid of properly human volition. Blowers identifies what he terms Maximus's cosmo-politeian worldview: a contemplative and ascetical vision of the participation of all created beings in the novel politeia or reordered existence inaugurated by Christ's new theandric energy. Maximus ultimately insinuated his teaching on the christoformity and cruciformity of the human vocation with his rigorous explication of the precise constitution of Christ's own composite person. In outlining this cosmo-politeian theory, Blowers additionally sets forth a theo-dramatic reading of Maximus inspired by Hans Urs von Balthasar, which depicts the motion of creation and history according to the christocentric plot or interplay of divine and creaturely freedoms. Blowers also amplifies how Maximus's cumulative achievement challenged imperial ideology in the seventh century, the repercussions of which cost him his life, and how it generated multiple recontextualizations in the later history of theology.

**The Problem of Universals from Boethius to John of Salisbury** Roberto Pinzani, 2018-06-12. The problem of universals is one of the main philosophical issues. In this book the author reconstructs the history of the problem considering a selection of medieval

representative texts and authors The source of medieval and postmedieval debate is identified in the Socratic Platonic survey on the definition of concepts In the Categories Aristotle discusses important topics concerning the relations that exist between logical terms In particular he establishes a kind of predication principle categorial terms have a certain predication relation if and only if some facts expressed by ordinary sentences hold The Categories also because of their particular disciplinary status halfway between logic and metaphysics leave a number of questions open Among these questions a particularly intriguing one is Porphyry's riddle are there genera and species And if there are such things what are they like

**An Introduction to Medieval Theology** Rik van Nieuwenhove, 2012-04-19 Medieval theology in all its diversity was radically theocentric Trinitarian Scriptural and sacramental It also operated with a profound view of human understanding in terms of intellectus rather than mere ratio In a post modern climate in which the modern views on autonomous reason are increasingly being questioned it may prove fruitful to re engage with pre modern thinkers who obviously did not share our modern and post modern presuppositions Their different perspective does not antiquate their thought as some of the cultured despisers of medieval thought might imagine On the contrary rather than rendering their views obsolete it makes them profoundly challenging and enriching for theology today This book is more than a survey of key medieval thinkers from Augustine to the late medieval period it is an invitation to think along with major theologians and explore how their thought can deeply challenge some of today's modern and post modern key assumptions Richard of St. Victor's Theory of

Imagination Ritva Palmén, 2014-08-21 Richard of St Victor d 1173 developed original ideas about the faculty of imagination in a twelfth century Parisian context Related to the historical study of philosophical psychology Richard of St Victor's Theory of Imagination acknowledges that the faculty of imagination being a necessary precondition for human reasoning and a link between soul and body plays an important role in Richard's understanding of the human soul Richard also deals with the interpretation of biblical language metaphors rhetoric and the possibility of creative imagination Considering all these aspects of the imagination in Richard's texts improves our understanding of his theological epistemology and sheds new light on the theory of the imagination in the history of medieval philosophy in general
