Philosophy of Mind and Cognition David Braddon-Mitchell, Frank Jackson, 1996-11-14 The philosophy of mind and cognition has been transformed by recent advances in what is loosely called cognitive science This book is a thoroughly up to date introduction to and account of that transformation in which the many strands in contemporary cognitive science are brought together into a coherent philosophical picture of the mind The book begins with discussions of the pre history of contemporary philosophy of mind dualism behaviourism and early versions of the identity theory of mind and moves through discussions of functionalism in autonomy of psychology to topics such as eliminative materialism individualism and the problems of content and representation The synoptic nature of the discussion makes it ideal as the foundation of an undergraduate course in the philosophy of mind

The Embodied Mind, revised edition Francisco J. Varela,Evan Thompson,Eleanor Rosch,2017-01-13 A new edition of a classic work that originated the embodied cognition movement and was one of the first to link science and Buddhist practices This classic book first published in 1991 was one of the first to propose the embodied cognition approach in cognitive science It pioneered the connections between phenomenology and science and between Buddhist practices and science claims that have since become highly influential Through this cross fertilization of disparate fields of study The Embodied Mind introduced a new form of cognitive science called enaction in which both the environment and first person experience are aspects of embodiment However enactive embodiment is not the grasping of an independent outside world by a brain a mind or a self rather it is the bringing forth of an interdependent world in and through embodied action Although enacted cognition lacks an absolute foundation the book shows how that does not lead to either experiential or philosophical nihilism Above all the book s arguments were powered by the conviction that the sciences of mind must encompass lived human experience and the possibilities for transformation inherent in human experience This revised edition includes substantive introductions by Evan Thompson and Eleanor Rosch that clarify central arguments of the work and discuss and evaluate subsequent research that has expanded on the themes of the book including the renewed theoretical and practical interest in Buddhism and mindfulness A preface by Jon Kabat Zinn the originator of the mindfulness based stress reduction program contextualizes the book and describes its influence on his life and work **Philosophy, Mind, and Cognitive Inquiry**

Thinking and Perceiving Dustin Stokes, 2021-05-26 Human beings are in contact with the world through their minds One can make sensory perceptual contact with the world One sees the tree and hears its leaves flutter And one makes cognitive contact with the world One forms beliefs about the tree memories of how it was in the past and expectations of how it will be in the future Can the first perception be influenced in important ways by the second cognition Do cognitive states such as memories beliefs and expectations affect what one perceives through the senses And what is the importance of these possible relations to how we theorize and understand the human mind Possible cognitive influence on perception sometimes called cognitive penetration of perception has been long debated in philosophy of mind and cognitive science Some argue that such influence occurs while others argue that it does not or cannot In this excellent introduction and overview of the problem Dustin Stokes examines the following The philosophical and scientific background to cognition and perception Contemporary ways of distinguishing cognition and perception Questions about the representational content of perception versus cognition Distinct theories of mental architecture modularity versus malleability Consequences for epistemology philosophy of science and aesthetics Philosophical and scientific research on perceptual attention Perceptual skill learning and expertise Perceptual content objectivity and cultural bias Additional features such as chapter summaries suggestions for further reading and a glossary make *Thinking and Perceiving* an ideal resource for students of philosophy of mind and psychology cognitive psychology and cognitive science
