works in the philosophy of nature alongside those of his scientific contemporaries who pursued and furthered that work this book does not simply aim to present Schelling's extravagant speculative physics as an historical episode Rather Schelling's programme is presented as a viable and necessary corrective both to the rejection of metaphysics and the correlative antiphysics at the ethical heart of contemporary philosophy

**Ideas for a Hermeneutic Phenomenology of the Natural Sciences** Joseph J. Kockelmans, 1993-07-31 I have always had a great interest in the philosophy of science At first this interest led to reflections on the mathematical sciences I later my focus shifted to the natural sciences 2 during the past twenty years or so my interest has also included the behavioral social and historical sciences From the very start my interest was always combined with a concern for the history of the sciences In

philosophy of science proper my main interest was not in logical methodological or even epistemological issues although I obviously studied and taught the most important insights proposed in the leading publications in this large field of study My concern has always been predominantly ontological and in that area I have approached the relevant issues from a 4 phenomenological perspective For what follows it is perhaps of some importance to mention here that I came to phenomenology in a rather indirect way through the philosophy of Nicolai Hartmann Yet it was mainly the influence of Herman Van Breda and Alphonse De Waelhens which led me directly to Husserl's phenomenology At first I focused almost exclusively on Husserl's phenomenology Later I moved in the direction of the philosophy of Merleau Ponty and 1Cf Joseph J Kockelmans Philosophy of Mathematics in the Middle Ages in Dutch Langemark Vonksteen 1953 On the Mode of Being of Mathematical Entities in Dutch in Tijdschrift voor Philosophie 16 1954 pp 289 331 2Joseph J Kockelmans On Time and Space

Michael Heidelberger, Gregor Schiemann, 2009 How was the hypothetical character of theories of experience thought about throughout the history of science The essays cover periods from the middle ages to the 19th and 20th centuries It is fascinating to see how natural scientists and philosophers were increasingly forced to realize that a natural science without hypotheses is not possible
