## **Philosophy Of The Curriculum:**

**Philosophical Foundations for the Curriculum** Allen Brent, 2016-09-19 In this book first published in 1978 Allen Brent sets out to explore some of the questions raised by theorists and philosophers regarding curriculum He starts by investigating whether all knowledge is the product of social conditions of particular times or places or whether there is some kind of universal framework implicit in the claims to knowledge which men make He looks at the work of Plato Newman Freire and Hirt and how each of them in a strikingly different way they have tried to give us an objective basis for curriculum judgements and how the validity of that basis is attacked by contemporary sociologists of knowledge This book is aimed primarily at students who are concentrating on the philosophy of education or curriculum theory Philosophy and Curriculum Marlow Ediger, 2003 Contents Philosophy in the Educational Arena Application of Philosophies of Education A History of Philosophical Perspectives Recent Philosophies of Education Philosophy of Measurement and Evaluation Issues in Education Objectives in the Curriculum Designing the Curriculum Learning Activities Philosophy and the Curriculum Innovations in the Curriculum Philosophical Deliberations and the Curriculum **Realms of Meaning** Philip H. Phenix, 1974 **Education and the Common Good** Philip Henry Phenix, 1961 **Realms of Meaning** Philip Henry Phenix, 1964 Why Teach Philosophy in Schools? Jane Gatley, 2023-03-09 This book presents a case for teaching philosophy in schools It develops two original arguments for teaching philosophy to all students at some point over the course of their education Gatley argues that teaching philosophy is the best way to help students to think clearly using ordinary or non specialist concepts such as good truth or happiness She goes on to argue that teaching philosophy is the best way to help students to make sense of the different conceptual schemes used by different school subjects Combining these two arguments Gatley suggests that these two roles for philosophy are central to the task of educating people and so philosophy ought to be included on school curricula Building on the work of philosophers of education including Richard Stanley Peters Harry Brighouse Matthew Lipman Mary Midgley and Martha Nussbaum the book covers a range of topics including Philosophy for Children P4C the aims education religious education curriculum design and education policy Philosophy in the Classroom Matthew Lipman, Ann Margaret Sharp, Frederick S. Oscanyan, 1980-05-15 This is a textbook for teachers that demonstrates how philosophical thinking can be used in teaching children It begins with the assumption that what is taught in schools is not and should not be subject matter but rather ways of thinking The main point is that the classroom should be converted into a community of inquiry and that one can begin doing that with children Based on the curriculum that Matt Lipman has developed at the Institute for the Advancement of Philosophy for Children which he heads this book describes the curriculum and explains its use The text is self contained however This revision is thorough going and incorporates new chapters as well as new material in old chapters Part One focuses on the need of educational change and the importance of philosophical inquiry in developing new approaches Part Two discusses curriculum and teaching methodology including

teacher behavior conducive to helping children Part Three deals with developing logic skills and moral judgment It concludes with a chapter on the sorts of philosophical themes pertinent to ethical inquiry for children the right and the fair perfect and right free will and determinism change and growth truth caring standards and rules thinking and thinking for oneself Education in this sense is not a matter of dispensing information it is the process of assisting in the growth of the whole individual

Philosophy of Education and the Curriculum Keith Dixon, 2014-05-17 Philosophy of Education and the Curriculum is a six chapter book that first elucidates the forms of knowledge argument and religious education Subsequent chapters detail the mathematics natural science and history forms of knowledge Moral philosophy and moral education are then explained The last chapter provides an explanation of learning
