Davis, Roland Faber, 2024-01-22 *Astrophilosophy Exotheology and Cosmic Religion Extraterrestrial Life in a Process Universe* applies Alfred North Whitehead's process philosophy and the associated process philosophies of Henri Bergson Teilhard de Chardin and others to the interdisciplinary layers of astrobiology extraterrestrial life and the impact of discovery This collection edited by Andrew M Davis and Roland Faber asks questions such as How have process thinkers imagined universal creative evolution and its implications for philosophies theologies and religions beyond earth and How might their claims as to the primacy of organism temporality novelty value and mind enrich current discussions and debates across disciplines As experts in their fields the contributors are informed by but not limited to process conceptualities The chapters not only advance recent discussions in astrobiology cosmology and evolution but also consider a constellation of philosophical topics from shared extraterrestrial knowledge and values to the possibilities or limitations afforded by AI technology the Fermi Paradox the Drake Equation and the increasing need to nurture the cosmic dimensions of theological and religious traditions **Society, Medicine and Religion in the Sacred Tales of Aelius Aristides** Ido Israelowich, 2012-05-07 This monograph offers a study of the inter relations between medicine religion and literature in the Sacred Tales of the Second Century CE Greek scholar Aelius Aristides *God and the Universe* Arthur Gibson, 2000 God and the Universe tackles the highly charged issue of God's relevance in the light of new scientific thinking on cosmology **The Cambridge Companion to Science and Religion** Peter Harrison, 2010-06-24 This book explores the historical relations between science and religion and discusses contemporary issues with perspectives from cosmology evolutionary biology and bioethics **Consilience, Truth and the Mind of God** Richard J. Di Rocco, 2018 This book argues that God can be found within the edifice of the scientific understanding of physics cosmology biology and philosophy It is a rewarding read that asks the Big Questions which humans have pondered since the dawn of the modern human mind including Why and how does the universe exist From where do the laws of physics come How did life and mind arise from inanimate matter on Earth Science and religion have a common interest in the answers to such questions yet many scientists and believers have been at odds for centuries The author and contributors present a program for moving beyond the vastly different perspectives of reality offered by science and religion Historical proofs for the existence of God are considered in light of the possibility that the universe may be only one in an

eternal multiverse that contains an infinite number of other universes Readers will find a modification of St Augustine s Argument from Truth for the existence of the necessary self sufficient being commonly referred to as God This book is suited to all with an interest in the crossing points of science and religion providing much food for thought and reflection If in the end you cannot accede to philosophy s proofs or theism s invitation to faith perhaps you will nevertheless say yes to the amazing universe in which we live

**Supersensible Impulses** Rudolf Steiner,2024-05-08 When you perform a ritual it is an appeal to the spiritual powers of the universe an appeal to the powers that are meant to connect with the earth precisely through what people do Rudolf Steiner With rituals or cultic forms as his central motif Rudolf Steiner refers extensively to Indian Persian and in particular Egyptian initiation rites and how these enabled people of antiquity to connect with specific spiritual beings He explains the practical purpose of mummification for the religious life of ancient Egypt and of the use of ritual in certain secret societies or brotherhoods today as in turn a mummification of Egyptian rites But he also points to the future describing how truly formulated rituals have a positive effect on human development Whilst inhalation exercises were relevant to cultures of the past the principle of exhalation is important for future evolution On the one hand these extraordinary lectures relate to Rudolf Steiner s ceremonial work in the Esoteric School of 1906 1914 but more significantly they were given in parallel to the founding of the Christian Community for which Rudolf Steiner mediated its sacraments Today he states Christ must be sought through a new access to the spiritual world and any remaining traditional ritualistic forms should be permeated with the power of the Mystery of Golgotha The lectures are accompanied with an introduction by Dale Brunsvold editorial notes and an index Eight lectures Dornach Sept Oct 1922 GA 216
