

# How Philosophy Connects with the classroom

Dewey said ... “ ....all which the school can or need do for pupils, so far as their minds are concerned ... is to develop their ability to think.” *Democracy in Education*  
and

“Thinking is a process of inquiry, of looking into things, of investigating ... It is seeking, a quest, for something that is not at hand.” *Democracy in Education*

What better way to enable this than by creating a Community of Inquiry in the classroom.

Philosophy sessions encourage students to think for themselves, accept responsibility for their own views and also to learn respect by valuing the ideas of others. The general structure of implementing Philosophy within the Classroom can be described in four phases:

teachers are known to be simply amazing Teachers inspire people because they impact knowledge and add value to their students lives and overall these individuals understand the sacrifice and dedication one must make in order to be successful in the lives they touch The most common role a teacher plays in the classroom is to teach knowledge to children and let us always have it in the back of our minds that it is only In learning you will teach and in teaching you will learn The most important role of a teacher is to deliver classroom instruction that helps students by ensuring that students experience academic success and through functioning as surrogate parents mentors and counsellors and even almost politicians since there is almost no limit to the roles a teacher will play Teachers teach in many ways including lectures small group activities and hands on learning activities Therefore to achieve all this there must be some laid down principles that must be followed in order to fully impact the students positively and overall achieve growth and development in the education industry A typical practice for instructors is to build up a showing logic which causes them to become intelligent specialists all through time on different educating and learning methodologies A teaching philosophy statement is a narrative that includes your conception of teaching and learning a description of how you teach and justification for why you teach in a particular way In other words your teaching philosophy is a self reflective statement of your beliefs about teaching and learning It is a one to two page narrative which conveys your core ideas about being an effective teacher in the context of your discipline The thrust of the paper is to critically analyse what is teaching philosophy and its importance to teachers and the educational sector as a whole This book will help starting and experienced instructors to improve their teaching abilities by building methods insight and a formative procedure concentrated on the upgrade for learning According to Aristotle Those who know do while those that understand teach I also firmly believe that the most vital and important thing in the world is teaching because the best thing a person can achieve in life is to learn something because it is virtually the only thing which the mind can never overlook never use up completely never feel isolated or estranged and will never let you down This is why Teaching Philosophy is very important to teachers because it enables them to understand the scope and limits of empirical research in education and the relationships between that research and conceptual issues in education thereby making them view and analyse from the perspective of their students Finally apart from understanding why students are behaving in a particular way with Teaching Philosophy teachers would also be able to know how students perceive their actions As a model in teaching in High school Colleges or Universities this book peels back the layers of those conceptual issues in teaching worlds and reveals many surprising findings that will impact you positively because this book has it all If you have found this book useful please consider leaving a short review on Amazon
