[Khmer Women on the Move](#) Annuska Derks,2008-04-11 This is a fascinating ethnography about young Khmer women moving to the city to work in the garment factories in prostitution and as street sellers The author makes good use of new theoretical approaches in anthropology that focus on negotiation and creativity in situations of rapid change The result is not only a welcome new book on post war Cambodia but an important addition to the literature on women migration and labor in Southeast Asia and the world Judy Ledgerwood Northern Illinois University Khmer Women on the Move offers a fascinating ethnography of young Cambodian women who move from the countryside to work in Cambodia s capital city Phnom Penh Female migration and urban employment are rising triggered by Cambodia s transition from a closed socialist system to an open market economy This book challenges the dominant views of these young rural women that they are controlled by global economic forces and national development policies or trapped by restrictive customs and Cambodia s tragic history The author shows instead how these women shape and influence the processes of change taking place in present day Cambodia Based on field research among women working in the garment industry prostitution and street trading the book explores the complex interplay between their experiences and actions gender roles and the broader historical context The focus on women involved in different kinds of work allows new insight into women s mobility highlighting similarities and differences in working conditions and experiences Young women s ability to utilize networks of increasing

size and complexity allows them to move into and between geographic and social spaces that extend far beyond the village context Women s mobility is further expressed in the flexible patterns of behavior that young rural women display when trying to fulfill their own modern aspirations along with their family obligations and cultural ideals [Waterfront](#)

[Regeneration in a Time of Climate Change](#) Raffaele Pernice,Tetsuya Yaguchi,2025-07-28 The current climate crisis and the rapid transformation of the natural environments will inevitably pose a threat to human settlements around the world This book explores possible local strategies and global solutions in the safeguarding of coastal cities and the often neglected urban waterfronts in terms of a more effective integration with the city whilst paying attention to the mitigation of the risks related to climate change Designers administrators and engineers need to start developing various scenarios and possible solutions to tackle the inevitable transformation which is currently unfolding This edited book contains essays which discuss several themes related to the effects of climate change on waterfronts looking at Japan s experience and other international case studies Collectively they provide a multi faceted analysis of selected projects and relevant urban experiences and practices which address issues such as the environmental disruption and the need for more efficient and sustainable forms of regeneration and urban renewal practice for the waterfronts The volume will appeal to architects planners geographers and general readers with an interest in landscape design and social science in an international context as well as undergraduate and postgraduate students in the disciplines of built environment [C'était Marguerite Duras](#) Jean Vallier,2006-05-17 A
