[Technology, Innovation, and Southern Industrialization](#) Susanna Delfino, Michele Gillespie, 2008. Because of its strong agrarian roots, the South has typically been viewed as a region not favorably disposed to innovation and technology. Yet innovation was never absent from industrialization in this part of the United States. From the early nineteenth century onward, southerners were as eager as other Americans to embrace technology as a path to modernity. This volume features seven essays that range widely across the region and its history from the antebellum era to the present to assess the role of innovations presumed lacking by most historians. Offering a challenging interpretation of industrialization in the South, these writings show that the benefits of innovations had to be carefully weighed against the costs to both industry and society. The essays consider a wide range of innovative technologies. Some examine specific industries in subregions: steamboats in the lower Mississippi valley, textile manufacturing in Georgia and Arkansas, coal mining in Virginia, and sugar planting and processing in Louisiana. Others consider the role of technology in South Carolina textile mills around the turn of the twentieth century, the electrification of the Tennessee valley, and telemedicine in contemporary Arizona, marking the expansion of the region into the southwestern Sunbelt. Together, these articles show that southerners set significant limitations on what technological innovations they were willing to adopt, particularly in a milieu where slaveholding agriculture had shaped the allocation of resources. They also reveal how scarcity of capital and continued reliance on agriculture influenced that allocation into the twentieth century, relieved eventually by federal spending during the Depression and its aftermath that sparked the Sunbelt South's economic boom. *Technology, Innovation, and Southern Industrialization* clearly demonstrates that the South's embrace of technological innovation in the modern era doesn't mark a radical change from the past but rather signals that such pursuits were always part of the region.

s economy It deflates the myth of southern agrarianism while expanding the scope of antebellum American industrialization beyond the Northeast and offers new insights into the relationship of southern economic history to the region s society and politics

In the Midst of Radicalism Guadalupe San Miguel,2022-01-13 The Chicano Movement of the 1960s and 70s like so much of the period s politics is best known for its radicalism militancy distrust of mainstream institutions demands for rapid change Less understood yet no less significant in its aims actions and impact was the movement s moderate elements In the Midst of Radicalism presents the first full account of these more mainstream liberal activists those who rejected the politics of protest and worked within the system to promote social change for the Mexican American community The radicalism of the Chicano Movement marked a sharp break from the previous generation of Mexican Americans Even so historian Guadalupe San Miguel Jr contends the first generation agenda of moderate social change persisted His book reveals how even in the ferment of the 60s and 70s Mexican American moderates used conventional methods to expand access to education electoral politics jobs and mainstream institutions Believing in the existing social structure though not the status quo they fought in the courts at school board meetings as lobbyists and advocates and at the ballot box They did not mount demonstrations but in their own deliberate way they chipped away at the barriers to their communities social acceptance and economic mobility Were these men and women pawns of mainstream political leaders or were they true to the Mexican American community representing its diverse interests as part of the establishment San Miguel explores how they contributed to the struggle for social justice and equality during the years of radical activism His book assesses their impact and how it fit within the historic struggle for civil rights waged by others since the early 1900s In the Midst of Radicalism for the first time shows us these moderate Mexican American activists as they were playing a critical role in the Chicano Movement while maintaining a long standing tradition of pursuing social justice for their community

Hispanics in the United States Laird W. Bergad,Herbert S. Klein,2010-08-09 This book examines the transformations in the demographic social and economic structures of Latino Americans in the United States between 1980 and 2005

Agrarian Landscapes in Transition Charles Redman,David R. Foster,2008-07-18 Agrarian Landscapes in Transition researches human interaction with the earth With hundreds of acres of agricultural land going out of production every day the introduction spread and abandonment of agriculture represents the most pervasive alteration of the Earth s environment for several thousand years What happens when humans impose their spatial and temporal signatures on ecological regimes and how does this manipulation affect the earth and nature s desire for equilibrium Studies were conducted at six Long Term Ecological Research sites within the US including New England the Appalachian Mountains Colorado Michigan Kansas and Arizona While each site has its own unique agricultural history patterns emerge that help make sense of how our actions have affected the earth and how the earth pushes back The book addresses how human activities influence the spatial and temporal structures of agrarian landscapes and how this varies over time and across biogeographic regions It also looks at

the ecological and environmental consequences of the resulting structural changes the human responses to these changes and how these responses drive further changes in agrarian landscapes The time frames studied include the ecology of the earth before human interaction pre European human interaction during the rise and fall of agricultural land use and finally the biological and cultural response to the abandonment of farming due to complete abandonment or a land use change such as urbanization
