Hedonic Indices as a Measure of Housing Quality Sally R. Merrill, 1980 The War Ledger A. F. K. Organski, Jacek Kugler, 1980 The War Ledger provides fresh sophisticated answers to fundamental questions about major modern wars Why do major wars begin What accounts for victory or defeat in war How do victory and defeat influence the recovery of the combatants Are the rules governing conflict behavior between nations the same since the advent of the nuclear era The authors find such well known theories as the balance of power and collective security systems inadequate to explain how conflict erupts in the international system Their rigorous empirical analysis proves that the power transition theory hinging on economic social and political growth is more accurate it is the differential rate of growth of the two most powerful nations in the system the dominant nation and the challenger that destabilizes all members and precipitates world wars Predictions of who will win or lose a war the authors find depend not only on the power potential of a nation but on the capability of its political systems to mobilize its resources the political capacity indicator After examining the aftermath of major conflicts the authors identify national growth as the determining factor in a nation s recovery With victory national capabilities may increase or decrease with defeat losses can be enormous Unexpectedly however in less than two decades losers make up for their losses and all combatants find themselves where they would have been had no war occurred Finally the authors address the question of nuclear arsenals They find that these arsenals do not make the difference that is usually assumed Nuclear weapons have not changed the structure of power on which international politics rests Nor does the behavior of participants in nuclear confrontation meet the expectations set out in deterrence theory Environmental Administrative Decisions United States. Environmental Protection Agency, 1995 *Civil Aeronautics Board Reports* United States. Civil Aeronautics Board, 1972 **Power, Interests, and Internal Factors** Xiaochuan Sang, 2018-12-17 This book frames the contentious political disputes surrounding Taiwan within the perspective of neorealist political theory Analyzing the motives and relative importance that the actors involved bring to bear Dr Sang offers a timely intervention and a much needed reality check on the role that Taiwan plays in structuring US China Japan trilateral relations an issue that will dominate the years to come This book will be of value to scholars policymakers and all those concerned with the future of Taiwan American Torture Michael Otterman, 2007-03-20 George W Bush calls them an alternative set of procedures vital tools needed to protect the American people and our allies American Torture reveals how torture became standard practice in today s War on Terror Tools including being forced standing for up to forty hours sleep deprivation for weeks on end and dousing naked prisoners with ice are undeniably torture and they are used by the United States of America Long before Abu Ghraib became a household name the US military and CIA used torture with impunity at home and abroad Billions of dollars were spent during the Cold War studying refining then teaching these techniques to American interrogators and to foreign officers charged with keeping Communism at bay This book writes the history of these methods and their invention and adoption by US military

personnel **Power, Space, and Time** J. Patrick Rhamey Jr.,Tadeusz Kugler,2020-01-24 Undergraduate students in most preliminary courses in international politics are introduced to realist liberal and constructivist approaches supplementing this theoretical introduction with conceptual discussions of the state international system and or decision making and policy formation By the end of their college experience undergraduate IR majors will engage coursework more narrowly focused on an empirical outcome such as war economic integration development or migration These advanced courses are directly linked to modern research agendas and graduate level course material usually with few references to the theoretical paradigms taught in introductory classes This volume seeks to bridge the gap between what is taught in early undergraduate education and what is created by scholars uniting abstract theoretical principles with practical contemporary policy and testable empirical questions **International Conflict** Stephen L. Quackenbush,2014-08-12 Introducing students to key theories and empirical findings of international conflict stemming from scientific research on core facets this book covers the whole process of interstate war from causes of conflict to escalation conduct resolution and recurrence **Poverty**

Reduction Policies and Practices in Developing Asia Almas Heshmati,Esfandiar Maasoumi,Guanghua Wan,2015-03-31 This book looks at the major policy challenges facing developing Asia and how the region sustains rapid economic growth to reduce multidimensional poverty through socially inclusive and environmentally sustainable measures Asia is facing many challenges arising from population growth rapid urbanization provision of services climate change and the need to redress declining growth after the global financial crisis This book examines poverty and related issues and aims to advance the development of new tools and measurement of multidimensional poverty and poverty reduction policy analysis The book covers a wide range of issues including determinants and causes of poverty and its changes consequences and impacts of poverty on human capital formation growth and consumption assessment of poverty strategies and policies the role of government NGOs and other institutions in poverty reduction rural urban migration and poverty vulnerability to poverty breakdown of poverty into chronic and transitory components and a comparative study on poverty issues in Asia and other regions The book will appeal to all those interested in economic development resources policies and economic welfare and growth **Parity and War** Jacek Kugler,Douglas Lemke,1996 Formal and empirical explanations of peace and war

Parameters ,1998 **The Destruction of Cities in the Ancient Greek World** Sylvian Fachard,Edward M. Harris,2021-09-30 The book studies examples of destruction of Ancient Greek cities and provides examples of human resilience and economic recovery following catastrophe **China, the US and the Power-Transition Theory** Steve Chan,2007-09-12 This volume analyzes the extent of ongoing power shifts among the leading powers exploring the portents for their future growth and seeking indicators of their relative commitment to the existing international order

Accelerated Testing Ulrich Schulz,2008-12-17 From the Foreword Accelerated Testing Nature and Artificial Weathering in the Coatings Industry is aimed at all those involved or interested in creating producing applying and testing modern high

quality coatings for outdoor use Coatings are exposed to a great many severe natural stresses that cause a gradual deterioration of the properties which are responsible for the coatings very quality Nevertheless buyers expect coated products to remain in an as new condition which is mostly characterised by a highly attractive appearance and intact surface for as long as possible This calls for coatings of high weatherability and long service life In this book accelerated testing through its simulation of the destructive action of natural weathering is the means for testing this coating quality Test engineers shoulder much responsibility because not only must the results form the basis for reliable predictions but they must also be obtained economically and as quickly as possible Their results are the dominant factor in any decision to take a new coating creation into series production Accelerated testing has become an indispensable tool in the paint and coatings chemistry as a means of avoiding nasty surprises by coatings in normal use Other methods of predicting service life are still too unreliable given the extent of current weathering knowledge Modern day high quality coatings are highly complex systems which contain numerous essential additives Not surprisingly coatings chemistry is therefore sometimes jokingly likened to alchemy But natural weathering in all its random manifestations of different impact is equally complex Words alone cannot describe how best to simulate the team like interaction of such a complex system in the laboratory There is more to successful simulation than applying a standardized test method or switching on a fully controlled weathering device which has been marketed as an all rounder It takes know how experience and skill This book will help such abilities to be acquired

War and State Making Karen A. Rasler, William R. Thompson, 2021-03-30 Originally published in 1989 this is an empirical study of the impact of global war on the expansion and shaping of nation states Individual chapters examine the effects of such wars and the preparation for them on debt financing expansion military spending welfare spending GNP and domestic violence The authors conclude that by virtue of the changes they spurn global wars are inherently accelerators of social change

The Secrets of Hegemony Tai-Yoo Kim, Daeryoon Kim, 2017-03-29 This book revisits the historically different paths to economic development that Spain the Netherlands Great Britain and the United States followed at different time periods since the early modern period Addressing the questions of how economic growth came about in these four countries and why sustained economic growth was achieved only by the two latter economic powers Great Britain and the United States it clearly highlights the long term economic impact of the individual economic systems each country had developed This discussion draws on two important variables in economic systems whether its primary activity is agriculture commerce or manufacturing and whether its productive system expands or simply reproduces From this interpretive framework the book suggests that the existing literature has not yet paid sufficient attention to the enduring impact on a nation s long term economic performance of their differing economic systems simple agricultural reproduction system Spain expansive commercial reinvestment system the Netherlands and expansive industrial reproduction system Great Britain and the United States The book also demonstrates why sustained economic growth was viable only within an expansive industrial

reproduction system and what conditions Great Britain and the United States had to fulfill to create such an economic system in their specific historical contexts It concludes by reflecting on the policy implications of the findings on current discussions concerning economic development within the global economy *Economic Growth* Tai-Yoo Kim, Almas Heshmati, 2013-11-29

This book shows that the existing theories on economic growth have clear limitations in terms of how much they can effectively contribute to actual economic growth Therefore this book presents a more effective theory on economic growth for countries and leaders looking to promote economic growth It is essentially centered around the theory of economic growth and theory of national development written for agricultural developing countries pursuing industrialization and late starting industrialized countries pursuing their own development Nevertheless it also makes a significant contribution to the very development of human civilization through the growth of developing countries late starting industrialized countries and early industrialized countries throughout the world How States Die Douglas Lemke, 2025

When states die there are massive consequences for neighboring states and sometimes for the entire international system Somalia's death in 1991 created a safe haven for criminal non state actors and has unsettled the Horn of Africa for decades When the Iraqi state was dismantled in 2003 a similar set of consequences plagued the Middle East and the international system more broadly In How States Die Douglas Lemke provides a rigorous analysis of this phenomenon by reconceptualizing the definitions of the state and state death A state exists according to Lemke whenever a set of state like political entities exercise control over a populated territory This includes both sovereign states and territorial contenders which lack formal diplomatic recognition Conceiving statehood in this way vastly increases the population of states that have experienced state death which casts new light on the entire phenomenon This increased range not only expands the list of ways states can die it also provides insights into whether diplomatic recognition is associated with longer life and shows that state strength is not related to state death Similarly in contrast to the conventional wisdom victories in conflict do not coincide with longer state survival State death is one of the central questions within international relations and Lemke's reformulation of what a state is will transform our understanding of how and why these deaths happen **The Political Economy of Predation** Mehrdad Vahabi, 2016

This book analyses conflict theory through one type of conflict in particular manhunting or predation **Portland** Frank H. Sleeper, 2004 Portland is often associated with the mythological phoenix the animal that rises out of the ashes of its apparent death Life here has often been a struggle to overcome the disastrous fires of 1775 and 1866 to rebuild after the change in Canadian policy in 1920 that devastated the waterfront and to outlast the Depression and the other economic crises that have affected the area The people of Portland have always faced these problems head on survived and rebuilt the city stronger than it was before This delightful pictorial history is a moving tribute to their spirit and drive Portland features more than 200 images that together document life in Maine's largest city over the last 130 years We see immigrants arrive from all corners of the world and watch as they build lives and businesses in their new home we witness the waterfront and Congress

Street rise fall and rise again and we observe how the political scene has changed and been changed by everyday people
Perhaps the most interesting photographs are those of everyday life of people working playing sports relaxing falling in love
